IEE Proceedings

The Institution of Electrical Engineers, Savoy Place, London WC2R 0BL, United Kingdom
Publishing Department: Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom

Volume 145 1998

The *IEE Proceedings* is published in twelve titles, as follows:

IEE Proceedings — Science, Measurement and Technology

IEE Proceedings — Electric Power Applications

IEE Proceedings — Generation, Transmission and Distribution

IEE Proceedings — Control Theory and Applications

IEE Proceedings — Computers and Digital Techniques

IEE Proceedings — Radar, Sonar and Navigation

IEE Proceedings — Circuits, Devices and Systems

IEE Proceedings — Microwaves, Antennas and Propagation

IEE Proceedings — Communications

IEE Proceedings — Optoelectronics

IEE Proceedings — Vision, Image and Signal Processing

IEE Proceedings — Software

Six issues of each title are published during the year.

This publication is copyright under the Berne Convention and the Universal Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright, Designs and Patents Act 1988, Part 1, Section 38, whereby a single copy of this article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by The Copyright (Librarians and Archivists) (Copying of Copyright Material) Regulations 1989: SI 1989/1212, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy individual contributions on condition that a full reference to the source is shown.

Single copies may be made for the purpose of research or private study.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $10.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. This consent does not extend to other kinds of copying, for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Multiple copying of the content of this publication without permission is always illegal.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

ADAPTIVE CONTROL

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives **CTA** p63
Adaptive H_∞ neural network tracking controller for electrically driven manipulators **CTA** p594
Application of adaptive dual controllers to a DC-motor **CTA** p299
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems **CTA** p575
Bearings-only target motion analysis based on a multihypothesis Kalman filter and adaptive ownship motion control **RSN** p247
Composite adaptive position controller for induction motor using feedback linearisation **CTA** p25
Design of a hydraulic force control system using a generalised predictive control algorithm **CTA** p428(5)
Generalised predictive controller with pole restriction **CTA** p219
Heterogeneous intelligent control systems **CTA** p551
Indirect adaptive control for a class of linear time-varying plants **CTA** p141
Neurocontroller for buffer overload control in a packet switch **COM** p227
Nonminimal state space approach to multivariable ramp metering control of motorway bottlenecks **CTA** p568
Online process estimation by ANNs and Smith controller design **CTA** p231
Recurrent networks for nonlinear adaptive control **CTA** p177
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances **CTA** p323
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems **CTA** p41
Rule regulation of indirect adaptive fuzzy controller design **CTA** p513
Slider-crank mechanism control using adaptive computed torque technique **CTA** p364
SMC-based adaptive input-output linearising control of induction motors **CTA** p55
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180

AEROSPACE SYSTEMS

Analysis of a frequency estimator for a class of laser signals with time-varying amplitude **RSN** p109
Basic functional requirements and results for an MSSR on-site evaluator based on RF target injection **RSN** p361
Laboratory study of the bi-leader process from an electrically floating conductor. I. General results **SMT** p185
Minimal state-space model realisation of a nonlinear helicopter **CTA** p415(4)
Nonlinear robust controller for a class of nonlinear uncertain systems **CTA** p405(5)
Operation of a fault tolerant PM drive for an aerospace fuel pump application **EPA** p441

AMPLIFIERS

Effects of impedance mismatch and imperfect isolation on distortion cancellation in feedforward amplifiers **CDS** p35
High-impedance voltage bias circuit for MOS amplifiers **CDS** p437
High-performance transimpedance formulation for MESFET- and HBT-based monolithic microwave integrated circuits **CDS** p429
New method to bias CMOS cascode amplifiers **CDS** p440
Noise performance analysis of bipolar operational amplifier based on the noise matrix superposition expression **CDS** p343
Power amplifier module combined with duplexer CDMA-based PCS phone **MAP** p486
Pressure sensors interfacing circuit with digital output **CDS** p332
State variable synthesis of single resistance controlled grounded capacitor oscillators using only two CFOAs **CDS** p135

ANALOGUE ELECTRONICS

Design and analysis of a ±1 V CMOS four-quadrant analogue multiplier **CDS** p148
Development of efficient switched network and mixed-mode simulators **CDS** p24
Efficient real-time modelling of substrate coupling in large mixed-signal Spice designs, using analogue HDL **CDS** p180
Four-quadrant analogue CMOS multiplier cell for VLSI signal and information processing **CDS** p132
Hardware implementation of a pulse-stream neural network **CDS** p141
Low-voltage single power supply four-quadrant multiplier using floating-gate MOSFETs **CDS** p40
Square-rooting and vector summation circuits using current conveyors **CDS** p139
Testing of analogue and mixed-signal circuits by using supply current measurements **CDS** p319
Time-domain fault diagnosis of analogue circuits in the presence of noise **CDS** p125
Tracking switched-capacitor CMOS current reference **CDS** p44
Transient response testing of analogue components in mixed-signal systems: a review **CDS** p314

ANTENNA ACCESSORIES

Circularly polarised wire antenna with a dual rhombic loop **MAP** p219
Combined EM field/linear and nonlinear circuit simulation using the FDTD method **MAP** p185
Cutoff and bandwidth characteristics of a circular coaxial waveguide with four T-septa symmetrically placed in the inner conductor **MAP** p366
Design of a wideband microstrip bowtie patch antenna **MAP** p137
Design of circular patch antennas on ferrite substrates **MAP** p49
Efficient technique for determining beam scanning characteristics of axisymmetric paraboloid reflectors **MAP** p25
Experimental study of novel resonant circular arrays **MAP** p92
Meander-line grid-array antenna **MAP** p309
Microstripline- and stripline-fed aperture-coupled cylindrical rectangular microstrip antennas **MAP** p257
New serially fed polarisation-agile linear array of patches **MAP** p392
Numerical analysis of honeycomb antennas with an electromagnetic coupling feed system **MAP** p99
Optical switch design for true time delay array antenna **OPT** p77
Pattern prediction of extended hemispherical-lens/objective-lens antenna system at millimetre wavelengths **MAP** p295
Ray tracing fields backscattered from curved dichroic structures **MAP** p406
Triangular-patch model of bowtie antennas: validation against Brown and Woodward **MAP** p465

ANTENNA ARRAYS

Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive attenuation of clutter and jamming for array radar **RSN** p193
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
Analysis of mutual coupling in a cavity-backed coaxial array of annular-slot antennas **MAP** p427
Analysis of the far-field pattern of an optical waveguide array using the finite-difference beam-propagation method **MAP** p175
Beamforming for circular and semicircular array antennas for low-cost wireless LAN data communications systems **MAP** p153
Design procedure for FSS with wide transmission band and rapid rolloff **MAP** p508
Experimental study of novel resonant circular arrays **MAP** p92
Generalisation of an array-failure-correction method **MAP** p332
Meander-line grid-array antenna **MAP** p309
Modified Chebyshev arrays **MAP** p45
Mutual coupling compensation in small planar array antennas **MAP** p1
New serially fed polarisation-agile linear array of patches **MAP** p392
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Numerical analysis of honeycomb antennas with an electromagnetic coupling feed system **MAP** p99
Numerical optimisation of slot parameters for a concentric array radial line slot antenna **MAP** p141
Optical switch design for true time delay array antenna **OPT** p77
Optimisation of synthesised array excitations using array polynome complex root swapping and genetic algorithms **MAP** p460
Over-the-horizon radar array calibration using echoes from ionised meteor trails **RSN** p173
Performance of active antenna oscillator arrays under modulation for communication systems **MAP** p313
Power synthesis of reconfigurable conformal arrays with phase-only control **MAP** p131
Retrodirective beams and their application to low sidelobe pattern synthesis in small planar phased arrays **MAP** p344
Space division multiple access (SDMA) field trials. 2. Calibration and linearity issues **RSN** p79
Space division multiple access (SDMA) field trials. I. Tracking and BER performance **RSN** p73

ANTENNA THEORY

Accelerant method for Green's function of horizontal dipole in parallel plate waveguide **MAP** p430
Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
Analysis of mutual coupling in a cavity-backed coaxial array of annular-slot antennas **MAP** p427
Analysis of the far-field pattern of an optical waveguide array using the finite-difference beam-propagation method **MAP** p175
Antenna radiation pattern measurement using a near-field wire scattering technique **MAP** p263
Beamforming for circular and semicircular array antennas for low-cost wireless LAN data communications systems **MAP** p153
Circularly polarised wire antenna with a dual rhombic loop **MAP** p219
Combined EM field/linear and nonlinear circuit simulation using the FDTD method **MAP** p185
Control of microstrip antenna radiation characteristics by ground plane size and shape **MAP** p207
CPW-fed slot antenna with wide radiating apertures **MAP** p104
Design of a wideband microstrip bowtie patch antenna **MAP** p137
Design of circular patch antennas on ferrite substrates **MAP** p49
Design of corner reflector antennas using FDTD **MAP** p481
Design procedure for FSS with wide transmission band and rapid rolloff **MAP** p508
Efficient technique for determining beam scanning characteristics of axisymmetric paraboloid reflectors **MAP** p25
Exploiting coherent multipath for mainbeam jammer suppression **RSN** p303
General entire-domain Galerkin method for analysis of wire antennas in the presence of dielectric bodies **MAP** p13
Generalisation of an array-failure-correction method **MAP** p332
Low-profile inverted-F antenna with parasitic elements on an infinite ground plane **MAP** p321
Meander-line grid-array antenna **MAP** p309
Microstripline- and stripline-fed aperture-coupled cylindrical rectangular microstrip antennas **MAP** p257
Modified Chebyshev arrays **MAP** p45
Mutual coupling compensation in small planar array antennas **MAP** p1
Near-field-far-field transformation from nonredundant plane-polar data: effective modellings of the source **MAP** p33
NF-FF transformation with cylindrical scanning: an effective technique for elongated antennas **MAP** p369
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Numerical analysis of honeycomb antennas with an electromagnetic coupling feed system **MAP** p99
Optimisation of synthesised array excitations using array polynome complex root swapping and genetic algorithms **MAP** p460
Pattern prediction of extended hemispherical-lens/objective-lens antenna system at millimetre wavelengths **MAP** p295
Performance of active antenna oscillator arrays under modulation for communication systems **MAP** p313
Performance of shaped beam quadrifilar antennas on the METOP spacecraft **MAP** p19
Power synthesis of reconfigurable conformal arrays with phase-only control **MAP** p131
Quasistatic capacitance and frequency-dependent effective permittivity of multilayer microstrip patch antennas **MAP** p75
Radio propagation characteristics in curved tunnels **MAP** p327
Ray tracing fields backscattered from curved dichroic structures **MAP** p406
Reflections inside an elliptical dielectric lens antenna **MAP** p243
Retrodirective beams and their application to low sidelobe pattern synthesis in small planar phased arrays **MAP** p344

Scattering analysis of arbitrarily shaped cylinders in a focused beam system **MAP** p289
Simple circuit model for coax-fed stacked rectangular microstrip patch antenna **MAP** p268
Simple formulas for the gain and far-field of open-ended rectangular waveguides **MAP** p80
Square spiral antenna on dielectric half-space: analysis using an electric field equation formulated by a finite-difference technique **MAP** p70
Time domain calculation of the parameters of thin wire antennas and scatterers in a half-space configuration **MAP** p57
Triangular-patch model of bowtie antennas: validation against Brown and Woodward **MAP** p465

ARRAY SIGNAL PROCESSING

Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
Analysis of weight error loss with a multichannel beamformer processor **RSN** p63
Beamforming for circular and semicircular array antennas for low-cost wireless LAN data communications systems **MAP** p153
Blind channel identification based on cyclic statistics **RSN** p58
Effects of nonzero bandwidth on direction of arrival estimators in array signal processing **RSN** p317
Exploiting coherent multipath for mainbeam jammer suppression **RSN** p303
Generalisation of an array-failure-correction method **MAP** p332
Generalised array manifold model for wireless communication channels with local scattering **RSN** p51
How narrow is narrowband? **RSN** p85
Improved multiple targets angle tracking algorithm using the joint probabilistic data association filter **RSN** p331
Minimum variance monopulse technique for an adaptive phased array radar **RSN** p374
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Performance analysis of ETDGE–an efficient and unbiased TDOA estimator **RSN** p325
Space division multiple access (SDMA) field trials. 2. Calibration and linearity issues **RSN** p79
Space division multiple access (SDMA) field trials. I. Tracking and BER performance **RSN** p73
Spatio-temporal radio channel characteristics in urban macrocells **RSN** p42
Two-dimensional ISAR imaging using full polarisation and super-resolution processing techniques **RSN** p240

AUDIO EQUIPMENT

Application of Grobner bases for decoding Reed-Solomon codes used on CDs **CDT** p369
Fuzzy neural systems for controlling sound localisation in stereophonic reproduction **CTA** p393(4)
Perceptual quantisation of LPC excitation parameters **VIS** p155
Reduction of loudspeaker polar response aberrations through the application of psychoacoustic error concealment **VIS** p11

AUTOMATA THEORY

Implicit manipulation of equivalence classes for large finite state machines **CDT** p395

AUTOMATIC TEST SYSTEMS

Algebraic test-pattern generation based on the Reed-Muller spectrum **CDT** p308
Built-in self-test generator design using nonuniform cellular automata model **CDS** p155
Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field **SMT** p20
IFIS: an online test methodology **CDS** p1
Model-based analysis of protection system performance **GTD** p547
Power-oriented partial-scan design approach **CDS** p229
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia **SMT** p307

BIOLOGICAL AND BIOMEDICAL SYSTEMS

Analysis of the second heart sound for diagnosis of paediatric heart disease **SMT** p285
Cardiac left ventricular volume changes assessment by long axis echocardiographical image processing **VIS** p203
Comparison of methods for harmonic wavelet analysis of heart rate variability **SMT** p291
Comparison of techniques for time-frequency analysis of the ECG during human ventricular fibrillation **SMT** p301
Deconvolution problem to produce ultrasonic short pulses **SMT** p317
Deformable model of the human iris for measuring ocular torsion from video images **VIS** p213
Feature-directed spiral coding of magnetic resonance images **VIS** p131
Generation of a prespecified electromagnetic field on the axis of a two-layer lossy cylinder **SMT** p222
Human ECG: nonlinear deterministic versus stochastic aspects **SMT** p279
Identification of inter-ictal spikes in the EEG using neural network analysis **SMT** p270
Optimal segmentation of cell images **VIS** p50
Pseudo-inverse filtering of IVUS images **SMT** p321
Reduction of magnetic fields from electric power and installation lines **SMT** p215
Three-dimensional reconstruction algorithm for electrical resistance tomography **SMT** p85
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia **SMT** p307

BROADCASTING

Continuous quality assessment of digitally-coded television pictures **VIS** p116

CABLES AND OVERHEAD LINES

Digital distance relaying algorithm for first-zone protection for parallel transmission lines **GTD** p531
Dynamic quadrature booster as an aid to system stability **GTD** p41
Earth-return path impedances of underground cables. I. Numerical integration of infinite integrals **GTD** p621
Earth-return path impedances of underground cables. II. Evaluations using neural networks **GTD** p627
Effect of realistic system modelling on low-voltage capacitor transient overvoltages **GTD** p682
Effect of surface charge on hydrophobicity levels of insulating materials **GTD** p675
Fault synthetic recognition for an EHV transmission line using a group of neural networks with a time-space property **GTD** p265
Improved symmetrical component-based fault distance estimation for digital distance protection **GTD** p739
Incomplete Faraday cage effect of helicopters used in platform live-line maintenance **GTD** p145
Method to improve digital distance relay impedance measurement when used in series compensated lines protected by a metal oxide varistor **GTD** p403
Multiple regression technique for estimating the insulation strength of series dielectrics on distribution systems: a statistical approach **GTD** p189
Online leakage current monitoring of 400 kV insulator strings in polluted areas [reply] **GTD** p480
Performance of uncompensated and series capacitor-compensated 500 kV long transmission line under subnormal frequency conditions **GTD** p315
Reduction of magnetic fields from electric power and installation lines **SMT** p215
Technical and economical optimisation of overhead power distribution line lightning protection **GTD** p239
Test procedures and lifetime data analysis for electro-thermal endurance characterisation of EPR-insulated cables **SMT** p13
Time-domain model for multiconductor power transmission lines **GTD** p473

CALIBRATION

High sensitivity precision relative intensity noise calibration standard using low noise reference laser source **SMT** p163
Laser-video scanner calibration without the use of a frame store **VIS** p244
Low permeability reference standards with improved high magnetic field strength performance **SMT** p181
Measurements of the temperature dependence of the output voltages of some Zener diode based voltage standards **SMT** p154
Over-the-horizon radar array calibration using echoes from ionised meteor trails **RSN** p173
Polarimetric calibration for wideband synthetic aperture radar imaging **RSN** p275
Space division multiple access (SDMA) field trials. 2. Calibration and linearity issues **RSN** p79

CIRCUIT BREAKERS

Dynamic quadrature booster as an aid to system stability **GTD** p41
Possibilistic-diagnosis theory for fault-section estimation and state identification of unobserved protective relays using tabu-search method **GTD** p722

CIRCUIT CAD

Fast search algorithm for tolerance design **CDS** p19
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment **SMT** p111
Parallel optimal statistical design method with response surface modelling using genetic algorithms **CDS** p7
Static power analysis for power-driven synthesis **CDT** p89

CIRCUIT COMPONENTS

Analysis of self-excited electronic ballasts using BJTs/MOSFETs as switching devices **CDS** p95

CIRCUIT THEORY AND DESIGN

Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements **SMT** p117
Analysis of IGBT modules connected in series **CDS** p354
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment **CDT** p155
Combined EM field/linear and nonlinear circuit simulation using the FDTD method **MAP** p185
Datapath layout optimisation using genetic algorithm and simulated annealing **CDT** p135
Design space exploration techniques for the codesign of embedded data processing systems **CDT** p161
Development of efficient switched network and mixed-mode simulators **CDS** p24
Efficient bipartitioning algorithm for size-constrained circuits **CDT** p37
Efficient real-time modelling of substrate coupling in large mixed-signal Spice designs, using analogue HDL **CDS** p180
Efficient simulation of microstrip circuits using adapted wavelets **MAP** p354
Fast search algorithm for tolerance design **CDS** p19
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters **SMT** p129
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment **SMT** p111
MPT-based branch-and-bound strategy for scheduling problem in high-level synthesis **CDT** p425
Multi-level factorisation technique for pass transistor logic **CDS** p48
Multiple fault diagnosis in analogue circuits using time domain response features and multilayer perceptrons **CDS** p213
New current conveyor for high-speed low-power current sensing **CDS** p85
New method to bias CMOS cascode amplifiers **CDS** p440
Optimisation of empirical model for IC fabrication process using linear programming **SMT** p58
Parallel optimal statistical design method with response surface modelling using genetic algorithms **CDS** p7
Passive lossless snubbers for DC/DC converters **CDS** p396
Quaternary voltage-mode CMOS circuits for multiple-valued logic **CDS** p71
Resonant converter in high power factor, high voltage DC applications **EPA** p307

Static power analysis for power-driven synthesis **CDT** p89
Steady-state and transient models for the electrical response of an electrorheological catch system **SMT** p94
Synthesis and performance of a new class of implementation for high-order recursive digital filters **VIS** p73
Time-domain fault diagnosis of analogue circuits in the presence of noise **CDS** p125

CLOSED LOOP SYSTEMS

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Characteristics of closed loop power control algorithms for a cellular DS/CDMA system **COM** p355
Closed-loop control system robustness improvement by a parameterised state feedback **CTA** p33
Closed-loop silicon accelerometers **CDS** p325
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays **CTA** p338
Design of stable actuator saturation compensators in the frequency domain **CTA** p345
Generalised predictive controller with pole restriction **CTA** p219
Global exponential stabilisation for nonlinear singularly perturbed systems **CTA** p377(4)
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Indirect adaptive control for a class of linear time-varying plants **CTA** p141
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)
Minimal state-space model realisation of a nonlinear helicopter **CTA** p415(4)
Neural servocontroller for nonlinear MIMO plant **CTA** p277
Novel control design for the buck converter **EPA** p39
PID tuning based on loop-shaping H_∞ control **CTA** p485
Real-time emulation for power equipment development. II. The virtual machine **EPA** p153
Robust and H_∞ stabilisation of interconnected systems with delays **CTA** p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies **CTA** p531
Robust decentralised control design using genetic algorithms in power system damping control **GTD** p1
Robust digital controller design for processes with dead times: new results **CTA** p159
Robust regional stabilisation of an electropneumatic actuator **CTA** p226
Robust stabilisation of a state delayed system **CTA** p87

CMOS INTEGRATED CIRCUITS

1 GHz 64-bit high-speed comparator using ANT dynamic logic with two-phase clocking **CDT** p433
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits **CDT** p364
Collapsing the CMOS transistor chain to an effective single equivalent transistor **CDS** p347
Complementary half-swing bus architecture and its application for wide band SRAM macros **CDS** p337
Design and analysis of a ±1 V CMOS four-quadrant analogue multiplier **CDS** p148
Design and characterisation of a CMOS VLSI self-timed multiplier architecture based on a bit-level pipelined-array structure **CDS** p247
Four-quadrant analogue CMOS multiplier cell for VLSI signal and information processing **CDS** p132
Integrated universal biquad based on triple-output OTAs and using digitally programmable zeros **CDS** p192
Low-voltage single power supply four-quadrant multiplier using floating-gate MOSFETs **CDS** p40
Modelling output waveform and propagation delay of a CMOS inverter in the submicron range **CDS** p402
New current conveyor for high-speed low-power current sensing **CDS** p85
New method to bias CMOS cascode amplifiers **CDS** p440
Novel MOSFET-C continuous-time oscillator with precision amplitude control and self-start **CDS** p90
Quaternary voltage-mode CMOS circuits for multiple-valued logic **CDS** p71
S^2I first-order incremental A/D converter **CDS** p78
Sensitisable-path-oriented clustered voltage scaling technique for low power **CDT** p301
Tracking switched-capacitor CMOS current reference **CDS** p44

CODES AND DECODING

(M−1) and (M−2) selfsynchronising M-ary codes generated with coding efficiency **COM** p65
Algebraic test-pattern generation based on the Reed-Muller spectrum **CDT** p308
Analysis and performance comparison of the trellis coded and convolutional coded DS/SSMA systems in impulsive noise environment **COM** p283
Application of Grobner bases for decoding Reed-Solomon codes used on CDs **CDT** p369
Area-time-efficient VLSI residue-to-binary converters **CDT** p229
Attack operators for digitally watermarked images **VIS** p271
Authenticated encryption scheme with (t, n) shared verification **CDT** p117
Code acquisition with diversity combining for FFH/MFSK spread spectrum systems **COM** p437
Coding for coherent optical CDMA networks **COM** p117
Construction of 2^n extended prime codes with cross-correlation constraint of one **COM** p297
Continuous quality assessment of digitally-coded television pictures **VIS** p116
Convolutional coding for bandlimited channels **COM** p309
Cryptanalysis and improvement of signcryption schemes **CDT** p149
Efficient group signature scheme based on the discrete logarithm **CDT** p15
Estimating time-varying noise introduced by CVSD for speech enhancement **VIS** p23
Fast codebook search algorithm for unconstrained vector quantisation **VIS** p97
Fast codeword search technique for the encoding of variable-rate vector quantisers **VIS** p103
Fast decoder for triple-error-correcting primitive binary BCH codes with odd m **COM** p60
Feature-directed spiral coding of magnetic resonance images **VIS** p131
Generalised inverses in public key cryptosystem design **CDT** p321
GF(2^m) multiplication over triangular basis for design of Reed-Solomon codes **CDT** p437
Golay sequences for identification of linear systems with weak nonlinear distortion **SMT** p123
Improving the capacity of CDMA systems using convolutional coding and interference cancellation **COM** p186
Incomplete locator polynomials and redundant iterations reduction in the Welch-Berlekamp algorithm **COM** p402
Iterative MAP decoding for serial concatenated convolutional codes **COM** p53
Joint quantisation and error diffusion of colour images using competitive learning **VIS** p137
Modular multiplication method **CDT** p317
MQAM modulation and RS codes for SS-CDMA communication over Rician fading channels **COM** p414
Multiple chip-rate DS/CDMA system and its spreading code dependent performance analysis **COM** p371
Novel accelerated simulation techniques for low bit error rate communication systems **COM** p337
Perceptual quantisation of LPC excitation parameters **VIS** p155
Performance analysis of optical orthogonal codes in CDMA LANs **COM** p265
Practical 8-PSK block-coded modulation with convolutional codes and soft decision block codes for packet networks **COM** p218
Rate-distortion analysis of nonlinear quantisers for MPEG video coders: sigmoidal and unimodal quantiser control functions **VIS** p249
Reliable tracking of facial features in semantic-based video coding **VIS** p257
Robust LPC parameter estimation in standard CELP 4800 bit/s speech coder **VIS** p19
Selection of multi-h modulation sets using a stochastic search algorithm **COM** p41
Signature schemes based on factoring and discrete logarithms **CDT** p33
Smart codec: an adaptive packet data link **COM** p180
Statistical coding method for facial features **VIS** p187
Systolic arrays for the Haar transform **CDT** p403
Systolic decoder for burst error-correcting codes **COM** p126
Theory and design of SEC-DED-AUED codes **CDT** p121
Threshold decoding and a new class of threshold decodable codes **COM** p289

COMMUNICATION SYSTEM THEORY

Adaptive Volterra channel equalisation with lattice orthogonalisation **COM** p109
Algorithm for sequential generation of states in failure-prone communication network **COM** p73
Analysis and performance comparison of the trellis coded and convolutional coded DS/SSMA systems in impulsive noise environment **COM** p283
Analysis of a leaky bucket control scheme in the signalling system no.7 network **COM** p25
Authenticated key exchange protocols resistant to password guessing attacks **COM** p304
Blind channel identification based on cyclic statistics **RSN** p58
Capture model for mobile radio slotted ALOHA systems **COM** p91
Cell-access control for multiple cell-loss classes in shared ATM output buffer **COM** p8
Channel assignment of cellular mobile systems with nonuniform cells **COM** p451
Characteristics of closed loop power control algorithms for a cellular DS/CDMA system **COM** p355
Coding for coherent optical CDMA networks **COM** p117
Construction of 2^n extended prime codes with cross-correlation constraint of one **COM** p297
Convolutional coding for bandlimited channels **COM** p309
Delay performance of an input queueing packet switch with two priority classes **COM** p141
Diversity reception of fading signals in spherically invariant noise **COM** p272
Evaluation of reservation-arbitrated access schemes for statistical multiplexing of variable-bit-rate video traffic over dual-bus metropolitan area networks **COM** p159
Fast and accurate estimation of ATM quality-of-service parameters with applications to call admission control **COM** p133
Fault-tolerant scaleable multicast algorithm with piggybacking approach on logical process ring **CDT** p292
Improving the capacity of CDMA systems using convolutional coding and interference cancellation **COM** p186
Integration of optimal routing and flow control in ATM networks **COM** p1
Look-ahead reservation-based scheduling for input-output buffered ATM switch **COM** p234
Lower bound for multimedia multicast routing **COM** p87
Measurements and prediction model optimisation for signal attenuation in vegetation media at centimetre wave frequencies **MAP** p201
MQAM modulation and RS codes for SS-CDMA communication over Rician fading channels **COM** p414
Multimedia transport in multihop wireless networks **COM** p342
Multiparty videoconferencing on multi-drop VP-based SONET/ATM rings: performance analysis **COM** p389
Multiple chip-rate DS/CDMA system and its spreading code dependent performance analysis **COM** p371
Neurocontroller for buffer overload control in a packet switch **COM** p227
New channel access protocol for a wide area DGPS deformation monitoring network **COM** p203
Optimal performance of coherent optical pulse CDMA systems based on code and phase synchronisation and interference cancellation **OPT** p353
Performance analysis of optical orthogonal codes in CDMA LANs **COM** p265
Performance analysis of priority leaky bucket scheme with queue-length-threshold scheduling policy **COM** p395
Performance of fast bandwidth reservation with multipath routing **COM** p80
Performance of hybrid OCA-FD/CDMA for cellular mobile communications **COM** p363
Power amplifier module combined with duplexer CDMA-based PCS phone **MAP** p486
Practical RAKE receiver architecture for the downlink communications in a DS-CDMA mobile system **COM** p277
Priority queue with two-state Markov-modulated arrivals **COM** p152
Priority queueing system with fixed-length packet-train arrivals **COM** p331
Reservation arbitrated access for efficient service integration over dual-bus metropolitan area networks **COM** p347
Space division multiple access (SDMA) field trials. 2. Calibration and linearity issues **RSN** p79
Space division multiple access (SDMA) field trials. I. Tracking and BER performance **RSN** p73
Taxonomy of space-time processing for wireless networks **RSN** p25
Throughput analysis of input-buffered ATM switch **COM** p15

COMPUTATIONAL COMPLEXITY

A posteriori real-time recurrent learning schemes for a recurrent neural network based nonlinear predictor **VIS** p365
Adaptive exact optimisation of minimally testable FPRM expansions **CDT** p385
Adaptive MLSE of QAM signals over frequency nonselective Rayleigh fading channels **COM** p426
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems **CTA** p575
Complexity-constrained best-basis wavelet packet algorithm for image compression **VIS** p391
Creating a highly reliable modified gamma interconnection network using a balance approach **CDT** p27
DPS: dynamic priority scheduling heuristic for heterogeneous computing systems **CDT** p411
Fast codebook search algorithm for unconstrained vector quantisation **VIS** p97
Fast codeword search technique for the encoding of variable-rate vector quantisers **VIS** p103
Fast decoder for triple-error-correcting primitive binary BCH codes with odd m **COM** p60
Fuzzy implementation of a Bayesian equaliser in the presence of intersymbol and co-channel interference **COM** p323
Hardware-efficient systolic architecture for inversion and division in GF(2^m) **CDT** p272
Improvement of the computation efficiency for a ray launching model **MAP** p303
Lower bound for multimedia multicast routing **COM** p87
Mapping finite element grids onto parallel multicomputers using a self-organising map **CDT** p211
Multiresolution and hybrid Bayesian algorithms for automatic detection of change points **VIS** p280
Practical 8-PSK block-coded modulation with convolutional codes and soft decision block codes for packet networks **COM** p218
Three-dimensional reconstruction algorithm for electrical resistance tomography **SMT** p85
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems **SMT** p31

COMPUTER APPLICATIONS

Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements **SMT** p117
Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Application of adaptive dual controllers to a DC-motor **CTA** p299
Application of genetic algorithms for control design in power systems **GTD** p345
Application of STATCOMs to wind farms **GTD** p511
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment **CDT** p155
Bandwidth allocation of virtual paths using neural-network-based genetic algorithms **COM** p33
CodeSign: an embedded system design environment **CDT** p171
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement **SMT** p61
Complementary half-swing bus architecture and its application for wide band SRAM macros **CDS** p337
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Correspondence on 'Planar constrained terminals over-the-cell router' **CDT** p319
Datapath layout optimisation using genetic algorithm and simulated annealing **CDT** p135
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives **CTA** p197
Design space exploration techniques for the codesign of embedded data processing systems **CDT** p161
Development of efficient switched network and mixed-mode simulators **CDS** p24
Dynamic modelling and control of a normal-force actuator **EPA** p449
Dynamic quadrature booster as an aid to system stability **GTD** p41
Efficient bipartitioning algorithm for size-constrained circuits **CDT** p37
Efficient processor arrays for the implementation of the generalised predictive-control algorithm **CTA** p47
Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field **SMT** p20
Evaluating software development effort model-building techniques for application in a real-time telecommunications environment **SEN** p29
Evolutionary approach to hardware/software partitioning **CDT** p203
Fast search algorithm for tolerance design **CDS** p19
Feasibility of employing artificial neural networks for emergent crop monitoring in SAR systems **RSN** p291
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters **SMT** p129
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Integrating rapid application development and participatory design **SEN** p105
Intelligent control for handling motion nonlinearity in a retrofitted machining table **CTA** p403(4)
Large-domain integral-equation method for analysis of general 3 D electromagnetic structures **MAP** p491
Managing inconsistency in reconfigurable systems **SEN** p172
Model-based analysis of protection system performance **GTD** p547
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment **SMT** p111
Multi-level factorisation technique for pass transistor logic **CDS** p48
Multiple-page-mapping backpropagation neural network for constant tension control **EPA** p239
Neurocontroller for buffer overload control in a packet switch **COM** p227
New current conveyor for high-speed low-power current sensing **CDS** p85
New method to bias CMOS cascode amplifiers **CDS** p440
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions **SMT** p67
Optimisation of empirical model for IC fabrication process using linear programming **SMT** p58
Parallel optimal statistical design method with response surface modelling using genetic algorithms **CDS** p7
Power-oriented partial-scan design approach **CDS** p229
Presynthesis partitioning for hardware/software cosynthesis **CDT** p197
Quaternary voltage-mode CMOS circuits for multiple-valued logic **CDS** p71
Real-time contingency evaluation and ranking technique **GTD** p517
Resonant converter in high power factor, high voltage DC applications **EPA** p307
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
ROM-based current controller for three-phase boost-type AC/DC converter **EPA** p544
Selection and evaluation of information systems methodologies: the gap between theory and practice **SEN** p100
Slider-crank mechanism control using adaptive computed torque technique **CTA** p364
Stack operations folding in Java processors **CDT** p333
Three-dimensional reconstruction algorithm for electrical resistance tomography **SMT** p85
Transformational partitioning for codesign **CDT** p181
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia **SMT** p307
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems **SMT** p31

COMPUTER COMMUNICATIONS

Beamforming for circular and semicircular array antennas for low-cost wireless LAN data communications systems **MAP** p153
Coding for coherent optical CDMA networks **COM** p117
Evaluation of reservation-arbitrated access schemes for statistical multiplexing of variable-bit-rate video traffic over dual-bus metropolitan area networks **COM** p159
Integration of optimal routing and flow control in ATM networks **COM** p1
Neurocontroller for buffer overload control in a packet switch **COM** p227
Performance analysis of optical orthogonal codes in CDMA LANs **COM** p265
Reservation arbitrated access for efficient service integration over dual-bus metropolitan area networks **COM** p347

CONTROL SYSTEMS ANALYSIS

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Analysis and comparison of control techniques for AC-AC matrix converters **EPA** p284
Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Application of adaptive dual controllers to a DC-motor **CTA** p299
Application of genetic algorithms for control design in power systems **GTD** p345
Application of STATCOMs to wind farms **GTD** p511
Bounded real lemma and H_∞ control for descriptor systems **CTA** p316
Closed-loop control system robustness improvement by a parameterised state feedback **CTA** p33
Control of single-link flexible beam using Hankel-norm-based reduced-order model **CTA** p151
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Cyclic control of linear systems with application to a flexible arm **CTA** p19
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays **CTA** p338
Design of a sliding mode controller with fuzzy sliding surfaces **CTA** p411(5)
Design of an iterative learning controller for a class of linear dynamic systems with time delay **CTA** p507
Design of optimal reduced order filter for unstable discrete time systems **CTA** p397(5)
Design of reduced-order observer-based variable structure power system stabiliser for unmeasurable state variables **GTD** p525
Design of stable actuator saturation compensators in the frequency domain **CTA** p345
Development of a SMES system as a fluctuating load compensator **GTD** p700
Digital redesign and performance evaluation using the energy resemblance index (ERI) **CTA** p383(4)
Discrete-time model reduction with optimal zero locations by norm minimisation **CTA** p499
Distributed state observer scheme for large-scale interconnected systems **CTA** p331
Dynamic modelling and control of a normal-force actuator **EPA** p449
Dynamic quadrature booster as an aid to system stability **GTD** p41
Excitation control system for use with synchronous generators **GTD** p537
Flux and torque control of switched reluctance machines **EPA** p519
Fuzzy logic based unified power flow controllers for transient stability improvement **GTD** p225
Generalised predictive controller with pole restriction **CTA** p219
Global exponential stabilisation for nonlinear singularly perturbed systems **CTA** p377(4)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances **CTA** p435(4)
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Indirect adaptive control for a class of linear time-varying plants **CTA** p141
Input and output scaling and reordering for diagonal dominance and block diagonal dominance **CTA** p523
Integrated approach to eigenstructure assignment by output feedback: the case of multiple eigenvalues **CTA** p265
Introduction to a special coordinate basis for multivariable linear systems **CTA** p204
LFT approach to robust $\mathcal{D}$-stability bounds of uncertain linear singular systems **CTA** p127
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems **CTA** p491
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)
Minimal state-space model realisation of a nonlinear helicopter **CTA** p415(4)
Modified feasible method for hierarchical steady-state control of complex systems **CTA** p603
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems **CTA** p241
New multi-objective stochastic search technique for economic load dispatch **GTD** p747
Nonlinear robust controller for a class of nonlinear uncertain systems **CTA** p405(5)
Novel control design for the buck converter **EPA** p39
Online process estimation by ANNs and Smith controller design **CTA** p231

Optimal controller design for nonlinear systems **CTA** p97
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal robust control design of static VAr compensators **GTD** p301
PID tuning based on loop-shaping H_∞ control **CTA** p485
Power flow control with controllable reactive series elements **GTD** p493
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Real-time contingency evaluation and ranking technique **GTD** p517
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances **CTA** p323
Robust and H_∞ stabilisation of interconnected systems with delays **CTA** p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies **CTA** p531
Robust control of sampled data systems **CTA** p236
Robust decentralised control design using genetic algorithms in power system damping control **GTD** p1
Robust digital controller design for processes with dead times: new results **CTA** p159
Robust discrete time observer with application to fault diagnosis **CTA** p353
Robust gamma stability of highly perturbed systems **CTA** p165
Robust regional stabilisation of an electropneumatic actuator **CTA** p226
Robust stabilisation of a state delayed system **CTA** p87
ROM-based current controller for three-phase boost-type AC/DC converter **EPA** p544
Rule regulation of indirect adaptive fuzzy controller design **CTA** p513
Scan loop control design for a spin-stabilised seeker **CTA** p119
Secondary voltage control: nonlinear selection of pilot buses, design of an optimal control law, and simulation results **GTD** p77
Self-excited induction generator with excellent voltage and frequency control **GTD** p33
Sliding-mode control for current distribution in parallel-connected DC-DC converters **EPA** p333
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180
Stable dynamical controller design for robust polynomial pole assignment **CTA** p259
State-space solution of the standard H_∞ control problem for strip mill gauge control **CTA** p291
Ultrasonic motor servo-drive with online trained neural-network model-following controller **EPA** p105
Voltage stability assessment with inclusion of hard limits **GTD** p505

CONTROL SYSTEM SYNTHESIS

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Application of genetic algorithms for control design in power systems **GTD** p345
Closed-loop control system robustness improvement by a parameterised state feedback **CTA** p33
Control of single-link flexible beam using Hankel-norm-based reduced-order model **CTA** p151
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Cyclic control of linear systems with application to a flexible arm **CTA** p19
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays **CTA** p338
Design of a sliding mode controller with fuzzy sliding surfaces **CTA** p411(5)
Design of an iterative learning controller for a class of linear dynamic systems with time delay **CTA** p507
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Design of reduced-order observer-based variable structure power system stabiliser for unmeasurable state variables **GTD** p525
Design of stable actuator saturation compensators in the frequency domain **CTA** p345
Development of a SMES system as a fluctuating load compensator **GTD** p700
Digital redesign and performance evaluation using the energy resemblance index (ERI) **CTA** p383(4)
Excitation control system for use with synchronous generators **GTD** p537
Flux and torque control of switched reluctance machines **EPA** p519
Fuzzy logic based unified power flow controllers for transient stability improvement **GTD** p225
Global exponential stabilisation for nonlinear singularly perturbed systems **CTA** p377(4)
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Input and output scaling and reordering for diagonal dominance and block diagonal dominance **CTA** p523
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems **CTA** p491
New multi-objective stochastic search technique for economic load dispatch **GTD** p747
Nonlinear robust controller for a class of nonlinear uncertain systems **CTA** p405(5)
Novel control design for the buck converter **EPA** p39
Online process estimation by ANNs and Smith controller design **CTA** p231
Optimal controller design for nonlinear systems **CTA** p97
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal robust control design of static VAr compensators **GTD** p301
PID tuning based on loop-shaping H_∞ control **CTA** p485
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies **CTA** p531
Robust control of sampled data systems **CTA** p236
Robust decentralised control design using genetic algorithms in power system damping control **GTD** p1
Robust digital controller design for processes with dead times: new results **CTA** p159
Robust stabilisation of a state delayed system **CTA** p87
ROM-based current controller for three-phase boost-type AC/DC converter **EPA** p544
Rule regulation of indirect adaptive fuzzy controller design **CTA** p513
Scan loop control design for a spin-stabilised seeker **CTA** p119
Secondary voltage control: nonlinear selection of pilot buses, design of an optimal control law, and simulation results **GTD** p77
Self-excited induction generator with excellent voltage and frequency control **GTD** p33
Sliding-mode control for current distribution in parallel-connected DC-DC converters **EPA** p333
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180
Stable dynamical controller design for robust polynomial pole assignment **CTA** p259
State-space solution of the standard H_∞ control problem for strip mill gauge control **CTA** p291
Ultrasonic motor servo-drive with online trained neural-network model-following controller **EPA** p105

CONVERTORS

AC-DC converter with unity power factor and minimum harmonic content of line current: design considerations **EPA** p553
Analysis and comparison of control techniques for AC-AC matrix converters **EPA** p284
Analysis and design of a novel fixed-frequency buck-boost zero-current zero-voltage switched converter **EPA** p33
Analysis of a novel solid state voltage regulator for a self-excited induction generator **GTD** p647
Chaos in ferroresonant wound voltage transformers: effect of core losses and universal circuit behaviour **SMT** p39
Competitive hysteresis controllers–a control concept for inverters having oscillating DC- and AC-side state variables **EPA** p569
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Current-fed three-phase converter with optimum PWM scheme and its practical input line filter design **EPA** p535
Development of a SMES system as a fluctuating load compensator **GTD** p700
Double-fed induction machine: converter optimisation and field oriented control without position sensor **EPA** p360
Dynamic quadrature booster as an aid to system stability **GTD** p41
Electric-power-quality improvement using parallel active-power conditioners **GTD** p597
Eliminating output distortion in four-switch inverters with three-phase loads **EPA** p326
Generalised bridge converter model for electromagnetic transient analysis **GTD** p423
Grid interface options for variable-speed, permanent-magnet generators **EPA** p273
Harmonic analysis of parallel-connected 12-pulse uncontrolled rectifier without an interphase transformer **EPA** p253
Low-distortion variable-level PWM technique **EPA** p73
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment **SMT** p111
Modelling of resonant switched-mode converters using SIMULINK **EPA** p159
New class of dual voltage converters for switched reluctance drives **EPA** p164
Noise quieting with random PWM AC drives **EPA** p1
Novel commutation technique of AC-AC converters **EPA** p295
Novel control design for the buck converter **EPA** p39
Novel passive rectifier with low THD based on harmonic injecting and counteracting principle **EPA** p339
Novel PWM line conditioner with fast output voltage control **EPA** p85
Operation of a fault tolerant PM drive for an aerospace fuel pump application **EPA** p441
Optimal nonlinear firing angle control of converter-fed DC drive systems **EPA** p217
Passive lossless snubbers for DC/DC converters **CDS** p396
PWM drives: voltage-type harmonic sources in power systems **GTD** p293
Re-lift converter: design, test, simulation and stability analysis **EPA** p315
Real-time emulation for power equipment development. I. Real-time simulation **EPA** p92
Real-time emulation for power equipment development. II. The virtual machine **EPA** p153
Resonant converter in high power factor, high voltage DC applications **EPA** p307
ROM-based current controller for three-phase boost-type AC/DC converter **EPA** p544
Saturable reactor-assisted soft-switching asymmetrical PWM DC-DC converter with high-frequency transformer link **EPA** p79
Self-excited induction generator with excellent voltage and frequency control **GTD** p33
Shunt-series active power filter for rectifiers AC and DC sides **EPA** p577
Simple equivalent circuit for the series-loaded resonant converter with voltage boosting capacitor **EPA** p301
Single-phase diode rectifier with novel passive filter **CDS** p254
Single-switch soft-switching electronic ballast with high input power factor **EPA** p345
Sliding-mode control for current distribution in parallel-connected DC-DC converters **EPA** p333
Static VAr compensator (STATCOM) based on single-phase chain circuit converters **GTD** p381
Steady-state model of direct connected generator-HVDC converter units in the harmonic domain **GTD** p559
Theoretical spectra of space-vector-modulated waveforms **EPA** p17
Turn-off analysis of PT and NPT IGBTs in zero-current switching **CDS** p185
Variable structure control of UPS inverters **EPA** p559
Zero-voltage-switching three-level auxiliary resonant commutated pole inverter for high-power applications **EPA** p25

CYBERNETICS AND ROBOTICS

Adaptive H_∞ neural network tracking controller for electrically driven manipulators **CTA** p594
Application of self-organising neural networks in robot tracking control **CTA** p135
Assessing dependability of safety critical systems using diverse evidence **SEN** p35
Control of single-link flexible beam using Hankel-norm-based reduced-order model **CTA** p151
Cyclic control of linear systems with application to a flexible arm **CTA** p19
Double-controller scheme for control of processes with dominant delay **CTA** p479(5)
Evaluating software development effort model-building techniques for application in a real-time telecommunications environment **SEN** p29
Heterogeneous intelligent control systems **CTA** p551
Intelligent control for handling motion nonlinearity in a retrofitted machining table **CTA** p403(4)

Introduction to a special coordinate basis for multivariable linear systems **CTA** p204
Joint quantisation and error diffusion of colour images using competitive learning **VIS** p137
Modelling and control of an under-actuated closed kinematic chain **CTA** p1
Optimal controller design for nonlinear systems **CTA** p97
Robust discrete time observer with application to fault diagnosis **CTA** p353
Robust Lyapunov control with perturbation estimation **CTA** p307
Robust position/force control of robot manipulators during constrained tasks **CTA** p427(4)
Status monitoring in flexible manipulators **CTA** p537

DATA COMMUNICATION

Authenticated key exchange protocols resistant to password guessing attacks **COM** p304
Coding for coherent optical CDMA networks **COM** p117
Evaluation of reservation-arbitrated access schemes for statistical multiplexing of variable-bit-rate video traffic over dual-bus metropolitan area networks **COM** p159
Fault-tolerant scaleable multicast algorithm with piggybacking approach on logical process ring **CDT** p293
Integration of optimal routing and flow control in ATM networks **COM** p1
Neurocontroller for buffer overload control in a packet switch **COM** p227
Performance analysis of optical orthogonal codes in CDMA LANs **COM** p265
Reservation arbitrated access for efficient service integration over dual-bus metropolitan area networks **COM** p347
Two integrated schemes of user authentication and access control in a distributed computer network **CDT** p419

DATA HANDLING

Empirical study of memory-data: characteristics and compressibility **CDT** p63
Visualising action contracts in object-oriented modelling **SEN** p70

DATA SECURITY

Authenticated encryption scheme with (t, n) shared verification **CDT** p117
Balanced Boolean functions **CDT** p52
Cryptanalysis and improvement of signcryption schemes **CDT** p149
Efficient group signature scheme based on the discrete logarithm **CDT** p15
Generalised inverses in public key cryptosystem design **CDT** p321
Modular multiplication method **CDT** p317
Signature schemes based on factoring and discrete logarithms **CDT** p33
Two integrated schemes of user authentication and access control in a distributed computer network **CDT** p419

DIELECTRIC MATERIALS AND DEVICES

Acoustic fields from PVDF interdigital transducers **SMT** p250
Comparison of DSC and TSDC investigations: α relaxation in polymers **SMT** p53
Dynamic modelling of dielectric response in the presence of a varying external parameter **CTA** p9
Effects of negative direct voltage pre-stressing on the breakdown of conductor-rod gaps under positive impulse voltages **SMT** p105
Fibre waveguide transducers for Lamb wave NDE **SMT** p260
Lead zirconate titanate thin films for microwave device applications **CDS** p373
Reflections inside an elliptical dielectric lens antenna **MAP** p243
Single camera three-dimensional endoscope system using a ferroelectric liquid crystal device **SMT** p49
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180
Triple mode dielectric resonator hybrid reflection filters **MAP** p337

DIGITAL ARITHMETIC

Area-time-efficient VLSI residue-to-binary converters **CDT** p229
Error-sensitivity assessment of vision algorithms **VIS** p124
Family of generalised multi-polarity complex Hadamard transforms **VIS** p371
Fast algorithm for modular reduction **CDT** p265
GA-based design of multiplierless 2-D state-space digital filters with low roundoff noise **CDS** p118
GF(2^m) multiplication over triangular basis for design of Reed-Solomon codes **CDT** p437
Modulo multipliers using polynomial rings **CDS** p443
Most-significant-bit-first serial/parallel multiplier **CDS** p278
New low complexity bidirectional systolic structures for serial multiplication over the finite field GF(q^m) **CDS** p55
Two's complement division without using the set of full precision comparisons **CDT** p19

DIGITAL ELECTRONICS

Analysis of interpolation waveforms in time-averaging interpolative digital-to-analogue converters **CDS** p389
Area-time-efficient VLSI residue-to-binary converters **CDT** p229
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment **CDT** p155
Collapsing the CMOS transistor chain to an effective single equivalent transistor **CDS** p347
Complementary half-swing bus architecture and its application for wide band SRAM macros **CDS** p337
Datapath layout optimisation using genetic algorithm and simulated annealing **CDT** p135
Digit-serial systolic multiplier for finite fields GF(2^m) **CDT** p143
Digital techniques for mobile radio chirp sounders **COM** p191
Efficient digital sweep oscillator with extremely low sweep rates **CDS** p409
Fast decoder for triple-error-correcting primitive binary BCH codes with odd m **COM** p60
IFIS: an online test methodology **CDS** p1
Modelling output waveform and propagation delay of a CMOS inverter in the submicron range **CDS** p402
Modulo multipliers using polynomial rings **CDS** p443
New current conveyor for high-speed low-power current sensing **CDS** p85
Optimised weighted-resistor digital to analogue converter **CDS** p197
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
ROM-based current controller for three-phase boost-type AC/DC converter **EPA** p544
S^2I first-order incremental A/D converter **CDS** p78
SPARC-based VLIW testbed **CDT** p215
Systolic decoder for burst error-correcting codes **COM** p126

DIGITAL FILTERS

Cylindrical architectures for 1-D recursive digital filters: A state space approach **CDT** p327
Design of causal stable IIR perfect reconstruction filter banks using transformation of variables **VIS** p287
GA-based design of multiplierless 2-D state-space digital filters with low roundoff noise **CDS** p118
Minimax design of two-channel nonuniform-division FIR filter banks **VIS** p88
Model reduction of 2-D separable-denominator transfer functions via quasi-Kalman decomposition **CDS** p13
Synthesis and performance of a new class of implementation for high-order recursive digital filters **VIS** p73

DIGITAL TECHNIQUES

Stack operations folding in Java processors **CDT** p333

DISCRETE SYSTEMS

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Design of optimal reduced order filter for unstable discrete time systems **CTA** p397(5)
Digital redesign and performance evaluation using the energy resemblance index (ERI) **CTA** p383(4)
Discrete-time model reduction with optimal zero locations by norm minimisation **CTA** p499
Efficient numerical method for the discrete-time symmetric matrix polynomial equation **CTA** p443(5)
Generalised predictive controller with pole restriction **CTA** p219
LFT approach to robust $\mathcal{D}$-stability bounds of uncertain linear singular systems **CTA** p127
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)
Method of constructing Lyapunov functions for linear discrete time systems **CTA** p83
Robust control of sampled data systems **CTA** p236
Robust digital controller design for processes with dead times: new results **CTA** p159
Robust discrete time observer with application to fault diagnosis **CTA** p353
Robust gamma stability of highly perturbed systems **CTA** p165

DISTRIBUTED PARAMETER SYSTEMS

Control of single-link flexible beam using Hankel-norm-based reduced-order model **CTA** p151
Cyclic control of linear systems with application to a flexible arm **CTA** p19
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays **CTA** p338
Design of an iterative learning controller for a class of linear dynamic systems with time delay **CTA** p507
Double-controller scheme for control of processes with dominant delay **CTA** p479(5)
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems **CTA** p491
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)
Model reduction of 2-D separable-denominator transfer functions via quasi-Kalman decomposition **CDS** p13
Online process estimation by ANNs and Smith controller design **CTA** p231
Robust and H_∞ stabilisation of interconnected systems with delays **CTA** p559
Robust stabilisation of a state delayed system **CTA** p87

EARTH SCIENCES

EM models for evaluating rain perturbation on the NRCS of the sea surface observed near nadir **RSN** p226
Generation of a prespecified electromagnetic field on the axis of a two-layer lossy cylinder **SMT** p222
Line-of-sight EM propagation experiment at 10.25 GHz in the tropical ocean evaporation duct **MAP** p65
Modal morphing on meteorological radar data for rainfall pattern analysis **RSN** p123
Numerical comparison of techniques for estimating Doppler velocity time series from coherent sea surface scattering measurements **RSN** p367
Rainfall profile retrieval through spaceborne rain radars utilising a sea surface NRCS model **RSN** p233
Random walk based characterisation of radar backscatter from the sea surface **RSN** p216

EDDY CURRENTS

Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems **SMT** p31

EDUCATION AND TRAINING

Preparing students for industrial teamwork: a seasoned software engineering curriculum **SEN** p1

ELECTRIC DISCHARGES

Effect of surface charge on hydrophobicity levels of insulating materials **GTD** p675
Impulse breakdown of short rod-plane gaps and the influence of humidity **SMT** p141

Influence of irradiation on impulse breakdown of sphere gaps and sphere-rod gaps **SMT** p147
Laboratory study of the bi-leader process from an electrically floating conductor. II. Bi-leader properties **SMT** p193
Multiple regression technique for estimating the insulation strength of series dielectrics on distribution systems: a statistical approach **GTD** p189

ELECTRO-OPTICAL DEVICES

Analysis of operating characteristics of TOADs using gain saturation and nonlinear gain in SOAs **OPT** p83
Broadband and low driving-voltage $LiNbO_3$ optical modulators **OPT** p360
Comparison of operation parameters between binary and analogue switching pixellated light valves **OPT** p236
Computer-aided analysis and design of optical structures based on novel directional couplers **OPT** p99
Design of externally tuned asymmetric fibre Fabry-Perot electroabsorption optical modulators **OPT** p344
Normal-incidence TE intersub-band transitions **OPT** p21
Optical switch design for true time delay array antenna **OPT** p77
Single camera three-dimensional endoscope system using a ferroelectric liquid crystal device **SMT** p49
Tandem of electroabsorption modulators integrated with a DFB laser and an optical amplifier for short optical pulse generation and coding **OPT** p198

ELECTROMAGNETIC COMPATIBILITY

Analysis and realisation of low-cost damped screened rooms **SMT** p1
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement **SMT** p61

ELECTROMAGNETIC INTERFERENCE

Analysis and design of a novel fixed-frequency buck-boost zero-current zero-voltage switched converter **EPA** p33
Saturable reactor-assisted soft-switching asymmetrical PWM DC-DC converter with high-frequency transformer link **EPA** p79

ELECTROMAGNETIC THEORY

3D-TLM pattern recognitions in free space **MAP** p387
Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive attenuation of clutter and jamming for array radar **RSN** p193
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
Analysis and design of a novel fixed-frequency buck-boost zero-current zero-voltage switched converter **EPA** p33
Analysis and realisation of low-cost damped screened rooms **SMT** p1
Asymptotic boundary condition for corrugated surfaces, and its application to scattering from circular cylinders with dielectric filled corrugations **MAP** p116
Branch cut integration method for computing signal propagation through dispersive media **RSN** p142
Capture model for mobile radio slotted ALOHA systems **COM** p91
Code acquisition with diversity combining for FFH/MFSK spread spectrum systems **COM** p437
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement **SMT** p61
Design procedure for FSS with wide transmission band and rapid rolloff **MAP** p508
EM models for evaluating rain perturbation on the NRCS of the sea surface observed near nadir **RSN** p226
Exploiting coherent multipath for mainbeam jammer suppression **RSN** p303
Features of creeping waves propagation on the dielectric-coated circular cylinder **MAP** p179
FFT-based self-normalising receiver for FFH spread spectrum systems **COM** p99
Fuzzy implementation of a Bayesian equaliser in the presence of intersymbol and cochannel interference **COM** p323
General entire-domain Galerkin method for analysis of wire antennas in the presence of dielectric bodies **MAP** p13
Improving the capacity of CDMA systems using convolutional coding and interference cancellation **COM** p186
Influence of air humidity on microwave depolarisation in semi-arid areas **MAP** p147
Interrelated problems in space-time processing for SAR and ISAR **RSN** p297
Line-of-sight EM propagation experiment at 10.25 GHz in the tropical ocean evaporation duct **MAP** p65
Lineshape analysis of breaking-wave Doppler spectra **RSN** p135
Minimum variance monopulse technique for an adaptive phased array radar **RSN** p374
Modal analysis at the junction formed by a circular or an elliptic waveguide and a translated and rotated elliptic waveguide **MAP** p501
Modal morphing on meteorological radar data for rainfall pattern analysis **RSN** p123
Modelling a positive lightning downward leader to study its effects on engineering systems **GTD** p395
Modelling nonlinear and dispersive propagation problems by using the TLM method **MAP** p193
MQAM modulation and RS codes for SS-CDMA communication over Rician fading channels **COM** p414
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Numerical comparison of techniques for estimating Doppler velocity time series from coherent sea surface scattering measurements **RSN** p367
Numerical computation of complex image Green's functions for multilayer dielectric media: near-field zone and the interface region **MAP** p449
Optimal performance of coherent optical pulse CDMA systems based on code and phase synchronisation and interference cancellation **OPT** p353
Optimising indoor base-station locations in coverage- and interference-limited indoor environments **COM** p445
Pattern prediction of extended hemispherical-lens/objective-lens antenna system at millimetre wavelengths **MAP** p295
Performance analysis of an FFH/BFSK self-normalising receiver under multitone jamming **COM** p431
Performance of the progressive numerical method and its comparison with the modified spatial decomposition technique in solving large scattering problems **MAP** p169
Phase characteristics of thick metal gratings **MAP** p411
Plane wave reflection from a chiral slab backed by soft and hard surfaces with application to polarisation transformers **MAP** p299
Rainfall profile retrieval through spaceborne rain radars utilising a sea surface NRCS model **RSN** p233
Random walk based characterisation of radar backscatter from the sea surface **RSN** p216
Reflection and transmission coefficients for thin bianisotropic layers **MAP** p163
Reflections inside an elliptical dielectric lens antenna **MAP** p243
Saturable reactor-assisted soft-switching asymmetrical PWM DC-DC converter with high-frequency transformer link **EPA** p79
Scattering analysis of arbitrarily shaped cylinders in a focused beam system **MAP** p289
Spectral Green's functions for multilayer media in a convenient computational form **MAP** p85
TE/TM decomposition of electromagnetic sources in a nonreciprocal anisotropic medium **MAP** p109
Time domain calculation of the parameters of thin wire antennas and scatterers in a half-space configuration **MAP** p57
Two-dimensional ISAR imaging using full polarisation and super-resolution processing techniques **RSN** p240
Use of Coifman intervallic wavelets in 2-D and 3-D scattering problems **MAP** p471

ELECTROMAGNETISM

3D-TLM pattern recognitions in free space **MAP** p387
Asymptotic approximation of some integrals involved in EFIE solutions using the method of moments **MAP** p361
Asymptotic boundary condition for corrugated surfaces, and its application to scattering from circular cylinders with dielectric filled corrugations **MAP** p116
Combined EM field/linear and nonlinear circuit simulation using the FDTD method **MAP** p185
Design and experimental characterisation of a linear reciprocating generator **EPA** p509
Dyadic Green's functions for the parallel-plate chirowaveguide **MAP** p273
Efficient propagation algorithm for 3D optical waveguides **OPT** p53
Electric field analysis for a static induction type of voltage sensor in three-phase power distribution systems **GTD** p437
Electronically-operated, linear, variable-reluctance, integrating, reversible actuator (ELVIRA)–a novel, low-cost, normal-force, tilting friction drive **EPA** p11
Experimental validation of 5 kN model electromagnetic vibration damper and design of a real-size 120 kN machine **EPA** p185
Fast computation of the nonsymmetrical components of the Green's function for multilayer media using complex images **MAP** p285
Features of creeping waves propagation on the dielectric-coated circular cylinder **MAP** p179
Flux and torque control of switched reluctance machines **EPA** p519
Generation of a prespecified electromagnetic field on the axis of a two-layer lossy cylinder **SMT** p222
Large-domain integral-equation method for analysis of general 3 D electromagnetic structures **MAP** p491
Loss and current distribution in foil windings of transformers **GTD** p709
Measurements of power system voltages using remote electric field monitoring **GTD** p217
Modelling a positive lightning downward leader to study its effects on engineering systems **GTD** p395
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions **SMT** p67
Numerical computation of complex image Green's functions for multilayer dielectric media: near-field zone and the interface region **MAP** p449
Numerical simulation of electromagnetic vibration of small induction motors **EPA** p528
Performance of the progressive numerical method and its comparison with the modified spatial decomposition technique in solving large scattering problems **MAP** p169
Phase characteristics of thick metal gratings **MAP** p411
Plane wave reflection from a chiral slab backed by soft and hard surfaces with application to polarisation transformers **MAP** p299
Reflection and transmission coefficients for thin bianisotropic layers **MAP** p163
Saturable reactor-assisted soft-switching asymmetrical PWM DC-DC converter with high-frequency transformer link **EPA** p79
Scattering analysis of arbitrarily shaped cylinders in a focused beam system **MAP** p289
TE/TM decomposition of electromagnetic sources in a nonreciprocal anisotropic medium **MAP** p109
Use of Coifman intervallic wavelets in 2-D and 3-D scattering problems **MAP** p471
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems **SMT** p31

ELECTRON TUBES

Theoretical analysis of ridge-loaded ring-plane slow wave structure by variational methods **MAP** p397

ELECTRIC VARIABLES CONTROL

Analysis and comparison of control techniques for AC-AC matrix converters **EPA** p284
Analysis, design and control of a novel spherical permanent-magnet actuator **EPA** p61
Analysis of a novel solid state voltage regulator for a self-excited induction generator **GTD** p647
Application of STATCOMs to wind farms **GTD** p511
Characteristics of closed loop power control algorithms for a cellular DS/CDMA system **COM** p355
Competitive hysteresis controllers–a control concept for inverters having oscillating DC- and AC-side state variables **EPA** p569
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Effects of unified power flow controllers on transient stability **GTD** p182
Excitation control system for use with synchronous generators **GTD** p537
Flux and torque control of switched reluctance machines **EPA** p519
Fuzzy inference system to assist the operator in reactive power control in distribution systems **GTD** p133
Fuzzy logic based unified power flow controllers for transient stability improvement **GTD** p225
Incorporation of a UPFC model in an optimal power flow using Newton's method **GTD** p336

Novel control design for the buck converter **EPA** p39
Observer-based speed estimation method for sensorless vector control of induction motors **CTA** p359
Operation of a fault tolerant PM drive for an aerospace fuel pump application **EPA** p441
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal robust control design of static VAr compensators **GTD** p301
Power flow control with controllable reactive series elements **GTD** p493
Real-time contingency evaluation and ranking technique **GTD** p517
ROM-based current controller for three-phase boost-type AC/DC converter **EPA** p544
Secondary voltage control: nonlinear selection of pilot buses, design of an optimal control law, and simulation results **GTD** p77
Self-excited induction generator with excellent voltage and frequency control **GTD** p33
Sliding-mode control for current distribution in parallel-connected DC-DC converters **EPA** p333
Steady-state model of direct connected generator-HVDC converter units in the harmonic domain **GTD** p559
Variable structure control of UPS inverters **EPA** p559
Voltage stability assessment with inclusion of hard limits **GTD** p505

ELECTRONIC CIRCUITS

Enzyme transistor circuits **CDS** p264

ENERGY CONVERSION

Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Design of an in-wheel motor for a solar-powered electric vehicle **EPA** p402
Development of a SMES system as a fluctuating load compensator **GTD** p700
Device characteristics of CuPc/TiO_2 heterojunctions **CDS** p383

EPITAXIAL GROWTH

1.3 μm InAsP quantum well lasers grown by solid source MBE **OPT** p3
GaAs MOSFET using MBE-grown Ga_2O_3 (Gd_2O_3) as gate oxide **CDS** p162
Optimising 1550 nm InGaAsP strain compensated MQW lasers close to the miscibility gap **OPT** p7

ERRORS AND ERROR ANALYSIS

Analysis of weight error loss with a multichannel beamformer processor **RSN** p63
Capture model for mobile radio slotted ALOHA systems **COM** p91
FFT-based self-normalising receiver for FFH spread spectrum systems **COM** p99
Joint quantisation and error diffusion of colour images using competitive learning **VIS** p137
Novel accelerated simulation techniques for low bit error rate communication systems **COM** p337
Selection of multi-h modulation sets using a stochastic search algorithm **COM** p41

EXPERT SYSTEMS

A posteriori real-time recurrent learning schemes for a recurrent neural network based nonlinear predictor **VIS** p365
Artificial intelligence in diagnosis and supply restoration for a distribution network **GTD** p444
Assessing dependability of safety critical systems using diverse evidence **SEN** p35
Bandwidth allocation of virtual paths using neural-network-based genetic algorithms **COM** p33
Earth-return path impedances of underground cables. II. Evaluations using neural networks **GTD** p627
Evaluating software development effort model-building techniques for application in a real-time telecommunications environment **SEN** p29
Feasibility of employing artificial neural networks for emergent crop monitoring in SAR systems **RSN** p291
Fuzzy decision-making model to determine the parameters for intelligent design of power system protection **GTD** p169
Fuzzy inference system to assist the operator in reactive power control in distribution systems **GTD** p133
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Intelligent system for fault diagnosis on low voltage distribution networks **GTD** p592
Model-based analysis of protection system performance **GTD** p547
Practical implementation of a hybrid fuzzy neural network for one-day-ahead load forecasting **GTD** p687
StoryNet: an evolving network of cases to learn information systems design **SEN** p119

FEEDBACK

Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Application of self-organising neural networks in robot tracking control **CTA** p135
Composite adaptive position controller for induction motor using feedback linearisation **CTA** p25
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Effects of unified power flow controllers on transient stability **GTD** p182
Excitation control system for use with synchronous generators **GTD** p537
Global exponential stabilisation for nonlinear singularly perturbed systems **CTA** p377(4)
Integrated approach to eigenstructure assignment by output feedback: the case of multiple eigenvalues **CTA** p265
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)
Minimal state-space model realisation of a nonlinear helicopter **CTA** p415(4)
Modelling and control of an under-actuated closed kinematic chain **CTA** p1
Modified feasible method for hierarchical steady-state control of complex systems **CTA** p603
Neural servocontroller for nonlinear MIMO plant **CTA** p277
Neurocontroller for buffer overload control in a packet switch **COM** p227
Observer-based speed estimation method for sensorless vector control of induction motors **CTA** p359
Optimal controller design for nonlinear systems **CTA** p97
Optimal nonlinear firing angle control of converter-fed DC drive systems **EPA** p217
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Recurrent networks for nonlinear adaptive control **CTA** p177
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances **CTA** p323
Robust and H_∞ stabilisation of interconnected systems with delays **CTA** p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies **CTA** p531
State-space solution of the standard H_∞ control problem for strip mill gauge control **CTA** p291

FIBRE LASERS

Approximate analytical expressions for signal amplification in strongly pumped fibre amplifiers **OPT** p138
Calculation of optical power emitted from a fibre grating laser **OPT** p319
Modelling of a pump-power-loss-controlled gain-locking system for EDFA application in WDM transmission systems **OPT** p205
Numerical analysis of Yb^{3+}-sensitised, Er^{3+}-doped, fibre-ring laser **OPT** p133

FIBRE OPTICS

Design of externally tuned asymmetric fibre Fabry-Perot electroabsorption optical modulators **OPT** p344
Dispersion in chiral optical fibres **OPT** p155
Fibre waveguide transducers for Lamb wave NDE **SMT** p260
Impact of apodised linearly chirped fibre gratings on the performance of dispersion-limited subcarrier systems **OPT** p117
Intensity and frequency noise transmission along single-mode fibre at zero-dispersion wavelength **OPT** p211
Light power behaviour when bending plastic optical fibres **OPT** p313
Performance limit of fibre-optic gas sensors from coherent backscatter **OPT** p186
Spot size expansion for improved OEIC-to-fibre coupling using directional couplers with 2D confinement **OPT** p71
Technique for modelling propagation of ultrashort pulses with an arbitrary waveform in lossy nonlinear optical fibres **OPT** p179
TM/TE modal solutions for submicron lossy metal-clad optical fibres **OPT** p171

FILTERS AND FILTERING

Chaos diode **CDS** p361
Detection of submillimetre wave radiation of a target using a high Tc superconducting detector **MAP** p190
Feasible designs for high order switched-current filters **CDS** p297
Field theory based design and comparison of two kinds of quasi-planar bandpass filters **MAP** p441
High-Q gyrator-based monolithic active tunable bandstop filter **CDS** p243
Integrated universal biquad based on triple-output OTAs and using digitally programmable zeros **CDS** p192
Intermodulation distortion in active microwave filters **MAP** p7
Ladder decompositions for wideband SI filter applications **CDS** p306
New current conveyor for high-speed low-power current sensing **CDS** p85
Passive lossless snubbers for DC/DC converters **CDS** p396
Programmable canonical switched-capacitor bump equaliser architecture **CDS** p285
Pseudo-inverse filtering of IVUS images **SMT** p321
Shunt-series active power filter for rectifiers AC and DC sides **EPA** p577
Single-phase diode rectifier with novel passive filter **CDS** p254
Square-rooting and vector summation circuits using current conveyors **CDS** p139
Tracking switched-capacitor CMOS current reference **CDS** p44
Triple mode dielectric resonator hybrid reflection filters **MAP** p337

FORMAL LOGIC

Adaptive exact optimisation of minimally testable FPRM expansions **CDT** p385
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits **CDT** p364
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system **CTA** p419(5)
Balanced Boolean functions **CDT** p52
Family of generalised multi-polarity complex Hadamard transforms **VIS** p371
Fuzzy logic approach to manoeuvring target tracking **RSN** p337
Logical manipulations and design of tributary networks in the arithmetic spectral domain **CDT** p347
Recursive relations and fast flow diagram for nonlinear quantised transform **CDT** p97
Synthesis of MVL functions using input and output assignments **CDS** p207
Towards a chemical model for software architecture reconfiguration **SEN** p130

FUZZY CONTROL

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives **CTA** p63
Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Autogeneration of fuzzy rules and membership functions for fuzzy modelling using rough set theory **CTA** p437(5)
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system **CTA** p419(5)
Design of a sliding mode controller with fuzzy sliding surfaces **CTA** p411(5)
Fuzzy inference system to assist the operator in reactive power control in distribution systems **GTD** p133
Fuzzy logic based unified power flow controllers for transient stability improvement **GTD** p225
Fuzzy neural systems for controlling sound localisation in stereophonic reproduction **CTA** p393(4)
Genetic algorithm based methodology to generate automatically optimal fuzzy systems **CTA** p583
Intelligent control for handling motion nonlinearity in a retrofitted machining table **CTA** p403(4)
Quality-optimised MPEG2 video data rate control using fuzzy logic techniques **VIS** p179

Rule regulation of indirect adaptive fuzzy controller design **CTA** p513

GENERATORS

AC-DC converter with unity power factor and minimum harmonic content of line current: design considerations **EPA** p553
Analysis, design and control of a novel spherical permanent-magnet actuator **EPA** p61
Application of adaptive dual controllers to a DC-motor **CTA** p299
Asymptotically stable adaptive load torque observer for precision position control of BLDC motor **EPA** p383
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system **CTA** p419(5)
Capacitor-assisted excitation of permanent-magnet generators **EPA** p497
Choice of drives for electric vehicles: a comparison between two permanent magnet AC machines **EPA** p247
Control of an EV drive with reduced unsprung mass **EPA** p600
Corona screen effectiveness in large machines under high voltage, high frequency transient conditions **EPA** p469
Design and experimental characterisation of a linear reciprocating generator **EPA** p509
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives **CTA** p197
Design of an in-wheel motor for a solar-powered electric vehicle **EPA** p402
Design optimisation of electric motors by genetic algorithms **EPA** p475
Dynamic modelling and control of a normal-force actuator **EPA** p449
Electronically-operated, linear, variable-reluctance, integrating, reversible actuator (ELVIRA)–a novel, low-cost, normal-force, tilting friction drive **EPA** p11
Energy conversion by nonlinear permanent magnet machines **EPA** p193
Experimental validation of 5 kN model electromagnetic vibration damper and design of a real-size 120 kN machine **EPA** p185
Grid interface options for variable-speed, permanent-magnet generators **EPA** p273
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Investigation of a new AC electrical machine winding **EPA** p125
Multiple-page-mapping backpropagation neural network for constant tension control **EPA** p239
Noise quieting with random PWM AC drives **EPA** p1
Nonlinear control of a large-gap 2-DOF magnetic bearing system based on a coupled force model **CTA** p269
Operation of a fault tolerant PM drive for an aerospace fuel pump application **EPA** p441
Optimal nonlinear firing angle control of converter-fed DC drive systems **EPA** p217
Parasitic losses in modular permanent-magnet generators **EPA** p485
Real-time emulation for power equipment development. II. The virtual machine **EPA** p153
Simulator of DC traction motors including both main pole and interpole saturation **EPA** p377
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180
Ultrasonic motor servo-drive with online trained neural-network model-following controller **EPA** p105

HOLOGRAPHY

Rigorous coupled-wave method applied to fan-out gratings **OPT** p165

INDUCTION MOTORS

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Analysis of a novel solid state voltage regulator for a self-excited induction generator **GTD** p647
Application of STATCOMs to wind farms **GTD** p511
Composite adaptive position controller for induction motor using feedback linearisation **CTA** p25
Double-fed induction machine: converter optimisation and field oriented control without position sensor **EPA** p360
Effects of end winding porosity upon the flow field and ventilation losses in the end region of TEFC induction machines **EPA** p423
Electrodynamic braking of wind turbines **EPA** p140
Eliminating output distortion in four-switch inverters with three-phase loads **EPA** p326
Experimental investigations on the stators of electrical machines in relation to vibration and noise problems **EPA** p455
Full-order estimator for induction motor states and parameters **EPA** p169
Heat transfer in a through-ventilated induction motor **EPA** p429
Influence of rotor skew on cage motor losses **EPA** p414
Modelling of electromagnetic excitation forces of small induction motor for vibration and noise analysis **EPA** p199
Novel dead time compensation method for induction motor drives using space vector modulation **EPA** p387
Numerical simulation of electromagnetic vibration of small induction motors **EPA** p528
Observer-based speed estimation method for sensorless vector control of induction motors **CTA** p359
Parameter identification of induction motor model using genetic algorithms **CTA** p587
Position control of a vector controlled induction machine using Slotine's sliding mode control approach **EPA** p231
PWM drives: voltage-type harmonic sources in power systems **GTD** p293
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Real-time emulation for power equipment development. I. Real-time simulation **EPA** p92
Self-excited induction generator with excellent voltage and frequency control **GTD** p33
Simulation of electromagnetic drive systems using graph theory **EPA** p393
SMC-based adaptive input-output linearising control of induction motors **CTA** p55

INFORMATION THEORY

Better M sequence design for parameter identification based on EKF **CTA** p92
Cluster analysis of NARMAX models for signal-dependent systems **CTA** p409(4)
Design of IIR notch filters with different passband gains **VIS** p6
Design of stable actuator saturation compensators in the frequency domain **CTA** p345
Finding sufficient inputs to calculate communications channel capacity **COM** p175
Golay sequences for identification of linear systems with weak nonlinear distortion **SMT** p123
How narrow is narrowband? **RSN** p85
Independent component analysis: source assessment and separation, a Bayesian approach **VIS** p149
Minimal state-space model realisation of a nonlinear helicopter **CTA** p415(4)
Model reduction of 2-D separable-denominator transfer functions via quasi-Kalman decomposition **CDS** p13
Multiresolution and hybrid Bayesian algorithms for automatic detection of change points **VIS** p280
Neural servocontroller for nonlinear MIMO plant **CTA** p277
Observer-based speed estimation method for sensorless vector control of induction motors **CTA** p359
Properties of estimability criteria for target motion analysis **RSN** p92
Properties of risk-sensitive filters/estimators **CTA** p106
Robust sequential detectors employing an order statistic prefilter **VIS** p82
Root moments: a digital signal-processing perspective **VIS** p293
Shaping the boundary of a multi-dimensional signal constellation with a non-flat power spectrum **COM** p213
Simulation approach and causality evaluation for an active noise control system **CTA** p423(4)
Theory and design of SEC-DED-AUED codes **CDT** p121
Tracking ill-conditioning for the RLS-lattice algorithms **VIS** p1

INSTRUMENTATION AND MEASUREMENT

Closed-loop silicon accelerometers **CDS** p325
Computer-aided analysis and design of optical structures based on novel directional couplers **OPT** p99
Detection of submillimetre wave radiation of a target using a high Tc superconducting detector **MAP** p190
Edge operator error estimation incorporating measurements of CCD TV camera transfer function **VIS** p229
Electric field analysis for a static induction type of voltage sensor in three-phase power distribution systems **GTD** p437
Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field **SMT** p20
Experimental investigation of layer-by-layer metallic photonic crystals **OPT** p409
Flammable gas sensors based on sol-gel materials **CDS** p379
Investigation of wafer-bonded $(Al_xGa_{1-x})_{0.5}In_{0.5}P/GaP$ light-emitting diodes **OPT** p248
Light power behaviour when bending plastic optical fibres **OPT** p313
Light sources for wavelengths >2 μm grown by MBE on InP using a strain relaxed buffer **OPT** p292
Measurements of power system voltages using remote electric field monitoring **GTD** p217
Normal-incidence TE intersub-band transitions **OPT** p21
Performance limit of fibre-optic gas sensors from coherent backscatter **OPT** p186
Pressure sensors interfacing circuit with digital output **CDS** p332
S^2I first-order incremental A/D converter **CDS** p78
Single camera three-dimensional endoscope system using a ferroelectric liquid crystal device **SMT** p49

INSULATED GATE FIELD EFFECT TRANSISTORS

Analysis and design of a novel fixed-frequency buck-boost zero-current zero-voltage switched converter **EPA** p33
Analysis of IGBT modules connected in series **CDS** p354
Development of a SMES system as a fluctuating load compensator **GTD** p700
GaAs MOSFET using MBE-grown Ga_2O_3 (Gd_2O_3) as gate oxide **CDS** p162
General large-signal charge-control equations for the MOSFET drain and source current under nonquasistatic conditions **CDS** p236
Novel PWM line conditioner with fast output voltage control **EPA** p85
Turn-off analysis of PT and NPT IGBTs in zero-current switching **CDS** p185

INSULATORS AND INSULATION

Impact of surface coating insulation on small motor performance **EPA** p409
Multiple regression technique for estimating the insulation strength of series dielectrics on distribution systems: a statistical approach **GTD** p189
Portable optoelectronic instrument for measuring furfuraldehyde in transformer oil **SMT** p45
Short-time Fourier and wavelet transforms for fault detection in power transformers during impulse tests **SMT** p77
Test procedures and lifetime data analysis for electro-thermal endurance characterisation of EPR-insulated cables **SMT** p13

INTEGRATED CIRCUITS

Area-time-efficient VLSI residue-to-binary converters **CDT** p229
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment **CDT** p155
Collapsing the CMOS transistor chain to an effective single equivalent transistor **CDS** p347
Effects of impedance mismatch and imperfect isolation on distortion cancellation in feedforward amplifiers **CDS** p35
Efficient bipartitioning algorithm for size-constrained circuits **CDT** p37
Efficient real-time modelling of substrate coupling in large mixed-signal Spice designs, using analogue HDL **CDS** p180
Hardware-efficient systolic architecture for inversion and division in $GF(2^m)$ **CDT** p272
Hardware implementation of a pulse-stream neural network **CDS** p141
High-impedance voltage bias circuit for MOS amplifiers **CDS** p437
High-performance transimpedance formulation for MESFET- and HBT-based monolithic microwave integrated circuits **CDS** p429
IFIS: an online test methodology **CDS** p1
Inductance in VLSI interconnection modelling **CDS** p175
Influence of lot arrival distribution on production dispatching rule scheduling and cost in the final test process of LSI manufacturing system **SMT** p26
Measurements on millimetre wave circuits at 140 GHz **SMT** p171
Microwave-optoelectronic modelling approaches for semiconductor lasers **OPT** p141
Modelling output waveform and propagation delay of a CMOS inverter in the submicron range **CDS** p402
Multi-level factorisation technique for pass transistor logic **CDS** p48

New method to bias CMOS cascode amplifiers **CDS** p440
Noise performance analysis of bipolar operational amplifier based on the noise matrix superposition expression **CDS** p343
Optimisation of empirical model for IC fabrication process using linear programming **SMT** p58
Packaging impact on switching noise in high-speed digital systems **CDS** p446
Power-oriented partial-scan design approach **CDS** p229
Systolic dual basis serial multiplier **CDT** p237
Testing of analogue and mixed-signal circuits by using supply current measurements **CDS** p319

INTEGRATED OPTICS

All-optical integrated optic devices: a hybrid approach **OPT** p227
Efficient propagation algorithm for 3D optical waveguides **OPT** p53
Passive modelocking in semiconductor lasers with monolithically integrated passive waveguides **OPT** p43
Polariser based on a PbSe-clad optical waveguide in the infrared wavelength: the role of a buffer layer **OPT** p223
Spot size expansion for improved OEIC-to-fibre coupling using directional couplers with 2D confinement **OPT** p71
Tandem of electroabsorption modulators integrated with a DFB laser and an optical amplifier for short optical pulse generation and coding **OPT** p198

INTEGRATED OPTOELECTRONICS

Passive modelocking in semiconductor lasers with monolithically integrated passive waveguides **OPT** p43
Spot size expansion for improved OEIC-to-fibre coupling using directional couplers with 2D confinement **OPT** p71
Tandem of electroabsorption modulators integrated with a DFB laser and an optical amplifier for short optical pulse generation and coding **OPT** p198

INTERFERENCE SUPPRESSION

Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive attenuation of clutter and jamming for array radar **RSN** p193
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
Analysis and design of a novel fixed-frequency buck-boost zero-current zero-voltage switched converter **EPA** p33
Analysis and realisation of low-cost damped screened rooms **SMT** p1
Capture model for mobile radio slotted ALOHA systems **COM** p91
Code acquisition with diversity combining for FFH/MFSK spread spectrum systems **COM** p437
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement **SMT** p61
Exploiting coherent multipath for mainbeam jammer suppression **RSN** p303
FFT-based self-normalising receiver for FFH spread spectrum systems **COM** p99
Fuzzy implementation of a Bayesian equaliser in the presence of intersymbol and co-channel interference **COM** p323
Improving the capacity of CDMA systems using convolutional coding and interference cancellation **COM** p186
Interrelated problems in space-time processing for SAR and ISAR **RSN** p297
Minimum variance monopulse technique for an adaptive phased array radar **RSN** p374
MQAM modulation and RS codes for SS-CDMA communication over Rician fading channels **COM** p414
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Optimal performance of coherent optical pulse CDMA systems based on code and phase synchronisation and interference cancellation **OPT** p353
Optimising indoor base-station locations in coverage- and interference-limited indoor environments **COM** p445
Performance analysis of an FFH/BFSK self-normalising receiver under multitone jamming **COM** p431
Saturable reactor-assisted soft-switching asymmetrical PWM DC-DC converter with high-frequency transformer link **EPA** p79

ISDN

Analysis of a leaky bucket control scheme in the signalling system no.7 network **COM** p25
Reservation arbitrated access for efficient service integration over dual-bus metropolitan area networks **COM** p347

LASER MODES

Dispersion compensation in a 10 Gbit/s IM/DD semiconductor laser system in an NRZ scheme **OPT** p47
Effects of carrier heating, nonequilibrium LO phonons and lattice heating on small-signal modulation response of semiconductor lasers **OPT** p13
Fast tuning of 3.3 μm InAsSb-InAsSbP diode lasers using nonlinear optical effects **OPT** p261
Microwave-optoelectronic modelling approaches for semiconductor lasers **OPT** p141
Modelling of self-sustained pulsations in nonuniformly pumped semiconductor lasers **OPT** p217
Modelling pulse propagation in semiconductor optical amplifiers using wavelets **OPT** p88
Numerical analysis of Yb^{3+}-sensitised, Er^{3+}-doped, fibre-ring laser **OPT** p133
Passive modelocking in semiconductor lasers with monolithically integrated passive waveguides **OPT** p43
Polarisation modulation dynamics of birefringent vertical cavity surface emitting lasers **OPT** p31

LASERS

1.3 μm InAsP quantum well lasers grown by solid source MBE **OPT** p3
Analysis of a frequency estimator for a class of laser signals with time-varying amplitude **RSN** p109
Effect of GaSb growth temperature on p-GaSb/n-GaAs diodes grown by MOVPE **OPT** p287
Fast tuning of 3.3 μm InAsSb-InAsSbP diode lasers using nonlinear optical effects **OPT** p261
High sensitivity precision relative intensity noise calibration standard using low noise reference laser source **SMT** p163
Influence of Auger and LO-phonon scattering on bulk and 'quasi'-quantum wire mid-IR laser diodes **OPT** p281
Interface-induced phenomena in type II antimonide-arsenide heterostructures **OPT** p268
Laser generation of ultrasonic Lamb waves using low power optical sources **SMT** p244
Laser-video scanner calibration without the use of a frame store **VIS** p244
Light sources for wavelengths >2 μm grown by MBE on InP using a strain relaxed buffer **OPT** p292
Mid-infrared InSb and InAlSb diode lasers **OPT** p265
Modelling of a pump-power-loss-controlled gain-locking system for EDFA application in WDM transmission systems **OPT** p205
Modelling of self-sustained pulsations in nonuniformly pumped semiconductor lasers **OPT** p217
Numerical analysis of Yb^{3+}-sensitised, Er^{3+}-doped, fibre-ring laser **OPT** p133
Optimising 1550 nm InGaAsP strain compensated MQW lasers close to the miscibility gap **OPT** p7
Output power saturation characteristics of the CW-operated semiconductor Raman laser **OPT** p243
Passive modelocking in semiconductor lasers with monolithically integrated passive waveguides **OPT** p43
Polarisation modulation dynamics of birefringent vertical cavity surface emitting lasers **OPT** p31
Prism-like folded cavity surface-emitting laser diode: electromagnetic-threshold analysis **OPT** p151
Raman amplification in GaP-$Al_xGa_{1-x}P$ waveguides for light frequency discrimination **OPT** p105
Spontaneous emission in semiconductor microcavity post lasers **OPT** p37
Undercut ridge structures: a novel approach to 1.3/1.55 μm vertical-cavity lasers designed for continuous-wave operation **OPT** p125

LIGHT PROPAGATION

Efficient propagation algorithm for 3D optical waveguides **OPT** p53

LINEAR NETWORK ANALYSIS

Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements **SMT** p117
Combined EM field/linear and nonlinear circuit simulation using the FDTD method **MAP** p185
Generalised TLM switch model for power electronics applications **SMT** p101
Noise performance analysis of bipolar operational amplifier based on the noise matrix superposition expression **CDS** p343
Transfer functions of lumped distributed multibranch networks **MAP** p279
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems **SMT** p31

LOGIC AND SWITCHING CIRCUITS

1 GHz 64-bit high-speed comparator using ANT dynamic logic with two-phase clocking **CDT** p433
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits **CDT** p364
Algebraic test-pattern generation based on the Reed-Muller spectrum **CDT** p308
Balanced Boolean functions **CDT** p52
Collapsing the CMOS transistor chain to an effective single equivalent transistor **CDS** p347
Correspondence on 'Planar constrained terminals over-the-cell router' **CDT** p319
Design and analysis of asynchronous adders **CDT** p1
Design and characterisation of a CMOS VLSI self-timed multiplier architecture based on a bit-level pipelined-array structure **CDS** p247
Design for the discrete cosine transform in VLSI **CDT** p127
Design of a basic cell to construct embryonic arrays **CDT** p242
Designs for self checking flip-flops **CDT** p81
Family of generalised multi-polarity complex Hadamard transforms **VIS** p371
GF(2^m) multiplication over triangular basis for design of Reed-Solomon codes **CDT** p437
Hardware-efficient systolic architecture for inversion and division in GF(2^m) **CDT** p272
IFIS: an online test methodology **CDS** p1
Implicit manipulation of equivalence classes for large finite state machines **CDT** p395
Logic synthesis for a fine-grain FPGA **CDT** p47
Modelling output waveform and propagation delay of a CMOS inverter in the submicron range **CDS** p402
Most-significant-bit-first serial/parallel multiplier **CDS** p278
Multi-level factorisation technique for pass transistor logic **CDS** p48
New low complexity bidirectional systolic structures for serial multiplication over the finite field GF(q^m) **CDS** p55
Partial scan design based on levelised combinational structure **CDT** p249
Power-oriented partial-scan design approach **CDS** p229
Quaternary voltage-mode CMOS circuits for multiple-valued logic **CDS** p71
Recursive relations and fast flow diagram for nonlinear quantised transform **CDT** p97
Sensitisable-path-oriented clustered voltage scaling technique for low power **CDT** p301
Static power analysis for power-driven synthesis **CDT** p89
Synthesis of MVL functions using input and output assignments **CDS** p207
Systolic dual basis serial multiplier **CDT** p237
Two's complement division without using the set of full precision comparisons **CDT** p19

LOGIC DESIGN

1 GHz 64-bit high-speed comparator using ANT dynamic logic with two-phase clocking **CDT** p433
Adaptive exact optimisation of minimally testable FPRM expansions **CDT** p385
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits **CDT** p364
Algebraic test-pattern generation based on the Reed-Muller spectrum **CDT** p308
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment **CDT** p155
Balanced Boolean functions **CDT** p52
CodeSign: an embedded system design environment **CDT** p171

Collapsing the CMOS transistor chain to an effective single equivalent transistor **CDS** p347
Correspondence on 'Planar constrained terminals over-the-cell router' **CDT** p319
Design and analysis of asynchronous adders **CDT** p1
Design for the discrete cosine transform in VLSI **CDT** p127
Design space exploration techniques for the codesign of embedded data processing systems **CDT** p161
Evolutionary approach to hardware/software partitioning **CDT** p203
Family of generalised multi-polarity complex Hadamard transforms **VIS** p371
IFIS: an online test methodology **CDS** p1
Implicit manipulation of equivalence classes for large finite state machines **CDT** p395
Logic synthesis for a fine-grain FPGA **CDT** p47
Logical manipulations and design of tributary networks in the arithmetic spectral domain **CDT** p347
Method for minimising the switching activity of two-level logic circuits **CDT** p357
MPT-based branch-and-bound strategy for scheduling problem in high-level synthesis **CDT** p425
Multi-level factorisation technique for pass transistor logic **CDS** p48
Partial scan design based on levelised combinational structure **CDT** p249
Power-oriented partial-scan design approach **CDS** p229
Presynthesis partitioning for hardware/software cosynthesis **CDT** p197
Quaternary voltage-mode CMOS circuits for multiple-valued logic **CDS** p71
Recursive relations and fast flow diagram for nonlinear quantised transform **CDT** p97
Sensitisable-path-oriented clustered voltage scaling technique for low power **CDT** p301
Static power analysis for power-driven synthesis **CDT** p89
Synthesis of MVL functions using input and output assignments **CDS** p207
Transformational partitioning for codesign **CDT** p181

MAGNETIC MATERIALS AND DEVICES

Acceleration feedforward control for active magnetic bearing systems excited by ground motion **CTA** p113
Dynamic modelling and control of a normal-force actuator **EPA** p449
FDTD analysis of EM wave circulated by a magnetised ferrite body of arbitrary shape **MAP** p433
Low permeability reference standards with improved high magnetic field strength performance **SMT** p181
Nonlinear control of a large-gap 2-DOF magnetic bearing system based on a coupled force model **CTA** p269

MATERIALS AND MATERIALS TESTING

Acoustic fields from PVDF interdigital transducers **SMT** p250
Air-coupled ultrasonic transducers for measurement of green-state ceramics at elevated temperatures **SMT** p237
Broadband dielectric spectroscopy of conducting polyaniline **SMT** p166
Comparison of DSC and TSDC investigations: α relaxation in polymers **SMT** p53
Fibre waveguide transducers for Lamb wave NDE **SMT** p260
Flammable gas sensors based on sol-gel materials **CDS** p379
Generation of a prespecified electromagnetic field on the axis of a two-layer lossy cylinder **SMT** p222
Laser generation of ultrasonic Lamb waves using low power optical sources **SMT** p244
Lead zirconate titanate thin films for microwave device applications **CDS** p373
Light power behaviour when bending plastic optical fibres **OPT** p313
Multiple regression technique for estimating the insulation strength of series dielectrics on distribution systems: a statistical approach **GTD** p189
Steady-state and transient models for the electrical response of an electrorheological catch system **SMT** p94
Synthesis of luminescent sol-gel materials for active electronic devices **CDS** p364
Ultrasonic transducers for high temperature applications **SMT** p229

MATHEMATICAL TECHNIQUES

Analysis of operating characteristics of TOADs using gain saturation and nonlinear gain in SOAs **OPT** p83
Analysis of radix searching of exponential bidirectional associative memory **CDT** p279
Analysis of the second heart sound for diagnosis of paediatric heart disease **SMT** p285
Application of adaptive dual controllers to a DC-motor **CTA** p299
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems **CTA** p575
Application of genetic algorithms for control design in power systems **GTD** p345
Approach for bus frequency estimating in power system simulations **GTD** p431
Assessing dependability of safety critical systems using diverse evidence **SEN** p35
Asymptotic approximation of some integrals involved in EFIE solutions using the method of moments **MAP** p361
Asymptotic boundary condition for corrugated surfaces, and its application to scattering from circular cylinders with dielectric filled corrugations **MAP** p116
Autogeneration of fuzzy rules and membership functions for fuzzy modelling using rough set theory **CTA** p437(5)
Balanced Boolean functions **CDT** p52
Bandwidth allocation of virtual paths using neural-network-based genetic algorithms **COM** p33
Bicriterion optimisation for traction substations in mass rapid transit systems using genetic algorithm **EPA** p49
Bounded real lemma and H_∞ control for descriptor systems **CTA** p316
Cepstral behaviour due to additive noise and a compensation scheme for noisy speech recognition **VIS** p316
Chirp z-transform based SPECAN approach for phase-preserving ScanSAR image generation **RSN** p254
Classification of sets of mixed pixels with the hypothesis-testing Hough transform **VIS** p57
Cluster analysis of NARMAX models for signal-dependent systems **CTA** p409(4)
Comparison between evolutionary programming and a genetic algorithm for fault-section estimation **GTD** p616
Comparison of methods for harmonic wavelet analysis of heart rate variability **SMT** p291
Comparison of techniques for time-frequency analysis of the ECG during human ventricular fibrillation **SMT** p301
Computer-aided analysis and design of optical structures based on novel directional couplers **OPT** p99
Constraint-oriented style for object-oriented formal specification **SEN** p61
Continuous Mandarin speech recognition for Chinese language with large vocabulary based on segmental probability model **VIS** p309
Control of single-link flexible beam using Hankel-norm-based reduced-order model **CTA** p151
CPW-fed slot antenna with wide radiating apertures **MAP** p104
Datapath layout optimisation using genetic algorithm and simulated annealing **CDT** p135
Decentralised detection strategies under communication constraints **RSN** p199
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays **CTA** p338
Demand-side optimal selection of switching devices in radial distribution system planning **GTD** p409
Design for the discrete cosine transform in VLSI **CDT** p127
Design of a basic cell to construct embryonic arrays **CDT** p242
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Design of optimal reduced order filter for unstable discrete time systems **CTA** p397(5)
Design optimisation of electric motors by genetic algorithms **EPA** p475
Discrete-time model reduction with optimal zero locations by norm minimisation **CTA** p499
Distributed state observer scheme for large-scale interconnected systems **CTA** p331
Dyadic Green's functions for the parallel-plate chirowaveguide **MAP** p273
Dynamic modelling of dielectric response in the presence of a varying external parameter **CTA** p9
Efficient multispectral texture segmentation using multivariate statistics **VIS** p357
Electromagnetic transient simulation of power systems using root-matching techniques **GTD** p481
Embedding incomplete binary trees into incomplete hypercubes **CDT** p377
Embedding meshes and TORUS networks onto degree-four chordal rings **CDT** p73
Error-sensitivity assessment of vision algorithms **VIS** p124
Evaluating software development effort model-building techniques for application in a real-time telecommunications environment **SEN** p29
Failure detection approach applying to GPS autonomous integrity monitoring **RSN** p342
Fast codebook search algorithm for unconstrained vector quantisation **VIS** p97
Fast codeword search technique for the encoding of variable-rate vector quantisers **VIS** p103
Fast computation of the nonsymmetrical components of the Green's function for multilayer media using complex images **MAP** p285
Fast search algorithm for tolerance design **CDS** p19
Features of creeping waves propagation on the dielectric-coated circular cylinder **MAP** p179
Fuzzy decision-making model to determine the parameters for intelligent design of power system protection **GTD** p169
Fuzzy logic approach to manoeuvring target tracking **RSN** p337
Fuzzy soft mathematical morphology **VIS** p41
GA-based design of multiplierless 2-D state-space digital filters with low roundoff noise **CDS** p118
Gain/loss characterisation of optical waveguide and semiconductor laser structures **OPT** p93
General entire-domain Galerkin method for analysis of wire antennas in the presence of dielectric bodies **MAP** p13
Generalised bridge converter model for electromagnetic transient analysis **GTD** p423
Generalised model for Banyan networks with nonuniform traffic **CDT** p225
Generalised predictive controller with pole restriction **CTA** p219
Genetic algorithm based methodology to generate automatically optimal fuzzy systems **CTA** p583
H_∞ design of switching surfaces for sliding-mode control with nonmatching disturbances **CTA** p435(4)
Harmonic analysis of parallel-connected 12-pulse uncontrolled rectifier without an interphase transformer **EPA** p253
Human ECG: nonlinear deterministic versus stochastic aspects **SMT** p279
Hydrothermal generation scheduling package: a genetic based approach **GTD** p451
Improved multiple targets angle tracking algorithm using the joint probabilistic data association filter **RSN** p331
Improved optimisation method using genetic algorithms for mass transit signalling block-layout design **EPA** p266
Improved self-imaging characteristics in 1×N multimode couplers **OPT** p65
Incorporation of a UPFC model in an optimal power flow using Newton's method **GTD** p336
Independent component analysis: source assessment and separation, a Bayesian approach **VIS** p149
Inherent structure theory of networks and power system harmonics **GTD** p123
Investigation of a new AC electrical machine winding **EPA** p125
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems **CTA** p491
Logic synthesis for a fine-grain FPGA **CDT** p47
Long-term hydrothermal scheduling using composite thermal and composite hydro representations **GTD** p210
Look-ahead reservation-based scheduling for input-output buffered ATM switch **COM** p234
Low-distortion variable-level PWM technique **EPA** p73
Lower bound for multimedia multicast routing **COM** p87
Markov random field regularisation models for adaptive binarisation of nonuniform images **VIS** p322
Measurements and prediction model optimisation for signal attenuation in vegetation media at centimetre wave frequencies **MAP** p201
Method of constructing Lyapunov functions for linear discrete time systems **CTA** p83
Mini-max control of cross-directional variations on a paper machine **CTA** p189
Minimax design of two-channel nonuniform-division FIR filter banks **VIS** p88
Model reduction of 2-D separable-denominator transfer functions via quasi-Kalman decomposition **CDS** p13
Modelling a positive lightning downward leader to study its effects on engineering systems **GTD** p395
Modified feasible method for hierarchical steady-state control of complex systems **CTA** p603
Multi-area unit commitment for large-scale power systems **GTD** p415
Multiresolution and hybrid Bayesian algorithms for automatic detection of change points **VIS** p280
Mutual conversions between generalised arithmetic expansions and free binary decision diagrams **CDS** p219
Neurocontroller for buffer overload control in a packet switch **COM** p227
New multi-objective stochastic search technique for economic load dispatch **GTD** p747
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions **SMT** p67

Noise performance analysis of bipolar operational amplifier based on the noise matrix superposition expression **CDS** p343
Numerical computation of complex image Green's functions for multilayer dielectric media: near-field zone and the interface region **MAP** p449
Numerical optimisation of slot parameters for a concentric array radial line slot antenna **MAP** p141
Numerical simulation of electromagnetic vibration of small induction motors **EPA** p528
Optimal controller design for nonlinear systems **CTA** p97
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal segmentation of cell images **VIS** p50
Optimal weight assessment based on a range of objectives in a multiobjective optimal load flow study **GTD** p65
Optimisation approach to power restoration in steel mills **EPA** p607
Optimisation of empirical model for IC fabrication process using linear programming **SMT** p58
Optimisation of synthesised array excitations using array polynome complex root swapping and genetic algorithms **MAP** p460
Optimising 1550 nm InGaAsP strain compensated MQW lasers close to the miscibility gap **OPT** p7
Optimising indoor base-station locations in coverage- and interference-limited indoor environments **COM** p445
P pattern recognition based on a probabilistic RAM net using n-tuple input mapping **VIS** p415
Parallel optimal statistical design method with response surface modelling using genetic algorithms **CDS** p7
Parameter identification of induction motor model using genetic algorithms **CTA** p587
Performance analysis of ETDGE–an efficient and unbiased TDOA estimator **RSN** p325
Performance of the progressive numerical method and its comparison with the modified spatial decomposition technique in solving large scattering problems **MAP** p169
PLiNC algorithm: pattern location in noisy contexts **VIS** p109
Possibilistic-diagnosis theory for fault-section estimation and state identification of unobserved protective relays using tabu-search method **GTD** p722
Practical application of evolutionary computing to reactive power planning **GTD** p753
Properties of risk-sensitive filters/estimators **CTA** p106
Protection co-ordination: determination of the break point set **GTD** p717
Quantitative assessment of experimental repeatability **SMT** p177
Quasistatic capacitance and frequency-dependent effective permittivity of multilayer microstrip patch antennas **MAP** p75
Reactive power optimisation using an analytic hierarchical process and a nonlinear optimisation neural network approach **GTD** p89
Recursive order-statistic soft morphological filters **VIS** p333
Recursive relations and fast flow diagram for nonlinear quantised transform **CDT** p97
Reduction of harmonic currents generated by discharge lamp systems **GTD** p363
Reflection and transmission coefficients for thin bianisotropic layers **MAP** p163
Restoration of images contaminated by mixed Gaussian and impulse noise using a recursive minimum-maximum method **VIS** p264
Robust algorithm for load estimation in distribution networks **GTD** p499
Robust and H_∞ stabilisation of interconnected systems with delays **CTA** p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies **CTA** p531
Robust control of sampled data systems **CTA** p236
Robust sequential detectors employing an order statistic prefilter **VIS** p82
Rotor design optimisation of a multi-layer interior permanent-magnet synchronous motor **EPA** p119
Scan loop control design for a spin-stabilised seeker **CTA** p119
Scheduling of radio-controlled heating load **GTD** p641
Secondary voltage control: nonlinear selection of pilot buses, design of an optimal control law, and simulation results **GTD** p77
Segmental probability distribution model approach for isolated Mandarin syllable recognition **VIS** p384
Selection of multi-h modulation sets using a stochastic search algorithm **COM** p41
Sensitivity analysis for transient stability studies **GTD** p669
Shortest paths in regular grids **CDS** p289
Simulation of electromagnetic drive systems using graph theory **EPA** p393
Spot size expansion for improved OEIC-to-fibre coupling using directional couplers with 2D confinement **OPT** p71
Statistical coding method for facial features **VIS** p187
Status monitoring in flexible manipulators **CTA** p537
Steady-state model of direct connected generator-HVDC converter units in the harmonic domain **GTD** p559
Stochastic multiobjective generation dispatch of combined heat and power systems **GTD** p583
Synthesis of MVL functions using input and output assignments **CDS** p207
Systolic arrays for the Haar transform **CDT** p403
Tabu search based approach to trouble call analysis [in LV power distribution] **GTD** p731
TE/TM decomposition of electromagnetic sources in a nonreciprocal anisotropic medium **MAP** p109
Technical and economical optimisation of overhead power distribution line lightning protection **GTD** p239
Theoretical spectra of space-vector-modulated waveforms **EPA** p17
Three-dimensional reconstruction algorithm for electrical resistance tomography **SMT** p85
Time-domain model for multiconductor power transmission lines **GTD** p473
Time-varying spectral analysis for radar imaging of manoeuvring targets **RSN** p262
TM/TE modal solutions for submicron lossy metal-clad optical fibres **OPT** p171
Towards the formalisation of soft systems models using Petri net theory **CTA** p463(5)
Transmission system expansion planning by an extended genetic algorithm **GTD** p329
Unit commitment by tabu search **GTD** p56
Use of Coifman intervallic wavelets in 2-D and 3-D scattering problems **MAP** p471
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia **SMT** p307
Validation of a clustering algorithm for voltage stability analysis on the Bosnian electric power system **GTD** p21
Value sets of polynomial families with coefficients depending nonlinearly on perturbed parameters **CTA** p73
Weighted-norm approach for multiobjective VAr planning **GTD** p369

MEASUREMENT OF SPECIFIC VARIABLES

3.5 mm coaxial power standard **SMT** p159
Acoustic fields from PVDF interdigital transducers **SMT** p250
Analysis of a frequency estimator for a class of laser signals with time-varying amplitude **RSN** p109
Cardiac left ventricular volume changes assessment by long axis echocardiographical image processing **VIS** p203
Closed-loop silicon accelerometers **CDS** p325
Electric field analysis for a static induction type of voltage sensor in three-phase power distribution systems **GTD** p437
Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field **SMT** p20
Extended UK models for high frequency spectral occupancy **COM** p168
Flammable gas sensors based on sol-gel materials **CDS** p379
Heat transfer in a through-ventilated induction motor **EPA** p429
High sensitivity precision relative intensity noise calibration standard using low noise reference laser source **SMT** p163
Improved recursive Newton-type algorithm for power system relaying and measurement **GTD** p15
Low permeability reference standards with improved high magnetic field strength performance **SMT** p181
Measurements of grounding resistances for high impulse currents **GTD** p693
Measurements of power system voltages using remote electric field monitoring **GTD** p217
Measurements of the temperature dependence of the output voltages of some Zener diode based voltage standards **SMT** p154
Measurements on an ensemble of spheres in the transonic velocity regime **SMT** p8
Micromachined silicon thermopile and thermal radiators using porous silicon technology **OPT** p307
Online leakage current monitoring of 400 kV insulator strings in polluted areas [reply] **GTD** p480
Parasitic losses in modular permanent-magnet generators **EPA** p485
Performance limit of fibre-optic gas sensors from coherent backscatter **OPT** p186
Portable optoelectronic instrument for measuring furfuraldehyde in transformer oil **SMT** p45
Pressure sensors interfacing circuit with digital output **CDS** p332
Processing time-correlated single photon counting data to acquire range images **VIS** p237
Testing of analogue and mixed-signal circuits by using supply current measurements **CDS** p319
Three-dimensional reconstruction algorithm for electrical resistance tomography **SMT** p85
Toroidal inductively coupled superconducting fault current limiter with interleaved windings **EPA** p593

MEASUREMENT SCIENCE

3.5 mm coaxial power standard **SMT** p159
High sensitivity precision relative intensity noise calibration standard using low noise reference laser source **SMT** p163
Laser-video scanner calibration without the use of a frame store **VIS** p244
Low permeability reference standards with improved high magnetic field strength performance **SMT** p181
Measurements of the temperature dependence of the output voltages of some Zener diode based voltage standards **SMT** p154
Over-the-horizon radar array calibration using echoes from ionised meteor trails **RSN** p173
Polarimetric calibration for wideband synthetic aperture radar imaging **RSN** p275
Quantitative assessment of experimental repeatability **SMT** p177

MICROWAVE CIRCUITS

High-performance transimpedance formulation for MESFET- and HBT-based monolithic microwave integrated circuits **CDS** p429
Intermodulation distortion in active microwave filters **MAP** p7
Lead zirconate titanate thin films for microwave device applications **CDS** p373
Low noise SIS receiver performance using Pb alloy tunnel junctions **MAP** p375
Measurements on millimetre wave circuits at 140 GHz **SMT** p171
Multidimensional signal-noise neural network model **CDS** p111
Novel low-cost, low-power modulator/demodulator using a single GaAs field effect transistor **CDS** p165
Performance of active antenna oscillator arrays under modulation for communication systems **MAP** p313
Power amplifier module combined with duplexer CDMA-based PCS phone **MAP** p486
Smith chart formulation of performance characterisation for a microwave transistor **CDS** p419

MICROWAVE MEASUREMENT TECHNIQUES

3.5 mm coaxial power standard **SMT** p159
Detection of submillimetre wave radiation of a target using a high Tc superconducting detector **MAP** p190
Measurements on millimetre wave circuits at 140 GHz **SMT** p171

MICROWAVE TECHNOLOGY

Semiconductor laser sources for the generation of millimetre-wave signals **OPT** p159

MILITARY SYSTEMS

Scan loop control design for a spin-stabilised seeker **CTA** p119

MODULATION

Adaptive MLSE of QAM signals over frequency nonselective Rayleigh fading channels **COM** p426
Analysis of DPSK nonlinear combiner over fading channels with impulse noise **COM** p406
Dispersion compensation in a 10 Gbit/s IM/DD semiconductor laser system in an NRZ scheme **OPT** p47

Diversity combining with MLSE equalisation **COM** p105
Effects of carrier heating, nonequilibrium LO phonons and lattice heating on small-signal modulation response of semiconductor lasers **OPT** p13
Estimating time-varying noise introduced by CVSD for speech enhancement **VIS** p23
FFT-based self-normalising receiver for FFH spread spectrum systems **COM** p99
Impact of apodised linearly chirped fibre gratings on the performance of dispersion-limited subcarrier systems **OPT** p117
Microwave-optoelectronic modelling approaches for semiconductor lasers **OPT** p141
Modelling pulse propagation in semiconductor optical amplifiers using wavelets **OPT** p88
Normal-incidence TE intersub-band transitions **OPT** p21
Performance analysis of an FFH/BFSK self-normalising receiver under multitone jamming **COM** p431
Performance of active antenna oscillator arrays under modulation for communication systems **MAP** p313
Signal identification by orthogonal transforms **RSN** p145
Transmission modelling of ENCAP-OQPSK radio links **COM** p419

MODULATORS AND DEMODULATORS

Low noise SIS receiver performance using Pb alloy tunnel junctions **MAP** p375
Novel low-cost, low-power modulator/demodulator using a single GaAs field effect transistor **CDS** p165

MULTIMEDIA

Lower bound for multimedia multicast routing **COM** p87
Multimedia transport in multihop wireless networks **COM** p342
Reservation arbitrated access for efficient service integration over dual-bus metropolitan area networks **COM** p347
Software architecture for adaptive distributed multimedia systems **SEN** p163

MULTIPROCESSOR SYSTEMS

Generalised model for Banyan networks with nonuniform traffic **CDT** p225
Hardware-supported asynchronous checkpointing scheme **CDT** p109
Image component labelling on the star graph using divide and conquer **CDT** p9
Mapping finite element grids onto parallel multicomputers using a self-organising map **CDT** p211
Parallel-in-time relaxed Newton method for transient stability analysis **GTD** p155
Parallelism exploitation in superscalar multiprocessing **CDT** p255
Software tool combining fault masking with user-defined recovery strategies **SEN** p203
SPARC-based VLIW testbed **CDT** p215
Static security analysis using pipeline decomposition **GTD** p105
Using two-level stable storage for efficient checkpointing **SEN** p198

MULTIVARIABLE CONTROL SYSTEMS

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives **CTA** p63
Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Closed-loop control system robustness improvement by a parameterised state feedback **CTA** p33
Constrained multivariable cautious stable predictive control **CTA** p385(5)
Control of an EV drive with reduced unsprung mass **EPA** p600
Cyclic control of linear systems with application to a flexible arm **CTA** p19
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Design of a sliding mode controller with fuzzy sliding surfaces **CTA** p411(5)
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Design of reduced-order observer-based variable structure power system stabiliser for unmeasurable state variables **GTD** p525
Distributed state observer scheme for large-scale interconnected systems **CTA** p331
Excitation control system for use with synchronous generators **GTD** p537
Global exponential stabilisation for nonlinear singularly perturbed systems **CTA** p377(4)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances **CTA** p435(4)
Input and output scaling and reordering for diagonal dominance and block diagonal dominance **CTA** p523
Integrated approach to eigenstructure assignment by output feedback: the case of multiple eigenvalues **CTA** p265
Introduction to a special coordinate basis for multivariable linear systems **CTA** p204
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)
Mini-max control of cross-directional variations on a paper machine **CTA** p189
Modified feasible method for hierarchical steady-state control of complex systems **CTA** p603
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems **CTA** p241
Neural servocontroller for nonlinear MIMO plant **CTA** p277
Nonminimal state space approach to multivariable ramp metering control of motorway bottlenecks **CTA** p568
Novel control design for the buck converter **EPA** p39
Position control of a vector controlled induction machine using Slotine's sliding mode control approach **EPA** p231
Robust and H_∞ stabilisation of interconnected systems with delays **CTA** p559
Robust decentralised control design using genetic algorithms in power system damping control **GTD** p1
Robust Lyapunov control with perturbation estimation **CTA** p307
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
Sliding-mode control for current distribution in parallel-connected DC-DC converters **EPA** p333
SMC-based adaptive input-output linearising control of induction motors **CTA** p55
Variable structure control of UPS inverters **EPA** p559

NETWORK ANALYSIS

Development of efficient switched network and mixed-mode simulators **CDS** p24
Efficient digital sweep oscillator with extremely low sweep rates **CDS** p409
Feasible designs for high order switched-current filters **CDS** p297
Generalised TLM switch model for power electronics applications **SMT** p101
Ladder decompositions for wideband SI filter applications **CDS** p306
Passive lossless snubbers for DC/DC converters **CDS** p396
S^2I first-order incremental A/D converter **CDS** p78

NEURAL NETS

A posteriori real-time recurrent learning schemes for a recurrent neural network based nonlinear predictor **VIS** p365
Adaptive H_∞ neural network tracking controller for electrically driven manipulators **CTA** p594
Adaptive protection strategies for detecting power system out-of-step conditions using neural networks **GTD** p387
Analysis of radix searching of exponential bidirectional associative memory **CDT** p279
Application of self-organising neural networks in robot tracking control **CTA** p135
Bandwidth allocation of virtual paths using neural-network-based genetic algorithms **COM** p33
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives **CTA** p197
Earth-return path impedances of underground cables. II. Evaluations using neural networks **GTD** p627
Evaluating software development effort model-building techniques for application in a real-time telecommunications environment **SEN** p29
Fault synthetic recognition for an EHV transmission line using a group of neural networks with a time-space property **GTD** p265
Feasibility of employing artificial neural networks for emergent crop monitoring in SAR systems **RSN** p291
Fuzzy neural systems for controlling sound localisation in stereophonic reproduction **CTA** p393(4)
Hardware implementation of a pulse-stream neural network **CDS** p141
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Identification of inter-ictal spikes in the EEG using neural network analysis **SMT** p270
Intelligent control for handling motion nonlinearity in a retrofitted machining table **CTA** p403(4)
Mapping finite element grids onto parallel multicomputers using a self-organising map **CDT** p211
Monitoring and assessment of voltage stability margins using artificial neural networks with a reduced input set **GTD** p355
Multidimensional signal-noise neural network model **CDS** p111
Multiple-page-mapping backpropagation neural network for constant tension control **EPA** p239
Neural network α-th order inverse system method for the control of nonlinear continuous systems **CTA** p519
Neural servocontroller for nonlinear MIMO plant **CTA** p277
Neurocontroller for buffer overload control in a packet switch **COM** p227
Online process estimation by ANNs and Smith controller design **CTA** p231
P pattern recognition based on a probabilistic RAM net using n-tuple input mapping **VIS** p415
Parallel self-organising hierarchical neural network-based fast voltage estimation **GTD** p98
Practical implementation of a hybrid fuzzy neural network for one-day-ahead load forecasting **GTD** p687
Reactive power optimisation using an analytic hierarchical process and a nonlinear optimisation neural network approach **GTD** p89
Recurrent networks for nonlinear adaptive control **CTA** p177
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems **CTA** p41
SMC-based adaptive input-output linearising control of induction motors **CTA** p55
Ultrasonic motor servo-drive with online trained neural-network model-following controller **EPA** p105
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia **SMT** p307

NONELECTRIC VARIABLES CONTROL

Acceleration feedforward control for active magnetic bearing systems excited by ground motion **CTA** p113
Analysis, design and control of a novel spherical permanent-magnet actuator **EPA** p61
Application of adaptive dual controllers to a DC-motor **CTA** p299
Asymptotically stable adaptive load torque observer for precision position control of BLDC motor **EPA** p383
Composite adaptive position controller for induction motor using feedback linearisation **CTA** p25
Control of an EV drive with reduced unsprung mass **EPA** p600
Control of single-link flexible beam using Hankel-norm-based reduced-order model **CTA** p151
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives **CTA** p197
Design of a hydraulic force control system using a generalised predictive control algorithm **CTA** p428(5)
Design of a sliding mode controller with fuzzy sliding surfaces **CTA** p411(5)
Electrodynamic braking of wind turbines **EPA** p140
Experimental validation of 5 kN model electromagnetic vibration damper and design of a real-size 120 kN machine **EPA** p185
Flux and torque control of switched reluctance machines **EPA** p519
Fuzzy neural systems for controlling sound localisation in stereophonic reproduction **CTA** p393(4)
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Longitudinal control with time delay in platooning **CTA** p211
Multiple-page-mapping backpropagation neural network for constant tension control **EPA** p239
Observer-based speed estimation method for sensorless vector control of induction motors **CTA** p359
Position control of a vector controlled induction machine using Slotine's sliding mode control approach **EPA** p231
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
Robust position/force control of robot manipulators during constrained tasks **CTA** p427(4)
Scheduling of radio-controlled heating load **GTD** p641

Simulation approach and causality evaluation for an active noise control system **CTA** p423(4)
Slider-crank mechanism control using adaptive computed torque technique **CTA** p364
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180
State-space solution of the standard H_∞ control problem for strip mill gauge control **CTA** p291

NONLINEAR CONTROL SYSTEMS

Adaptive H_∞ neural network tracking controller for electrically driven manipulators **CTA** p594
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems **CTA** p575
Design of a hydraulic force control system using a generalised predictive control algorithm **CTA** p428(5)
Design of a sliding mode controller with fuzzy sliding surfaces **CTA** p411(5)
Excitation control system for use with synchronous generators **GTD** p537
Fuzzy logic based unified power flow controllers for transient stability improvement **GTD** p225
Global exponential stabilisation for nonlinear singularly perturbed systems **CTA** p377(4)
Minimal state-space model realisation of a nonlinear helicopter **CTA** p415(4)
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems **CTA** p241
Neural network α-th order inverse system method for the control of nonlinear continuous systems **CTA** p519
Neural servocontroller for nonlinear MIMO plant **CTA** p277
Nonlinear control of a large-gap 2-DOF magnetic bearing system based on a coupled force model **CTA** p269
Nonlinear robust controller for a class of nonlinear uncertain systems **CTA** p405(5)
Optimal controller design for nonlinear systems **CTA** p97
Recurrent networks for nonlinear adaptive control **CTA** p177
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances **CTA** p323
Robust Lyapunov control with perturbation estimation **CTA** p307
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
SMC-based adaptive input-output linearising control of induction motors **CTA** p55

NONLINEAR NETWORK ANALYSIS

Chaos in ferroresonant wound voltage transformers: effect of core losses and universal circuit behaviour **SMT** p39
Combined EM field/linear and nonlinear circuit simulation using the FDTD method **MAP** p185
Intermodulation distortion in active microwave filters **MAP** p7
Modelling nonlinear and dispersive propagation problems by using the TLM method **MAP** p193
State variable synthesis of single resistance controlled grounded capacitor oscillators using only two CFOAs **CDS** p135

NONLINEAR OPTICS

All-optical integrated optic devices: a hybrid approach **OPT** p227
Analysis of operating characteristics of TOADs using gain saturation and nonlinear gain in SOAs **OPT** p83
Dispersion compensation in a 10 Gbit/s IM/DD semiconductor laser system in an NRZ scheme **OPT** p47
Modelling of semiconductor laser amplifier for the terahertz optical asymmetric demultiplexer **CDS** p61
Optical switch design for true time delay array antenna **OPT** p77
Output power saturation characteristics of the CW-operated semiconductor Raman laser **OPT** p243
Polarisation modulation dynamics of birefringent vertical cavity surface emitting lasers **OPT** p31
Technique for modelling propagation of ultrashort pulses with an arbitrary waveform in lossy nonlinear optical fibres **OPT** p179

NUMERICAL ANALYSIS

Accelerant method for Green's function of horizontal dipole in parallel plate waveguide **MAP** p430
Adaptive detection algorithm for radar signals in autoregressive interference **RSN** p309
Adaptive Volterra channel equalisation with lattice orthogonalisation **COM** p109
Analysis and realisation of low-cost damped screened rooms **SMT** p1
Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements **SMT** p117
Analysis of IGBT modules connected in series **CDS** p354
Analysis of interpolation waveforms in time-averaging interpolative digital-to-analogue converters **CDS** p389
Analysis of mutual coupling in a cavity-backed coaxial array of annular-slot antennas **MAP** p427
Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Analysis of the far-field pattern of an optical waveguide array using the finite-difference beam-propagation method **MAP** p175
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems **CTA** p575
Application of self-organising neural networks in robot tracking control **CTA** p135
Asymptotic approximation of some integrals involved in EFIE solutions using the method of moments **MAP** p361
Asymptotic boundary condition for corrugated surfaces, and its application to scattering from circular cylinders with dielectric filled corrugations **MAP** p116
Attack operators for digitally watermarked images **VIS** p271
Autofocusing of SAR images based on the product high-order ambiguity function **RSN** p269
Branch cut integration method for computing signal propagation through dispersive media **RSN** p142
Cardiac left ventricular volume changes assessment by long axis echocardiographical image processing **VIS** p203
Characteristics of quad-ridged coaxial waveguides for dual-band horn applications **MAP** p225
Chirp z-transform based SPECAN approach for phase-preserving ScanSAR image generation **RSN** p254
Circular neighbourhood and 1-D DFT features for texture classification and segmentation **VIS** p167
Circularly polarised wire antenna with a dual rhombic loop **MAP** p219
Circulating-current loss in transformer windings **SMT** p136
Combined EM field/linear and nonlinear circuit simulation using the FDTD method **MAP** p185
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement **SMT** p61
Comparison of methods for harmonic wavelet analysis of heart rate variability **SMT** p291
Complexity-constrained best-basis wavelet packet algorithm for image compression **VIS** p391
Computer-aided analysis and design of optical structures based on novel directional couplers **OPT** p99
Control of microstrip antenna radiation characteristics by ground plane size and shape **MAP** p207
CPW-fed slot antenna with wide radiating apertures **MAP** p104
Data compression, data fusion and Kalman filtering in wavelet packet sub-bands of a multisensor tracking system **RSN** p100
Design and experimental characterisation of a linear reciprocating generator **EPA** p509
Design considerations for permanent magnet synchronous motors for flux weakening applications **EPA** p435
Design for the discrete cosine transform in VLSI **CDT** p127
Design of a basic cell to construct embryonic arrays **CDT** p242
Design of corner reflector antennas using FDTD **MAP** p481
Design optimisation of electric motors by genetic algorithms **EPA** p475
Earth-return path impedances of underground cables. I. Numerical integration of infinite integrals **GTD** p621
Earth-return path impedances of underground cables. II. Evaluations using neural networks **GTD** p627
Effects of nonzero bandwidth on direction of arrival estimators in array signal processing **RSN** p317
Efficient algorithm and architecture for scan conversion in HDTV **CDT** p287
Efficient numerical method for the discrete-time symmetric matrix polynomial equation **CTA** p443(5)
Efficient simulation of microstrip circuits using adapted wavelets **MAP** p354
Electric field analysis for a static induction type of voltage sensor in three-phase power distribution systems **GTD** p437
Electromagnetic transient simulation of power systems using root-matching techniques **GTD** p481
Electronically-operated, linear, variable-reluctance, integrating, reversible actuator (ELVIRA)–a novel, low-cost, normal-force, tilting friction drive **EPA** p11
EM models for evaluating rain perturbation on the NRCS of the sea surface observed near nadir **RSN** p226
Error-sensitivity assessment of vision algorithms **VIS** p124
Failure detection approach applying to GPS autonomous integrity monitoring **RSN** p342
Family of generalised multi-polarity complex Hadamard transforms **VIS** p371
Fast codeword search technique for the encoding of variable-rate vector quantisers **VIS** p103
Fast computation of the nonsymmetrical components of the Green's function for multilayer media using complex images **MAP** p285
Fast search algorithm for tolerance design **CDS** p19
FDTD analysis of EM wave circulated by a magnetised ferrite body of arbitrary shape **MAP** p433
Features of creeping waves propagation on the dielectric-coated circular cylinder **MAP** p179
FFT-based self-normalising receiver for FFH spread spectrum systems **COM** p99
Field theory based design and comparison of two kinds of quasi-planar bandpass filters **MAP** p441
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters **SMT** p129
Gain/loss characterisation of optical waveguide and semiconductor laser structures **OPT** p93
General entire-domain Galerkin method for analysis of wire antennas in the presence of dielectric bodies **MAP** p13
General large-signal charge-control equations for the MOSFET drain and source current under nonquasistatic conditions **CDS** p236
Generalised inverses in public key cryptosystem design **CDT** p321
Hybrid finite element solution of a quadrupole gyromagnetic waveguide **MAP** p128
Impact of high-speed railway loads on a longitudinal power system **EPA** p261
Improved recursive Newton-type algorithm for power system relaying and measurement **GTD** p15
Improved three-phase load flow using phase and sequence components **GTD** p245
Incomplete locator polynomials and redundant iterations reduction in the Welch-Berlekamp algorithm **COM** p402
Incorporation of a UPFC model in an optimal power flow using Newton's method **GTD** p336
Inductance computation for coplanar waveguide discontinuities with finite metallisation thickness **MAP** p496
Influence of rotor skew on cage motor losses **EPA** p414
Inherent structure theory of networks and power system harmonics **GTD** p123
Interrelated problems in space-time processing for SAR and ISAR **RSN** p297
Iterative MAP decoding for serial concatenated convolutional codes **COM** p53
Large-domain integral-equation method for analysis of general 3 D electromagnetic structures **MAP** p491
Linear prediction analysis of speech signals in the presence of white Gaussian noise with unknown variance **VIS** p303
Loss and current distribution in foil windings of transformers **GTD** p709
Mapping finite element grids onto parallel multicomputers using a self-organising map **CDT** p211
Meander-line grid-array antenna **MAP** p309
Microstripline- and stripline-fed aperture-coupled cylindrical rectangular microstrip antennas **MAP** p257
Modal analysis at the junction formed by a circular or an elliptic waveguide and a translated and rotated elliptic waveguide **MAP** p501
Mode-matching analysis of a waveguide junction formed by a circular and a larger elliptic waveguide **MAP** p123
Multiresolution and hybrid Bayesian algorithms for automatic detection of change points **VIS** p280
Mutual coupling compensation in small planar array antennas **MAP** p1
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions **SMT** p67
NF-FF transformation with cylindrical scanning: an effective technique for elongated antennas **MAP** p369
Noise analysis of digitised FMCW radar waveforms **RSN** p209
Numerical analysis of honeycomb antennas with an electromagnetic coupling feed system **MAP** p99

Numerical comparison of techniques for estimating Doppler velocity time series from coherent sea surface scattering measurements **RSN** p367
Numerical computation of complex image Green's functions for multilayer dielectric media: near-field zone and the interface region **MAP** p449
Numerical simulation of electromagnetic vibration of small induction motors **EPA** p528
Optimal segmentation of cell images **VIS** p50
Parallel-in-time relaxed Newton method for transient stability analysis **GTD** p155
Parallel optimal statistical design method with response surface modelling using genetic algorithms **CDS** p7
Parallelising a set of 2-D frequency transforms in a flexible manner **VIS** p65
Performance analysis of ETDGE–an efficient and unbiased TDOA estimator **RSN** p325
Performance of shaped beam quadrifilar antennas on the METOP spacecraft **MAP** p19
Performance of the progressive numerical method and its comparison with the modified spatial decomposition technique in solving large scattering problems **MAP** p169
Polarimetric calibration for wideband synthetic aperture radar imaging **RSN** p275
Power synthesis of reconfigurable conformal arrays with phase-only control **MAP** p131
Procedure for analysis of microstrip patch antennas using the method of moments **MAP** p455
Properties of estimability criteria for target motion analysis **RSN** p92
Reflection and transmission coefficients for thin bianisotropic layers **MAP** p163
Reliable tracking of facial features in semantic-based video coding **VIS** p257
Reservation arbitrated access for efficient service integration over dual-bus metropolitan area networks **COM** p347
Robust algorithm for load estimation in distribution networks **GTD** p499
Root moments: a digital signal-processing perspective **VIS** p293
Short-time Fourier and wavelet transforms for fault detection in power transformers during impulse tests **SMT** p77
Sidewall inclined slot in a rectangular waveguide: theory and experiment **MAP** p233
Simple equivalent circuit for the series-loaded resonant converter with voltage boosting capacitor **EPA** p301
Space translation properties and the minimum-BER linear-combiner DFE **COM** p316
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180
Spot size expansion for improved OEIC-to-fibre coupling using directional couplers with 2D confinement **OPT** p71
Square spiral antenna on dielectric half-space: analysis using an electric field equation formulated by a finite-difference technique **MAP** p70
Systolic dual basis serial multiplier **CDT** p237
TE/TM decomposition of electromagnetic sources in a nonreciprocal anisotropic medium **MAP** p109
Teletraffic analysis of an integrated satellite/terrestrial mobile radio system based on nongeostationary satellites **COM** p378
Theoretical analysis of ridge-loaded ring-plane slow wave structure by variational methods **MAP** p397
Three-dimensional reconstruction algorithm for electrical resistance tomography **SMT** p85
Time domain calculation of the parameters of thin wire antennas and scatterers in a half-space configuration **MAP** p57
Time-domain fault diagnosis of analogue circuits in the presence of noise **CDS** p125
Time-varying spectral analysis for radar imaging of manoeuvring targets **RSN** p262
TM/TE modal solutions for submicron lossy metal-clad optical fibres **OPT** p171
Tracking ill-conditioning for the RLS-lattice algorithms **VIS** p1
Transfer functions of lumped distributed multibranch networks **MAP** p279
Triangular-patch model of bowtie antennas: validation against Brown and Woodward **MAP** p465
Undervoltage load shedding to avoid voltage instability **GTD** p175
Use of Coifman intervallic wavelets in 2-D and 3-D scattering problems **MAP** p471
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems **SMT** p31
Validation of a clustering algorithm for voltage stability analysis on the Bosnian electric power system **GTD** p21
Voltage-current definition of impedance of double ridge waveguide using the finite element method **MAP** p39

OPTICAL BEAM MODULATORS

Broadband and low driving-voltage $LiNbO_3$ optical modulators **OPT** p360
Comparison of operation parameters between binary and analogue switching pixellated light valves **OPT** p236
Computer-aided analysis and design of optical structures based on novel directional couplers **OPT** p99
Design of externally tuned asymmetric fibre Fabry-Perot electroabsorption optical modulators **OPT** p344
Normal-incidence TE intersub-band transitions **OPT** p21
Tandem of electroabsorption modulators integrated with a DFB laser and an optical amplifier for short optical pulse generation and coding **OPT** p198

OPTICAL COMMUNICATION

All-optical integrated optic devices: a hybrid approach **OPT** p227
Analysis of operating characteristics of TOADs using gain saturation and nonlinear gain in SOAs **OPT** p83
Dispersion compensation in a 10 Gbit/s IM/DD semiconductor laser system in an NRZ scheme **OPT** p47
Dispersion in chiral optical fibres **OPT** p155
Experimental characterisation and modelling of the reflection of infrared signals on indoor surfaces **OPT** p191
Improved self-imaging characteristics in 1×N multimode couplers **OPT** p65
Intensity and frequency noise transmission along single-mode fibre at zero-dispersion wavelength **OPT** p211
Modelling of a pump-power-loss-controlled gain-locking system for EDFA application in WDM transmission systems **OPT** p205
Modelling of semiconductor laser amplifier for the terahertz optical asymmetric demultiplexer **CDS** p61
Optical switch design for true time delay array antenna **OPT** p77
Raman amplification in GaP-$Al_xGa_{1-x}P$ waveguides for light frequency discrimination **OPT** p105
Spot size expansion for improved OEIC-to-fibre coupling using directional couplers with 2D confinement **OPT** p71
Tandem of electroabsorption modulators integrated with a DFB laser and an optical amplifier for short optical pulse generation and coding **OPT** p198

OPTICAL IMAGE PROCESSING

Adaptive block matching algorithm for video compression **VIS** p173
All-optical integrated optic devices: a hybrid approach **OPT** p227
Analysis of a frequency estimator for a class of laser signals with time-varying amplitude **RSN** p109
Attack operators for digitally watermarked images **VIS** p271
Cardiac left ventricular volume changes assessment by long axis echocardiographical image processing **VIS** p203
Circular neighbourhood and 1-D DFT features for texture classification and segmentation **VIS** p167
Classification of sets of mixed pixels with the hypothesis-testing Hough transform **VIS** p57
Coding for coherent optical CDMA networks **COM** p117
Comparison of operation parameters between binary and analogue switching pixellated light valves **OPT** p236
Complexity-constrained best-basis wavelet packet algorithm for image compression **VIS** p391
Continuous n-tuple classifier and its application to real-time face recognition **VIS** p343
Continuous quality assessment of digitally-coded television pictures **VIS** p116
Deconvolution problem to produce ultrasonic short pulses **SMT** p317
Deformable model of the human iris for measuring ocular torsion from video images **VIS** p213
Design for the discrete cosine transform in VLSI **CDT** p127
Edge operator error estimation incorporating measurements of CCD TV camera transfer function **VIS** p229
Efficient multispectral texture segmentation using multivariate statistics **VIS** p357
Electromagnetic inductance tomography (EMT): sensor, electronics and image reconstruction algorithm for a system with a rotatable parallel excitation field **SMT** p20
Error-sensitivity assessment of vision algorithms **VIS** p124
Evaluation of reconstruction quality in image vector quantisation using existing and new measures **VIS** p349
Feasibility of employing artificial neural networks for emergent crop monitoring in SAR systems **RSN** p291
Feature-directed spiral coding of magnetic resonance images **VIS** p131
Fuzzy soft mathematical morphology **VIS** p41
Image component labelling on the star graph using divide and conquer **CDT** p9
Improved azimuthal resolution of forward looking SAR by sophisticated antenna illumination function design **RSN** p128
Joint quantisation and error diffusion of colour images using competitive learning **VIS** p137
Laser-video scanner calibration without the use of a frame store **VIS** p244
Markov random field regularisation models for adaptive binarisation of nonuniform images **VIS** p322
New windowing techniques for variable-size block motion compensation **VIS** p399
Novel approach to automated fingerprint recognition **VIS** p160
Novel scheme for low-power classified vector quantisation image coding **VIS** p408
Optimal segmentation of cell images **VIS** p50
Parallelising a set of 2-D frequency transforms in a flexible manner **VIS** p65
PLiNC algorithm: pattern location in noisy contexts **VIS** p109
Processing time-correlated single photon counting data to acquire range images **VIS** p237
Quality-optimised MPEG2 video data rate control using fuzzy logic techniques **VIS** p179
Rate-distortion analysis of nonlinear quantisers for MPEG video coders: sigmoidal and unimodal quantiser control functions **VIS** p249
Realisation of soft morphological filters **CDS** p201
Reliable tracking of facial features in semantic-based video coding **VIS** p257
Restoration of images contaminated by mixed Gaussian and impulse noise using a recursive minimum-maximum method **VIS** p264
Statistical coding method for facial features **VIS** p187
TABS: script-based software framework for research in image processing, analysis and understanding **VIS** p194
Three-dimensional reconstruction algorithm for electrical resistance tomography **SMT** p85
Two-dimensional ISAR imaging using full polarisation and super-resolution processing techniques **RSN** p240
Two pixel-preselection methods for median-type filtering **VIS** p30

OPTICAL LINKS AND EQUIPMENT

Adaptive bandwidth for satellite optical communication **OPT** p109
Analysis of the far-field pattern of an optical waveguide array using the finite-difference beam-propagation method **MAP** p175
BER caused by jitter and amplitude noise in limiting optoelectronic repeaters with excess bandwidth **OPT** p147
Clipping noise effects on the performance of digital baseband signal in lightwave hybrid digital and analogue transmission systems **OPT** p335
Coding for coherent optical CDMA networks **COM** p117
Impact of apodised linearly chirped fibre gratings on the performance of dispersion-limited subcarrier systems **OPT** p117
Performance analysis of optical orthogonal codes in CDMA LANs **COM** p265

OPTICAL MATERIALS AND DEVICES

All-optical integrated optic devices: a hybrid approach **OPT** p227
Analysis of multiple-rib waveguide structures by the discrete-spectral-index method **OPT** p365
Analysis of the far-field pattern of an optical waveguide array using the finite-difference beam-propagation method **MAP** p175
BER caused by jitter and amplitude noise in limiting optoelectronic repeaters with excess bandwidth **OPT** p147
Calculation of optical power emitted from a fibre grating laser **OPT** p319
Characterisation of waveguide microcavities using high-resolution transmission spectroscopy and near-field scanning optical microscopy **OPT** p379
Comparison of operation parameters between binary and analogue switching pixellated light valves **OPT** p236
Computer-aided analysis and design of optical structures based on novel directional couplers **OPT** p99
Dispersion compensation in a 10 Gbit/s IM/DD semiconductor laser system in an NRZ scheme **OPT** p47
Effect of GaSb growth temperature on p-GaSb/n-GaAs diodes grown by MOVPE **OPT** p287
Efficient propagation algorithm for 3D optical waveguides **OPT** p53
Experimental investigation of layer-by-layer metallic photonic crystals **OPT** p409

Experimental study and modelling of high-transmission defect modes in photonic crystals with graphite structure **OPT** p415
Experimental technique to determine the band structure of two-dimensional photonic lattices **OPT** p398
Gain/loss characterisation of optical waveguide and semiconductor laser structures **OPT** p93
High sensitivity precision relative intensity noise calibration standard using low noise reference laser source **SMT** p163
Improved self-imaging characteristics in 1×N multimode couplers **OPT** p65
In-plane microcavity resonators with two-dimensional photonic bandgap mirrors **OPT** p373
InAsSbP-InAs LEDs for the 3.3-5.5 μm spectral range **OPT** p254
Influence of Auger and LO-phonon scattering on bulk and 'quasi'-quantum wire mid-IR laser diodes **OPT** p281
Interleaving two-dimensional lattices to create three-dimensional photonic bandgap structures **OPT** p436
Investigation of wafer-bonded $(Al_xGa_{1-x})_{0.5}In_{0.5}P$/GaP light-emitting diodes **OPT** p248
Light sources for wavelengths >2 μm grown by MBE on InP using a strain relaxed buffer **OPT** p292
Liquid-phase epitaxial growth of GaSb-related compounds on sulphide treated (100) GaSb substrates **OPT** p303
Microwave-optoelectronic modelling approaches for semiconductor lasers **OPT** p141
Numerical analysis of Yb^{3+}-sensitised, Er^{3+}-doped, fibre-ring laser **OPT** p133
Optimising 1550 nm InGaAsP strain compensated MQW lasers close to the miscibility gap **OPT** p7
Parity, time-reversal and group delay for inhomogeneous dielectric slabs: application to pulse propagation in finite, one-dimensional, photonic bandgap structures **OPT** p420
Passive modelocking in semiconductor lasers with monolithically integrated passive waveguides **OPT** p43
Photoluminescence characterisation of Er^{3+}/Yb^{3+} co-implanted alumina (Al_2O_3) thin films and sapphire crystals **OPT** p325
Polarisation modulation dynamics of birefringent vertical cavity surface emitting lasers **OPT** p31
Polariser based on a PbSe-clad optical waveguide in the infrared wavelength: the role of a buffer layer **OPT** p223
Prism-like folded cavity surface-emitting laser diode: electromagnetic-threshold analysis **OPT** p151
Rigorous coupled-wave method applied to fan-out gratings **OPT** p165
Room temperature InPSb/InAs and InPSb/InAs/InAsSb mid-infrared emitting diodes grown by MOVPE **OPT** p257
Single camera three-dimensional endoscope system using a ferroelectric liquid crystal device **SMT** p49
Singularity-corrected spectral index method **OPT** p59
Smallest possible electromagnetic mode volume in a dielectric cavity **OPT** p391
Sol-gel derived organic-inorganic hybrid materials for photonic applications **CDS** p369
Spot size expansion for improved OEIC-to-fibre coupling using directional couplers with 2D confinement **OPT** p71
Synthesis of luminescent sol-gel materials for active electronic devices **CDS** p364
Tandem of electroabsorption modulators integrated with a DFB laser and an optical amplifier for short optical pulse generation and coding **OPT** p198
Technique for modelling propagation of ultrashort pulses with an arbitrary waveform in lossy nonlinear optical fibres **OPT** p179
Three-dimensional characterisation of a two-dimensional photonic bandgap reflector at midinfrared wavelengths **OPT** p403
Three-dimensional photon confinement in photonic crystals of low-dimensional periodicity **OPT** p384
Undercut ridge structures: a novel approach to 1.3/1.55 μm vertical-cavity lasers designed for continuous-wave operation **OPT** p125

OPTICAL RADAR

Processing time-correlated single photon counting data to acquire range images **VIS** p237

OPTIMAL CONTROL

Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Application of adaptive dual controllers to a DC-motor **CTA** p299
Application of genetic algorithms for control design in power systems **GTD** p345
Application of STATCOMs to wind farms **GTD** p511
Bounded real lemma and H_∞ control for descriptor systems **CTA** p316
Constrained multivariable cautious stable predictive control **CTA** p385(5)
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays **CTA** p338
Design of a hydraulic force control system using a generalised predictive control algorithm **CTA** p428(5)
Dynamic modelling and control of a normal-force actuator **EPA** p449
Efficient processor arrays for the implementation of the generalised predictive-control algorithm **CTA** p47
Excitation control system for use with synchronous generators **GTD** p537
Generalised predictive controller with pole restriction **CTA** p219
Global exponential stabilisation for nonlinear singularly perturbed systems **CTA** p377(4)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances **CTA** p435(4)
Incorporation of a UPFC model in an optimal power flow using Newton's method **GTD** p336
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems **CTA** p491
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems **CTA** p241
Nonminimal state space approach to multivariable ramp metering control of motorway bottlenecks **CTA** p568
Online process estimation by ANNs and Smith controller design **CTA** p231
Optimal controller design for nonlinear systems **CTA** p97
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal nonlinear firing angle control of converter-fed DC drive systems **EPA** p217
Optimal robust control design of static VAr compensators **GTD** p301
PID tuning based on loop-shaping H_∞ control **CTA** p485
Robust and H_∞ stabilisation of interconnected systems with delays **CTA** p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies **CTA** p531
Robust decentralised control design using genetic algorithms in power system damping control **GTD** p1
Rule regulation of indirect adaptive fuzzy controller design **CTA** p513
Scan loop control design for a spin-stabilised seeker **CTA** p119
Secondary voltage control: nonlinear selection of pilot buses, design of an optimal control law, and simulation results **GTD** p77
Stable dynamical controller design for robust polynomial pole assignment **CTA** p259
State-space solution of the standard H_∞ control problem for strip mill gauge control **CTA** p291

OPTIMISATION

Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Analysis of operating characteristics of TOADs using gain saturation and nonlinear gain in SOAs **OPT** p83
Application of adaptive dual controllers to a DC-motor **CTA** p299
Decentralised detection strategies under communication constraints **RSN** p199
Demand-side optimal selection of switching devices in radial distribution system planning **GTD** p409
Design of optimal reduced order filter for unstable discrete time systems **CTA** p397(5)
Failure detection approach applying to GPS autonomous integrity monitoring **RSN** p342
Fuzzy implementation of a Bayesian equaliser in the presence of intersymbol and co-channel interference **COM** p323
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances **CTA** p435(4)
Improved self-imaging characteristics in 1×N multimode couplers **OPT** p65
Incorporation of a UPFC model in an optimal power flow using Newton's method **GTD** p336
Long-term hydrothermal scheduling using composite thermal and composite hydro representations **GTD** p210
Look-ahead reservation-based scheduling for input-output buffered ATM switch **COM** p234
Lower bound for multimedia multicast routing **COM** p87
Measurements and prediction model optimisation for signal attenuation in vegetation media at centimetre wave frequencies **MAP** p201
Modified feasible method for hierarchical steady-state control of complex systems **CTA** p603
Multi-area unit commitment for large-scale power systems **GTD** p415
Neurocontroller for buffer overload control in a packet switch **COM** p227
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions **SMT** p67
Novel scheme for low-power classified vector quantisation image coding **VIS** p408
Numerical optimisation of slot parameters for a concentric array radial line slot antenna **MAP** p141
Optimal segmentation of cell images **VIS** p50
Optimal weight assessment based on a range of objectives in a multiobjective optimal load flow study **GTD** p65
Optimising 1550 nm InGaAsP strain compensated MQW lasers close to the miscibility gap **OPT** p7
Optimising indoor base-station locations in coverage- and interference-limited indoor environments **COM** p445
Properties of estimability criteria for target motion analysis **RSN** p92
Reduction of harmonic currents generated by discharge lamp systems **GTD** p363
Rotor design optimisation of a multi-layer interior permanent-magnet synchronous motor **EPA** p119
Technical and economical optimisation of overhead power distribution line lightning protection **GTD** p239

PARALLEL PROCESSING

Analysing dynamic change in distributed software architectures **SEN** p146
Analysis and evaluation of distributed checkpoint algorithms to avoid rollback propagation **SEN** p212
Architectural support for dynamic reconfiguration of distributed workflow applications **SEN** p155
Component-based development, CORBA and RM-ODP **SEN** p22
Creating a highly reliable modified gamma interconnection network using a balance approach **CDT** p27
Cylindrical architectures for 1-D recursive digital filters: A state space approach **CDT** p327
Deadlock detection using (0, 1)-labelling of resource allocation graphs **CDT** p68
Digit-serial systolic multiplier for finite fields $GF(2^m)$ **CDT** p143
DPS: dynamic priority scheduling heuristic for heterogeneous computing systems **CDT** p411
Efficient algorithm and architecture for scan conversion in HDTV **CDT** p287
Efficient processor arrays for the implementation of the generalised predictive-control algorithm **CTA** p47
Embedding incomplete binary trees into incomplete hypercubes **CDT** p377
Embedding meshes and TORUS networks onto degree-four chordal rings **CDT** p73
Experimental investigation of message latencies in the Totem protocol in the presence of faults **SEN** p219
Generalised model for Banyan networks with nonuniform traffic **CDT** p225
Hardware-efficient systolic architecture for inversion and division in $GF(2^m)$ **CDT** p272
Hardware-supported asynchronous checkpointing scheme **CDT** p109
Image component labelling on the star graph using divide and conquer **CDT** p9
Mapping finite element grids onto parallel multicomputers using a self-organising map **CDT** p211
New low complexity bidirectional systolic structures for serial multiplication over the finite field $GF(q^m)$ **CDS** p55
Parallel-in-time relaxed Newton method for transient stability analysis **GTD** p155
Parallel optimal statistical design method with response surface modelling using genetic algorithms **CDS** p7
Parallelising a set of 2-D frequency transforms in a flexible manner **VIS** p65
Performance driven allocation of objects to processor nodes in a distributed system **SEN** p13
Plastic transformations: a method for building dependable distributed applications **SEN** p51
Software architecture for adaptive distributed multimedia systems **SEN** p163
Software tool combining fault masking with user-defined recovery strategies **SEN** p203

SPARC-based VLIW testbed **CDT** p215
Systolic decoder for burst error-correcting codes **COM** p126
Systolic dual basis serial multiplier **CDT** p237
Transformational partitioning for codesign **CDT** p181

PARAMETER ESTIMATION

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Application of adaptive dual controllers to a DC-motor **CTA** p299
Autofocusing of SAR images based on the product high-order ambiguity function **RSN** p269
Better M sequence design for parameter identification based on EKF **CTA** p92
Efficient multispectral texture segmentation using multivariate statistics **VIS** p357
Fast and accurate estimation of ATM quality-of-service parameters with applications to call admission control **COM** p133
Feature extraction of SAR targets consisting of trihedral and dihedral corner reflectors **RSN** p161
Full-order estimator for induction motor states and parameters **EPA** p169
Improved azimuthal resolution of forward looking SAR by sophisticated antenna illumination function design **RSN** p128
Online process estimation by ANNs and Smith controller design **CTA** p231
Optimal segmentation of cell images **VIS** p50
Parallel self-organising hierarchical neural network-based fast voltage estimation **GTD** p98
Parameter identification of induction motor model using genetic algorithms **CTA** p587
Practical RAKE receiver architecture for the downlink communications in a DS-CDMA mobile system **COM** p277
Properties of estimability criteria for target motion analysis **RSN** p92
Properties of risk-sensitive filters/estimators **CTA** p106
Random walk based characterisation of radar backscatter from the sea surface **RSN** p216
Robust algorithm for load estimation in distribution networks **GTD** p499
Robust LPC parameter estimation in standard CELP 4800 bit/s speech coder **VIS** p19
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
Status monitoring in flexible manipulators **CTA** p537
Two-dimensional super-resolution spectral analysis applied to SAR images **RSN** p281
Undervoltage load shedding to avoid voltage instability **GTD** p175
Unified channel model for mobile radio systems with smart antennas **RSN** p32

PATTERN RECOGNITION

Attack operators for digitally watermarked images **VIS** p271
Cepstral behaviour due to additive noise and a compensation scheme for noisy speech recognition **VIS** p316
Circular neighbourhood and 1-D DFT features for texture classification and segmentation **VIS** p167
Classification of sets of mixed pixels with the hypothesis-testing Hough transform **VIS** p57
Cluster analysis of NARMAX models for signal-dependent systems **CTA** p409(4)
Continuous Mandarin speech recognition for Chinese language with large vocabulary based on segmental probability model **VIS** p309
Continuous n-tuple classifier and its application to real-time face recognition **VIS** p343
Fuzzy soft mathematical morphology **VIS** p41
Image component labelling on the star graph using divide and conquer **CDT** p9
Joint quantisation and error diffusion of colour images using competitive learning **VIS** p137
Novel approach to automated fingerprint recognition **VIS** p160
P pattern recognition based on a probabilistic RAM net using n-tuple input mapping **VIS** p415
PLiNC algorithm: pattern location in noisy contexts **VIS** p109
Restoration of images contaminated by mixed Gaussian and impulse noise using a recursive minimum-maximum method **VIS** p264
Segmental probability distribution model approach for isolated Mandarin syllable recognition **VIS** p384
Statistical coding method for facial features **VIS** p187
Two pixel-preselection methods for median-type filtering **VIS** p30

PERFORMANCE EVALUATION

Algebraic test-pattern generation based on the Reed-Muller spectrum **CDT** p308
Creating a highly reliable modified gamma interconnection network using a balance approach **CDT** p27
Design of a basic cell to construct embryonic arrays **CDT** p242
Digit-serial systolic multiplier for finite fields GF(2^m) **CDT** p143
Evaluation of reservation-arbitrated access schemes for statistical multiplexing of variable-bit-rate video traffic over dual-bus metropolitan area networks **COM** p159
Fault-tolerant scaleable multicast algorithm with piggybacking approach on logical process ring **CDT** p292
Hardware-supported asynchronous checkpointing scheme **CDT** p109
Memory alignment issues in real-time systems **CDT** p341
Reservation arbitrated access for efficient service integration over dual-bus metropolitan area networks **COM** p347
Software tool combining fault masking with user-defined recovery strategies **SEN** p203
SPARC-based VLIW testbed **CDT** p215
Stack operations folding in Java processors **CDT** p333
Using two-level stable storage for efficient checkpointing **SEN** p198

POWER ELECTRONICS

Analysis and design of a novel fixed-frequency buck-boost zero-current zero-voltage switched converter **EPA** p33
Analysis of IGBT modules connected in series **CDS** p354
Chaos in ferroresonant wound voltage transformers: effect of core losses and universal circuit behaviour **SMT** p39
Generalised TLM switch model for power electronics applications **SMT** p101
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment **SMT** p111
Novel commutation technique of AC-AC converters **EPA** p295
Novel PWM line conditioner with fast output voltage control **EPA** p85

POWER ENGINEERING COMPUTING

Adaptive protection strategies for detecting power system out-of-step conditions using neural networks **GTD** p387
Application of genetic algorithms for control design in power systems **GTD** p345
Application of STATCOMs to wind farms **GTD** p511
Approach for bus frequency estimating in power system simulations **GTD** p431
Artificial intelligence in diagnosis and supply restoration for a distribution network **GTD** p444
Comparison between evolutionary programming and a genetic algorithm for fault-section estimation **GTD** p616
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Digital distance relaying algorithm for first-zone protection for parallel transmission lines **GTD** p531
Dynamic modelling and control of a normal-force actuator **EPA** p449
Dynamic quadrature booster as an aid to system stability **GTD** p41
Earth-return path impedances of underground cables. II. Evaluations using neural networks **GTD** p627
Electromagnetic transient simulation of power systems using root-matching techniques **GTD** p481
Fault synthetic recognition for an EHV transmission line using a group of neural networks with a time-space property **GTD** p265
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters **SMT** p129
Fuzzy decision-making model to determine the parameters for intelligent design of power system protection **GTD** p169
Generalised bridge converter model for electromagnetic transient analysis **GTD** p423
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Hydrothermal generation scheduling package: a genetic based approach **GTD** p451
Intelligent system for fault diagnosis on low voltage distribution networks **GTD** p592
Method to improve digital distance relay impedance measurement when used in series compensated lines protected by a metal oxide varistor **GTD** p403
Model-based analysis of protection system performance **GTD** p547
Modelling of resonant switched-mode converters using SIMULINK **EPA** p159
Monitoring and assessment of voltage stability margins using artificial neural networks with a reduced input set **GTD** p355
Parallel-in-time relaxed Newton method for transient stability analysis **GTD** p155
Parallel self-organising hierarchical neural network-based fast voltage estimation **GTD** p98
Practical implementation of a hybrid fuzzy neural network for one-day-ahead load forecasting **GTD** p687
Reactive power optimisation using an analytic hierarchical process and a nonlinear optimisation neural network approach **GTD** p89
Real-time contingency evaluation and ranking technique **GTD** p517
Real-time emulation for power equipment development. I. Real-time simulation **EPA** p92
Resonant converter in high power factor, high voltage DC applications **EPA** p307
ROM-based current controller for three-phase boost-type AC/DC converter **EPA** p544
Short-time Fourier and wavelet transforms for fault detection in power transformers during impulse tests **SMT** p77
Simple dynamic equivalent for fast online transient stability assessment **GTD** p49
Simulator of DC traction motors including both main pole and interpole saturation **EPA** p377
Static security analysis using pipeline decomposition **GTD** p105
System separation mechanism in the neighbourhood of a relevant type-n UEP using the normal form of vector fields **GTD** p139

POWER SYSTEM CONTROL

Acceleration feedforward control for active magnetic bearing systems excited by ground motion **CTA** p113
Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives **CTA** p63
Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Analysis and comparison of control techniques for AC-AC matrix converters **EPA** p284
Analysis, design and control of a novel spherical permanent-magnet actuator **EPA** p61
Analysis of a novel solid state voltage regulator for a self-excited induction generator **GTD** p647
Application of adaptive dual controllers to a DC-motor **CTA** p299
Application of genetic algorithms for control design in power systems **GTD** p345
Application of STATCOMs to wind farms **GTD** p511
Asymptotically stable adaptive load torque observer for precision position control of BLDC motor **EPA** p383
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system **CTA** p419(5)
Competitive hysteresis controllers–a control concept for inverters having oscillating DC- and AC-side state variables **EPA** p569
Composite adaptive position controller for induction motor using feedback linearisation **CTA** p25
Control of an EV drive with reduced unsprung mass **EPA** p600
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives **CTA** p197
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Design of reduced-order observer-based variable structure power system stabiliser for unmeasurable state variables **GTD** p525
Development of a SMES system as a fluctuating load compensator **GTD** p700
Double-fed induction machine: converter optimisation and field oriented control without position sensor **EPA** p360
Dynamic modelling and control of a normal-force actuator **EPA** p449
Dynamic quadrature booster as an aid to system stability **GTD** p41
Effects of unified power flow controllers on transient stability **GTD** p182
Electrodynamic braking of wind turbines **EPA** p140

Excitation control system for use with synchronous generators **GTD** p537
Experimental validation of 5 kN model electromagnetic vibration damper and design of a real-size 120 kN machine **EPA** p185
Flux and torque control of switched reluctance machines **EPA** p519
Full-order estimator for induction motor states and parameters **EPA** p169
Fuzzy inference system to assist the operator in reactive power control in distribution systems **GTD** p133
Fuzzy logic based unified power flow controllers for transient stability improvement **GTD** p225
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Incorporation of a UPFC model in an optimal power flow using Newton's method **GTD** p336
Multiple-page-mapping backpropagation neural network for constant tension control **EPA** p239
New multi-objective stochastic search technique for economic load dispatch **GTD** p747
Nonlinear control of a large-gap 2-DOF magnetic bearing system based on a coupled force model **CTA** p269
Novel control design for the buck converter **EPA** p39
Novel dead time compensation method for induction motor drives using space vector modulation **EPA** p387
Observer-based speed estimation method for sensorless vector control of induction motors **CTA** p359
Operation of a fault tolerant PM drive for an aerospace fuel pump application **EPA** p441
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal nonlinear firing angle control of converter-fed DC drive systems **EPA** p217
Optimal robust control design of static VAr compensators **GTD** p301
Parameter identification of induction motor model using genetic algorithms **CTA** p587
Position control of a vector controlled induction machine using Slotine's sliding mode control approach **EPA** p231
Power flow control with controllable reactive series elements **GTD** p493
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Real-time contingency evaluation and ranking technique **GTD** p517
Real-time emulation for power equipment development. II. The virtual machine **EPA** p153
Representation and control of high speed phase shifter for an electric power system **GTD** p308
Robust decentralised control design using genetic algorithms in power system damping control **GTD** p1
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
ROM-based current controller for three-phase boost-type AC/DC converter **EPA** p544
Scheduling of radio-controlled heating load **GTD** p641
Secondary voltage control: nonlinear selection of pilot buses, design of an optimal control law, and simulation results **GTD** p77
Selection of operating conditions for the co-ordinated setting of robust fixed-parameter stabilisers **GTD** p111
Self-excited induction generator with excellent voltage and frequency control **GTD** p33
Sensitivity analysis for transient stability studies **GTD** p669
Slider-crank mechanism control using adaptive computed torque technique **CTA** p364
Sliding-mode control for current distribution in parallel-connected DC-DC converters **EPA** p333
SMC-based adaptive input-output linearising control of induction motors **CTA** p55
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180
Steady-state model of direct connected generator-HVDC converter units in the harmonic domain **GTD** p559
Ultrasonic motor servo-drive with online trained neural-network model-following controller **EPA** p105
Variable structure control of UPS inverters **EPA** p559
Voltage stability assessment with inclusion of hard limits **GTD** p505

POWER SYSTEM MANAGEMENT

Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Application of genetic algorithms for control design in power systems **GTD** p345
Application of STATCOMs to wind farms **GTD** p511
Artificial intelligence in diagnosis and supply restoration for a distribution network **GTD** p444
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Cost-benefit analysis of generation additions in system planning **GTD** p288
Decentralised load-frequency controller design based on structured singular values **GTD** p7
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Design of reduced-order observer-based variable structure power system stabiliser for unmeasurable state variables **GTD** p525
Dynamic quadrature booster as an aid to system stability **GTD** p41
Effect of realistic system modelling on low-voltage capacitor transient overvoltages **GTD** p682
Effects of unified power flow controllers on transient stability **GTD** p182
Excitation control system for use with synchronous generators **GTD** p537
Fault synthetic recognition for an EHV transmission line using a group of neural networks with a time-space property **GTD** p265
Formula for the effect of a static VAr compensator on synchronising torque coefficient [comment and reply] **GTD** p759
Fuzzy inference system to assist the operator in reactive power control in distribution systems **GTD** p133
Fuzzy logic based unified power flow controllers for transient stability improvement **GTD** p225
Grid interface options for variable-speed, permanent-magnet generators **EPA** p273
Incorporation of a UPFC model in an optimal power flow using Newton's method **GTD** p336
Multi-area unit commitment for large-scale power systems **GTD** p415
New multi-objective stochastic search technique for economic load dispatch **GTD** p747
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal robust control design of static VAr compensators **GTD** p301
Optimisation approach to power restoration in steel mills **EPA** p607
Parallel self-organising hierarchical neural network-based fast voltage estimation **GTD** p98
Power flow control with controllable reactive series elements **GTD** p493
Probabilistic load flow for assessment of voltage instability **GTD** p196
Real-time contingency evaluation and ranking technique **GTD** p517
Reconciling pool and contract dispatch in open access transmission operations **GTD** p468
Representation and control of high speed phase shifter for an electric power system **GTD** p308
Robust decentralised control design using genetic algorithms in power system damping control **GTD** p1
Scheduling of radio-controlled heating load **GTD** p641
Secondary voltage control: nonlinear selection of pilot buses, design of an optimal control law, and simulation results **GTD** p77
Selection of operating conditions for the co-ordinated setting of robust fixed-parameter stabilisers **GTD** p111
Standing phase angle reduction for power system restoration **GTD** p82
Static security analysis using pipeline decomposition **GTD** p105
Static VAr compensator (STATCOM) based on single-phase chain circuit converters **GTD** p381
Stochastic multiobjective generation dispatch of combined heat and power systems **GTD** p583
Technical and economical optimisation of overhead power distribution line lightning protection **GTD** p239
Three-phase active power line conditioner planning **GTD** p281
Undervoltage load shedding to avoid voltage instability **GTD** p175
Unit commitment by tabu search **GTD** p56
Voltage stability assessment with inclusion of hard limits **GTD** p505

POWER SYSTEM PROTECTION

Alternative earthing calculations for grids and rods **GTD** p271
Dead-earthing influence on track-circuit shunt sensitivity **EPA** p147
Digital distance relaying algorithm for first-zone protection for parallel transmission lines **GTD** p531
Effects of negative direct voltage pre-stressing on the breakdown of conductor-rod gaps under positive impulse voltages **SMT** p105
Finite-element computation of capacitance networks in multiple-electrode systems: application to ZnO surge arresters **SMT** p129
Fuzzy decision-making model to determine the parameters for intelligent design of power system protection **GTD** p169
Improved symmetrical component-based fault distance estimation for digital distance protection **GTD** p739
Impulse breakdown of short rod-plane gaps and the influence of humidity **SMT** p141
Influence of irradiation on impulse breakdown of sphere gaps and sphere-rod gaps **SMT** p147
Laboratory study of the bi-leader process from an electrically floating conductor. I. General results **SMT** p185
Measurements of grounding resistances for high impulse currents **GTD** p693
Method to improve digital distance relay impedance measurement when used in series compensated lines protected by a metal oxide varistor **GTD** p403
Model-based analysis of protection system performance **GTD** p547
Multiple regression technique for estimating the insulation strength of series dielectrics on distribution systems: a statistical approach **GTD** p189
Possibilistic-diagnosis theory for fault-section estimation and state identification of unobserved protective relays using tabu-search method **GTD** p722
Protection co-ordination: determination of the break point set **GTD** p717
Sparkover in the rod-plane gap under combined direct and impulse voltages **SMT** p207
Tabu search based approach to trouble call analysis [in LV power distribution] **GTD** p731
Technical and economical optimisation of overhead power distribution line lightning protection **GTD** p239
Tests of the 'early streamer emission' principle for protection against lightning **SMT** p200
Toroidal inductively coupled superconducting fault current limiter with interleaved windings **EPA** p593

POWER SYSTEMS AND APPLICATIONS

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives **CTA** p63
Analysis of self-excited electronic ballasts using BJTs/MOSFETs as switching devices **CDS** p95
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system **CTA** p419(5)
Bicriterion optimisation for traction substations in mass rapid transit systems using genetic algorithm **EPA** p49
Choice of drives for electric vehicles: a comparison between two permanent magnet AC machines **EPA** p247
Control of an EV drive with reduced unsprung mass **EPA** p600
Dead-earthing influence on track-circuit shunt sensitivity **EPA** p147
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives **CTA** p197
Design of an in-wheel motor for a solar-powered electric vehicle **EPA** p402
Double-fed induction machine: converter optimisation and field oriented control without position sensor **EPA** p360
Electronically-operated, linear, variable-reluctance, integrating, reversible actuator (ELVIRA)–a novel, low-cost, normal-force, tilting friction drive **EPA** p11
Flux and torque control of switched reluctance machines **EPA** p519
Full-order estimator for induction motor states and parameters **EPA** p169
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Impact of high-speed railway loads on a longitudinal power system **EPA** p261
Improved optimisation method using genetic algorithms for mass transit signalling block-layout design **EPA** p266
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment **SMT** p111
New class of dual voltage converters for switched reluctance drives **EPA** p164
Noise quieting with random PWM AC drives **EPA** p1
Novel dead time compensation method for induction motor drives using space vector modulation **EPA** p387
Operation of a fault tolerant PM drive for an aerospace fuel pump application **EPA** p441
Optimal nonlinear firing angle control of converter-fed DC drive systems **EPA** p217

Optimisation approach to power restoration in steel mills **EPA** p607
Optimisation of AC feeder topology for a DC supplied rapid-transit railway **EPA** p351
PWM drives: voltage-type harmonic sources in power systems **GTD** p293
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Real-time emulation for power equipment development. I. Real-time simulation **EPA** p92
Reduction of harmonic currents generated by discharge lamp systems **GTD** p363
Simulation of electromagnetic drive systems using graph theory **EPA** p393
Simulator of DC traction motors including both main pole and interpole saturation **EPA** p377
Single-switch soft-switching electronic ballast with high input power factor **EPA** p345
Ultrasonic motor servo-drive with online trained neural-network model-following controller **EPA** p105

POWER SYSTEMS AND PLANTS

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives **CTA** p63
Algorithm for failure frequency and duration assessment of composite power systems **GTD** p117
Analysis, design and control of a novel spherical permanent-magnet actuator **EPA** p61
Analysis of a novel solid state voltage regulator for a self-excited induction generator **GTD** p647
Analysis of self-excited electronic ballasts using BJTs/MOSFETs as switching devices **CDS** p95
Application of STATCOMs to wind farms **GTD** p511
Approach for bus frequency estimating in power system simulations **GTD** p431
Arnold diffusion in a particular multi-machine power system **GTD** p257
Artificial intelligence in diagnosis and supply restoration for a distribution network **GTD** p444
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system **CTA** p419(5)
Bicriterion optimisation for traction substations in mass rapid transit systems using genetic algorithm **EPA** p49
Capacitor-assisted excitation of permanent-magnet generators **EPA** p497
Choice of drives for electric vehicles: a comparison between two permanent magnet AC machines **EPA** p247
Comparative study of continuous distribution models for power system reliability evaluation **GTD** p566
Comparison between evolutionary programming and a genetic algorithm for fault-section estimation **GTD** p616
Control of an EV drive with reduced unsprung mass **EPA** p600
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Cost-benefit analysis of generation additions in system planning **GTD** p288
Current-fed three-phase converter with optimum PWM scheme and its practical input line filter design **EPA** p535
Dead-earthing influence on track-circuit shunt sensitivity **EPA** p147
Demand-side optimal selection of switching devices in radial distribution system planning **GTD** p409
Design, DSP implementation, and performance of artificial-intelligence-based speed estimators for electromechanical drives **CTA** p197
Design of an in-wheel motor for a solar-powered electric vehicle **EPA** p402
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Digital distance relaying algorithm for first-zone protection for parallel transmission lines **GTD** p531
Double-fed induction machine: converter optimisation and field oriented control without position sensor **EPA** p360
Effect of realistic system modelling on low-voltage capacitor transient overvoltages **GTD** p682
Electric field analysis for a static induction type of voltage sensor in three-phase power distribution systems **GTD** p437
Electrodynamic braking of wind turbines **EPA** p140
Electromagnetic transient simulation of power systems using root-matching techniques **GTD** p481
Electronically-operated, linear, variable-reluctance, integrating, reversible actuator (ELVIRA)–a novel, low-cost, normal-force, tilting friction drive **EPA** p11
Evaluation of existing optimal VAr planning tools on utility systems **GTD** p663
Experience with bicoherence of electrical power for condition monitoring of wind turbine blades **VIS** p141
Fault synthetic recognition for an EHV transmission line using a group of neural networks with a time-space property **GTD** p265
Flux and torque control of switched reluctance machines **EPA** p519
Formula for the effect of a static VAr compensator on synchronising torque coefficient [comment and reply] **GTD** p759
Full-order estimator for induction motor states and parameters **EPA** p169
Future load curve shaping based on similarity using fuzzy logic approach **GTD** p375
Grid interface options for variable-speed, permanent-magnet generators **EPA** p273
High-impedance fault identification using a fuzzy reasoning system **GTD** p656
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Hydrothermal generation scheduling package: a genetic based approach **GTD** p451
Impact of high-speed railway loads on a longitudinal power system **EPA** p261
Improved optimisation method using genetic algorithms for mass transit signalling block-layout design **EPA** p266
Improved recursive Newton-type algorithm for power system relaying and measurement **GTD** p15
Improved symmetrical component-based fault distance estimation for digital distance protection **GTD** p739
Improved three-phase load flow using phase and sequence components **GTD** p245
Inherent structure theory of networks and power system harmonics **GTD** p123
Long-term hydrothermal scheduling using composite thermal and composite hydro representations **GTD** p210
Measurements of grounding resistances for high impulse currents **GTD** p693
Measurements of power system voltages using remote electric field monitoring **GTD** p217
Method of critical distances for stochastic assessment of voltage sags **GTD** p70
Method to improve digital distance relay impedance measurement when used in series compensated lines protected by a metal oxide varistor **GTD** p403
Model-based analysis of protection system performance **GTD** p547
Modelling of a high-frequency operated fluorescent lamp in an electronic ballast environment **SMT** p111
Modelling of pumped-storage generation in sequential Monte Carlo production simulation **GTD** p611
Monitoring and assessment of voltage stability margins using artificial neural networks with a reduced input set **GTD** p355
New class of dual voltage converters for switched reluctance drives **EPA** p164
New technique to enhance the accuracy of 2-D/3-D field quantities and forces obtained by standard finite-element solutions **SMT** p67
Noise quieting with random PWM AC drives **EPA** p1
Nonlinear oscillations due to spurious energisation of transformers **EPA** p585
Novel dead time compensation method for induction motor drives using space vector modulation **EPA** p387
Novel PWM line conditioner with fast output voltage control **EPA** p85
Operation of a fault tolerant PM drive for an aerospace fuel pump application **EPA** p441
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal nonlinear firing angle control of converter-fed DC drive systems **EPA** p217
Optimal robust control design of static VAr compensators **GTD** p301
Optimal weight assessment based on a range of objectives in a multiobjective optimal load flow study **GTD** p65
Optimisation of AC feeder topology for a DC supplied rapid-transit railway **EPA** p351
Parallel-in-time relaxed Newton method for transient stability analysis **GTD** p155
Performance of uncompensated and series capacitor-compensated 500 kV long transmission line under subnormal frequency conditions **GTD** p315
Power system frequency estimation **GTD** p578
Practical application of evolutionary computing to reactive power planning **GTD** p753
Practical implementation of a hybrid fuzzy neural network for one-day-ahead load forecasting **GTD** p687
PWM drives: voltage-type harmonic sources in power systems **GTD** p293
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Re-lift converter: design, test, simulation and stability analysis **EPA** p315
Reactive power optimisation using an analytic hierarchical process and a nonlinear optimisation neural network approach **GTD** p89
Real-time emulation for power equipment development. I. Real-time simulation **EPA** p92
Reduction of harmonic currents generated by discharge lamp systems **GTD** p363
Reduction of voltage and current distortion in distribution systems with nonlinear loads using hybrid passive filters **GTD** p320
Representation and control of high speed phase shifter for an electric power system **GTD** p308
Risk of fatal electric shocks at distribution network MV/LV transformer stations **GTD** p463
Robust algorithm for load estimation in distribution networks **GTD** p499
Selection of operating conditions for the co-ordinated setting of robust fixed-parameter stabilisers **GTD** p111
Self-excited induction generator with excellent voltage and frequency control **GTD** p33
Series load flow: a novel noniterative load flow method **GTD** p251
Simple dynamic equivalent for fast online transient stability assessment **GTD** p49
Simulation of electromagnetic drive systems using graph theory **EPA** p393
Simulator of DC traction motors including both main pole and interpole saturation **EPA** p377
Single-switch soft-switching electronic ballast with high input power factor **EPA** p345
Stochastic multiobjective generation dispatch of combined heat and power systems **GTD** p583
System separation mechanism in the neighbourhood of a relevant type-n UEP using the normal form of vector fields **GTD** p139
Technique for contingency monitoring and voltage collapse prediction **GTD** p634
Three-phase active power line conditioner planning **GTD** p281
Transmission system expansion planning by an extended genetic algorithm **GTD** p329
Two aspects of local redundancy in state estimation **GTD** p458
Ultrasonic motor servo-drive with online trained neural-network model-following controller **EPA** p105
Unit commitment by tabu search **GTD** p56
Validation of a clustering algorithm for voltage stability analysis on the Bosnian electric power system **GTD** p21
Voltage-peak synchronous closing control for shunt capacitors **GTD** p233
Voltage stability and thermal limit: constraints on the maximum loading of electrical energy distribution feeders **GTD** p573
Weighted-norm approach for multiobjective VAr planning **GTD** p369
Worst-load-increase direction method for fast identification of voltage-weakness indicators **GTD** p27

POWER TRANSMISSION AND DISTRIBUTION

Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Analysis of error propagation in computing the Maxwell matrix of multiconductor structure from measurements **SMT** p117
Application of STATCOMs to wind farms **GTD** p511
Artificial intelligence in diagnosis and supply restoration for a distribution network **GTD** p444
Control strategy for grid-connected DC-AC converters with load power factor correction **GTD** p487
Current-fed three-phase converter with optimum PWM scheme and its practical input line filter design **EPA** p535
Demand-side optimal selection of switching devices in radial distribution system planning **GTD** p409
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Development of a SMES system as a fluctuating load compensator **GTD** p700
Dynamic quadrature booster as an aid to system stability **GTD** p41
Effect of realistic system modelling on low-voltage capacitor transient overvoltages **GTD** p682
Electric field analysis for a static induction type of voltage sensor in three-phase power distribution systems **GTD** p437
Electric-power-quality improvement using parallel active-power conditioners **GTD** p597
Evaluation of existing optimal VAr planning tools on utility systems **GTD** p663
Fuzzy inference system to assist the operator in reactive power control in distribution systems **GTD** p133
Generalised bridge converter model for electromagnetic transient analysis **GTD** p423
High-impedance fault identification using a fuzzy reasoning system **GTD** p656

Improved symmetrical component-based fault distance estimation for digital distance protection **GTD** p739
Improved three-phase load flow using phase and sequence components **GTD** p245
Inherent structure theory of networks and power system harmonics **GTD** p123
Intelligent system for fault diagnosis on low voltage distribution networks **GTD** p592
Multi-area unit commitment for large-scale power systems **GTD** p415
Multiple regression technique for estimating the insulation strength of series dielectrics on distribution systems: a statistical approach **GTD** p189
Novel PWM line conditioner with fast output voltage control **EPA** p85
Optimisation of AC feeder topology for a DC supplied rapid-transit railway **EPA** p351
Power flow control with controllable reactive series elements **GTD** p493
Reconciling pool and contract dispatch in open access transmission operations **GTD** p468
Reduction of voltage and current distortion in distribution systems with nonlinear loads using hybrid passive filters **GTD** p320
Reliability-network-equivalent approach to distribution-system-reliability evaluation **GTD** p149
Robust algorithm for load estimation in distribution networks **GTD** p499
Selection of operating conditions for the co-ordinated setting of robust fixed-parameter stabilisers **GTD** p111
Series load flow: a novel noniterative load flow method **GTD** p251
Steady-state model of direct connected generator-HVDC converter units in the harmonic domain **GTD** p559
Tabu search based approach to trouble call analysis [in LV power distribution] **GTD** p731
Technical and economical optimisation of overhead power distribution line lightning protection **GTD** p239
Three-phase active power line conditioner planning **GTD** p281
Time-domain model for multiconductor power transmission lines **GTD** p473
Transmission system expansion planning by an extended genetic algorithm **GTD** p329
Voltage stability and thermal limit: constraints on the maximum loading of electrical energy distribution feeders **GTD** p573
Voltage stability assessment with inclusion of hard limits **GTD** p505

PREDICTIVE CONTROL

Constrained multivariable cautious stable predictive control **CTA** p385(5)
Design of a hydraulic force control system using a generalised predictive control algorithm **CTA** p428(5)
Efficient processor arrays for the implementation of the generalised predictive-control algorithm **CTA** p47
Generalised predictive controller with pole restriction **CTA** p219
Multivariable continuous-time generalised predictive control: a state-space approach to linear and nonlinear systems **CTA** p241
Online process estimation by ANNs and Smith controller design **CTA** p231

PROBABILITY AND STATISTICS

Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
Adaptive detection algorithm for radar signals in autoregressive interference **RSN** p309
Algorithm for sequential generation of states in failure-prone communication network **COM** p73
Analysis and performance comparison of the trellis coded and convolutional coded DS/SSMA systems in impulsive noise environment **COM** p283
Analysis of a leaky bucket control scheme in the signalling system no.7 network **COM** p25
Analysis of DPSK nonlinear combiner over fading channels with impulse noise **COM** p406
Analysis of the second heart sound for diagnosis of paediatric heart disease **SMT** p285
Analysis of weight error loss with a multichannel beamformer processor **RSN** p63
Arnold diffusion in a particular multi-machine power system **GTD** p257
Bayesian approach to object detection in sidescan sonar **VIS** p221
Blind channel identification based on cyclic statistics **RSN** p58
Blocking analysis of time-division multiplexed multicast switch with intermediate channel grouping **COM** p19
Capture model for mobile radio slotted ALOHA systems **COM** p91
Cell-access control for multiple cell-loss classes in shared ATM output buffer **COM** p8
Cepstral behaviour due to additive noise and a compensation scheme for noisy speech recognition **VIS** p316
Comparative study of continuous distribution models for power system reliability evaluation **GTD** p566
Comparison of techniques for time-frequency analysis of the ECG during human ventricular fibrillation **SMT** p301
Construction of 2^n extended prime codes with cross-correlation constraint of one **COM** p297
Continuous Mandarin speech recognition for Chinese language with large vocabulary based on segmental probability model **VIS** p309
Decentralised detection strategies under communication constraints **RSN** p199
Delay spread profiles and receiver performance in a dense multipath environment **COM** p47
Diversity reception of fading signals in spherically invariant noise **COM** p272
Doppler sub-optimum estimates of two-tone polarimetric radar signals **RSN** p153
Effects of negative direct voltage pre-stressing on the breakdown of conductor-rod gaps under positive impulse voltages **SMT** p105
Efficient multispectral texture segmentation using multivariate statistics **VIS** p357
Estimating time-varying noise introduced by CVSD for speech enhancement **VIS** p23
Fast and accurate estimation of ATM quality-of-service parameters with applications to call admission control **COM** p133
Fast search algorithm for tolerance design **CDS** p19
FFT-based self-normalising receiver for FFH spread spectrum systems **COM** p99
Human ECG: nonlinear deterministic versus stochastic aspects **SMT** p279
Improved fading distribution for mobile radio **COM** p197
Improved multiple targets angle tracking algorithm using the joint probabilistic data association filter **RSN** p331
Improved recursive Newton-type algorithm for power system relaying and measurement **GTD** p15
Independent component analysis: source assessment and separation, a Bayesian approach **VIS** p149
Iterative MAP decoding for serial concatenated convolutional codes **COM** p53
Look-ahead reservation-based scheduling for input-output buffered ATM switch **COM** p234
Markov random field regularisation models for adaptive binarisation of nonuniform images **VIS** p322
Method of critical distances for stochastic assessment of voltage sags **GTD** p70
Modelling a positive lightning downward leader to study its effects on engineering systems **GTD** p395
Modelling of pumped-storage generation in sequential Monte Carlo production simulation **GTD** p611
MQAM modulation and RS codes for SS-CDMA communication over Rician fading channels **COM** p414
Multiparty videoconferencing on multi-drop VP-based SONET/ATM rings: performance analysis **COM** p389
Multiple regression technique for estimating the insulation strength of series dielectrics on distribution systems: a statistical approach **GTD** p189
Multiresolution and hybrid Bayesian algorithms for automatic detection of change points **VIS** p280
Neurocontroller for buffer overload control in a packet switch **COM** p227
New multi-objective stochastic search technique for economic load dispatch **GTD** p747
Novel accelerated simulation techniques for low bit error rate communication systems **COM** p337
Numerical comparison of techniques for estimating Doppler velocity time series from coherent sea surface scattering measurements **RSN** p367
P pattern recognition based on a probabilistic RAM net using n-tuple input mapping **VIS** p415
Parallel optimal statistical design method with response surface modelling using genetic algorithms **CDS** p7
Performance analysis of an FFH/BFSK self-normalising receiver under multitone jamming **COM** p431
Performance analysis of ETDGE–an efficient and unbiased TDOA estimator **RSN** p325
Performance analysis of priority leaky bucket scheme with queue-length-threshold scheduling policy **COM** p395
Performance analysis of the OS family of CFAR schemes with incoherent integration of M-pulses in the presence of interferers **RSN** p181
Performance of fast bandwidth reservation with multipath routing **COM** p80
PLiNC algorithm: pattern location in noisy contexts **VIS** p109
Possibilistic-diagnosis theory for fault-section estimation and state identification of unobserved protective relays using tabu-search method **GTD** p722
Priority queue with two-state Markov-modulated arrivals **COM** p152
Priority queueing system with fixed-length packet-train arrivals **COM** p331
Probabilistic load flow for assessment of voltage instability **GTD** p196
Processing time-correlated single photon counting data to acquire range images **VIS** p237
Propagation aspects of frequency-hopping spread spectra **MAP** p249
Properties of risk-sensitive filters/estimators **CTA** p106
Quantitative assessment of experimental repeatability **SMT** p177
Radio propagation characteristics in curved tunnels **MAP** p327
Random walk based characterisation of radar backscatter from the sea surface **RSN** p216
Recursive order-statistic soft morphological filters **VIS** p333
Restoration of images contaminated by mixed Gaussian and impulse noise using a recursive minimum-maximum method **VIS** p264
Risk of fatal electric shocks at distribution network MV/LV transformer stations **GTD** p463
Robust sequential detectors employing an order statistic prefilter **VIS** p82
Segmental probability distribution model approach for isolated Mandarin syllable recognition **VIS** p384
Selection of multi-h modulation sets using a stochastic search algorithm **COM** p41
Space translation properties and the minimum-BER linear-combiner DFE **COM** p316
Spatio-temporal radio channel characteristics in urban macrocells **RSN** p42
Statistical coding method for facial features **VIS** p187
Stochastic multiobjective generation dispatch of combined heat and power systems **GTD** p583
Teletraffic analysis of an integrated satellite/terrestrial mobile radio system based on nongeostationary satellites **COM** p378
Time-varying complex spectral analysis via recursive APES **RSN** p354
Two-dimensional super-resolution spectral analysis applied to SAR images **RSN** p281
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia **SMT** p307

PRODUCTION ENGINEERING

Algorithm for failure frequency and duration assessment of composite power systems **GTD** p117
Comparative study of continuous distribution models for power system reliability evaluation **GTD** p566
Cost-benefit analysis of generation additions in system planning **GTD** p288
Double-controller scheme for control of processes with dominant delay **CTA** p479(5)
Electrodynamic braking of wind turbines **EPA** p140
Fault diagnosis of a distributed knockout switch **COM** p241
IFIS: an online test methodology **CDS** p1
Impact of surface coating insulation on small motor performance **EPA** p409
Incorporation of a UPFC model in an optimal power flow using Newton's method **GTD** p336
Influence of lot arrival distribution on production dispatching rule scheduling and cost in the final test process of LSI manufacturing system **SMT** p26
Intelligent control for handling motion nonlinearity in a retrofitted machining table **CTA** p403(4)
Mini-max control of cross-directional variations on a paper machine **CTA** p189
Modelling of a pump-power-loss-controlled gain-locking system for EDFA application in WDM transmission systems **OPT** p205
Multiple-page-mapping backpropagation neural network for constant tension control **EPA** p239
Operation of a fault tolerant PM drive for an aerospace fuel pump application **EPA** p441
Optimisation approach to power restoration in steel mills **EPA** p607
Packaging impact on switching noise in high-speed digital systems **CDS** p446
Real-time contingency evaluation and ranking technique **GTD** p517
Reliability-network-equivalent approach to distribution-system-reliability evaluation **GTD** p149
Robust stabilisation of a state delayed system **CTA** p87
State-space solution of the standard H_∞ control problem for strip mill gauge control **CTA** p291
Status monitoring in flexible manipulators **CTA** p537
Three-dimensional reconstruction algorithm for electrical resistance tomography **SMT** p85

Transient response testing of analogue components in mixed-signal systems: a review **CDS** p314

PROGRAMMING SUPPORT

CodeSign: an embedded system design environment **CDT** p171
Configuration management for highly customisable software **SEN** p180
COO approach to support cooperation in software developments **SEN** p79
Generating diverse software versions with genetic programming: an experimental study **SEN** p228
Incremental language design **SEN** p85
Java's reliability: an analysis of software defects in Java **SEN** p41
Method integration: the need for a learning perspective **SEN** p113
On the role of software architectures in runtime system reconfiguration **SEN** p137
Reliability-oriented software engineering: design, testing and evaluation techniques **SEN** p191
Software tool combining fault masking with user-defined recovery strategies **SEN** p203

PROGRAMMING THEORY

Adaptive exact optimisation of minimally testable FPRM expansions **CDT** p385
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems **CTA** p575
Complexity-constrained best-basis wavelet packet algorithm for image compression **VIS** p391
Creating a highly reliable modified gamma interconnection network using a balance approach **CDT** p27
DPS: dynamic priority scheduling heuristic for heterogeneous computing systems **CDT** p411
Hardware-efficient systolic architecture for inversion and division in GF(2^m) **CDT** p272
Mapping finite element grids onto parallel multicomputers using a self-organising map **CDT** p211
Towards a chemical model for software architecture reconfiguration **SEN** p130
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems **SMT** p31

RADAR AND RADIONAVIGATION

Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive attenuation of clutter and jamming for array radar **RSN** p193
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
An information system won the war **SEN** p95
Basic functional requirements and results for an MSSR on-site evaluator based on RF target injection **RSN** p361
EM models for evaluating rain perturbation on the NRCS of the sea surface observed near nadir **RSN** p226
Feasibility of employing artificial neural networks for emergent crop monitoring in SAR systems **RSN** p291
Feature extraction of SAR targets consisting of trihedral and dihedral corner reflectors **RSN** p161
Lineshape analysis of breaking-wave Doppler spectra **RSN** p135
Modal morphing on meteorological radar data for rainfall pattern analysis **RSN** p123
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Over-the-horizon radar array calibration using echoes from ionised meteor trails **RSN** p173
Physical optics analysis of the field backscattered by a depolarising trihedral corner reflector **MAP** p213
Rainfall profile retrieval through spaceborne rain radars utilising a sea surface NRCS model **RSN** p233
Time-varying complex spectral analysis via recursive APES **RSN** p354

RADAR CLUTTER

Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive attenuation of clutter and jamming for array radar **RSN** p193
Decentralised detection strategies under communication constraints **RSN** p199
Interrelated problems in space-time processing for SAR and ISAR **RSN** p297
Minimum variance monopulse technique for an adaptive phased array radar **RSN** p374
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Random walk based characterisation of radar backscatter from the sea surface **RSN** p216

RADAR THEORY

Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive attenuation of clutter and jamming for array radar **RSN** p193
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
Adaptive detection algorithm for radar signals in autoregressive interference **RSN** p309
Autofocusing of SAR images based on the product high-order ambiguity function **RSN** p269
Branch cut integration method for computing signal propagation through dispersive media **RSN** p142
Chirp z-transform based SPECAN approach for phase-preserving ScanSAR image generation **RSN** p254
Data compression, data fusion and Kalman filtering in wavelet packet sub-bands of a multisensor tracking system **RSN** p100
Decentralised detection strategies under communication constraints **RSN** p199
Doppler sub-optimum estimates of two-tone polarimetric radar signals **RSN** p153
EM models for evaluating rain perturbation on the NRCS of the sea surface observed near nadir **RSN** p226
Exploiting coherent multipath for mainbeam jammer suppression **RSN** p303
Feasibility of employing artificial neural networks for emergent crop monitoring in SAR systems **RSN** p291
Feature extraction of SAR targets consisting of trihedral and dihedral corner reflectors **RSN** p161
Improved azimuthal resolution of forward looking SAR by sophisticated antenna illumination function design **RSN** p128
Interrelated problems in space-time processing for SAR and ISAR **RSN** p297
Intratropospheric range delay for two refractivity models **RSN** p119
Minimum variance monopulse technique for an adaptive phased array radar **RSN** p374
Noise analysis of digitised FMCW radar waveforms **RSN** p209
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Performance analysis of the OS family of CFAR schemes with incoherent integration of M-pulses in the presence of interferers **RSN** p181
Physical optics analysis of the field backscattered by a depolarising trihedral corner reflector **MAP** p213
Polarimetric calibration for wideband synthetic aperture radar imaging **RSN** p275
Random walk based characterisation of radar backscatter from the sea surface **RSN** p216
Time-varying complex spectral analysis via recursive APES **RSN** p354
Time-varying spectral analysis for radar imaging of manoeuvring targets **RSN** p262
Two-dimensional ISAR imaging using full polarisation and super-resolution processing techniques **RSN** p240
Two-dimensional super-resolution spectral analysis applied to SAR images **RSN** p281

RADIO DIRECTION-FINDING

Failure detection approach applying to GPS autonomous integrity monitoring **RSN** p342

RADIO SYSTEMS

2D ray-tracing model for indoor radio propagation at millimetre frequencies, and the study of diversity techniques **MAP** p349
Adaptive MLSE of QAM signals over frequency nonselective Rayleigh fading channels **COM** p426
Analysis and performance comparison of the trellis coded and convolutional coded DS/SSMA systems in impulsive noise environment **COM** p283
Analysis of DPSK nonlinear combiner over fading channels with impulse noise **COM** p406
Analysis of weight error loss with a multichannel beamformer processor **RSN** p63
Beamforming for circular and semicircular array antennas for low-cost wireless LAN data communications systems **MAP** p153
Blind channel identification based on cyclic statistics **RSN** p58
Capture model for mobile radio slotted ALOHA systems **COM** p91
Channel assignment of cellular mobile systems with nonuniform cells **COM** p451
Characteristics of closed loop power control algorithms for a cellular DS/CDMA system **COM** p355
Code acquisition with diversity combining for FFH/MFSK spread spectrum systems **COM** p437
Delay spread profiles and receiver performance in a dense multipath environment **COM** p47
Digital techniques for mobile radio chirp sounders **COM** p191
Diversity combining with MLSE equalisation **COM** p105
Failure detection approach applying to GPS autonomous integrity monitoring **RSN** p342
FFT-based self-normalising receiver for FFH spread spectrum systems **COM** p99
Fuzzy implementation of a Bayesian equaliser in the presence of intersymbol and co-channel interference **COM** p323
Generalised array manifold model for wireless communication channels with local scattering **RSN** p51
Improved fading distribution for mobile radio **COM** p197
Improvement of the computation efficiency for a ray launching model **MAP** p303
Improving the capacity of CDMA systems using convolutional coding and interference cancellation **COM** p186
Measurements and prediction model optimisation for signal attenuation in vegetation media at centimetre wave frequencies **MAP** p201
MQAM modulation and RS codes for SS-CDMA communication over Rician fading channels **COM** p414
Multimedia transport in multihop wireless networks **COM** p342
Multiple chip-rate DS/CDMA system and its spreading code dependent performance analysis **COM** p371
New channel access protocol for a wide area DGPS deformation monitoring network **COM** p203
New system for the interconnection of ATM networks via wireless links **COM** p259
Optimising indoor base-station locations in coverage- and interference-limited indoor environments **COM** p445
Performance analysis of an FFH/BFSK self-normalising receiver under multitone jamming **COM** p431
Performance of active antenna oscillator arrays under modulation for communication systems **MAP** p313
Performance of hybrid OCA-FD/CDMA for cellular mobile communications **COM** p363
Performance of shaped beam quadrifilar antennas on the METOP spacecraft **MAP** p19
Power amplifier module combined with duplexer CDMA-based PCS phone **MAP** p486
Practical 8-PSK block-coded modulation with convolutional codes and soft decision block codes for packet networks **COM** p218
Practical RAKE receiver architecture for the downlink communications in a DS-CDMA mobile system **COM** p277
Propagation aspects of frequency-hopping spread spectra **MAP** p249
Radio propagation characteristics in curved tunnels **MAP** p327
Scheduling of radio-controlled heating load **GTD** p641
Smart codec: an adaptive packet data link **COM** p180
Space division multiple access (SDMA) field trials. 2. Calibration and linearity issues **RSN** p79
Space division multiple access (SDMA) field trials. I. Tracking and BER performance **RSN** p73
Spatio-temporal radio channel characteristics in urban macrocells **RSN** p42
Taxonomy of space-time processing for wireless networks **RSN** p25
Teletraffic analysis of an integrated satellite/terrestrial mobile radio system based on nongeostationary satellites **COM** p378
Transmission modelling of ENCAP-OQPSK radio links **COM** p419
Triple mode dielectric resonator hybrid reflection filters **MAP** p337
Unified channel model for mobile radio systems with smart antennas **RSN** p32

RADIOWAVE PROPAGATION

2D ray-tracing model for indoor radio propagation at millimetre frequencies, and the study of diversity techniques **MAP** p349
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19

Branch cut integration method for computing signal propagation through dispersive media **RSN** p142
Delay spread profiles and receiver performance in a dense multipath environment **COM** p47
Extended UK models for high frequency spectral occupancy **COM** p168
Generalised array manifold model for wireless communication channels with local scattering **RSN** p51
Improvement of the computation efficiency for a ray launching model **MAP** p303
Influence of air humidity on microwave depolarisation in semi-arid areas **MAP** p147
Intratropospheric range delay for two refractivity models **RSN** p119
Line-of-sight EM propagation experiment at 10.25 GHz in the tropical ocean evaporation duct **MAP** p65
Lineshape analysis of breaking-wave Doppler spectra **RSN** p135
Measurements and prediction model optimisation for signal attenuation in vegetation media at centimetre wave frequencies **MAP** p201
Observations of the directional characteristics of ionospherically propagated HF radio channel sounding signals over two high latitude paths **MAP** p379
Optimising indoor base-station locations in coverage- and interference-limited indoor environments **COM** p445
Performance of shaped beam quadrifilar antennas on the METOP spacecraft **MAP** p19
Physical optics analysis of the field backscattered by a depolarising trihedral corner reflector **MAP** p213
Propagation aspects of frequency-hopping spread spectra **MAP** p249
Radio propagation characteristics in curved tunnels **MAP** p327
Spatio-temporal radio channel characteristics in urban macrocells **RSN** p42
Taxonomy of space-time processing for wireless networks **RSN** p25
Unified channel model for mobile radio systems with smart antennas **RSN** p32

SELF-ADJUSTING SYSTEMS

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives **CTA** p63
Adaptive H_∞ neural network tracking controller for electrically driven manipulators **CTA** p594
Application of adaptive dual controllers to a DC-motor **CTA** p299
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems **CTA** p575
Asymptotically stable adaptive load torque observer for precision position control of BLDC motor **EPA** p383
Autotuning gain parameter implementation with fuzzy learning control scheme for DC brushless servo system **CTA** p419(5)
Composite adaptive position controller for induction motor using feedback linearisation **CTA** p25
Design of a hydraulic force control system using a generalised predictive control algorithm **CTA** p428(5)
Design of an iterative learning controller for a class of linear dynamic systems with time delay **CTA** p507
Generalised predictive controller with pole restriction **CTA** p219
Heterogeneous intelligent control systems **CTA** p551
Indirect adaptive control for a class of linear time-varying plants **CTA** p141
Intelligent control for handling motion nonlinearity in a retrofitted machining table **CTA** p403(4)
Learning approach to control of servomotors under disturbance torque dependent on time and states **CTA** p251
Nonminimal state space approach to multivariable ramp metering control of motorway bottlenecks **CTA** p568
Online process estimation by ANNs and Smith controller design **CTA** p231
Quantitative design and implementation of PI-D controller with model-following response for motor drive **EPA** p98
Recurrent networks for nonlinear adaptive control **CTA** p177
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances **CTA** p323
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems **CTA** p41
Rule regulation of indirect adaptive fuzzy controller design **CTA** p513
Slider-crank mechanism control using adaptive computed torque technique **CTA** p364
SMC-based adaptive input-output linearising control of induction motors **CTA** p55
Speed control of ultrasonic motors by adaptive control with a simplified mathematical model **EPA** p180
Ultrasonic motor servo-drive with online trained neural-network model-following controller **EPA** p105

SEMICONDUCTOR DEVICE MODELLING

Advanced physical model for the optimisation of the width of a resistive Schottky barrier field plate **CDS** p260
Analysis of IGBT modules connected in series **CDS** p354
Current-dependent collector resistance of the bipolar transistor in quasi-saturation **CDS** p66
Effects of carrier heating, nonequilibrium LO phonons and lattice heating on small-signal modulation response of semiconductor lasers **OPT** p13
Fast tuning of 3.3 μm InAsSb-InAsSbP diode lasers using nonlinear optical effects **OPT** p261
General large-signal charge-control equations for the MOSFET drain and source current under nonquasistatic conditions **CDS** p236
Microwave-optoelectronic modelling approaches for semiconductor lasers **OPT** p141
Modelling of self-sustained pulsations in nonuniformly pumped semiconductor lasers **OPT** p217
Modelling of semiconductor laser amplifier for the terahertz optical asymmetric demultiplexer **CDS** p61
Modelling pulse propagation in semiconductor optical amplifiers using wavelets **OPT** p88
Multidimensional signal-noise neural network model **CDS** p111
Normal-incidence TE intersub-band transitions **OPT** p21
Novel velocity-electric field relation for modelling of compound semiconductor field-effect transistors **CDS** p170
Polarisation modulation dynamics of birefringent vertical cavity surface emitting lasers **OPT** p31
Prism-like folded cavity surface-emitting laser diode: electromagnetic-threshold analysis **OPT** p151
Semiconductor laser sources for the generation of millimetre-wave signals **OPT** p159
Smith chart formulation of performance characterisation for a microwave transistor **CDS** p419
Spontaneous emission in semiconductor microcavity post lasers **OPT** p37

SEMICONDUCTOR DEVICES AND MATERIALS

Advanced physical model for the optimisation of the width of a resistive Schottky barrier field plate **CDS** p260
Analysis and design of a novel fixed-frequency buck-boost zero-current zero-voltage switched converter **EPA** p33
Analysis of IGBT modules connected in series **CDS** p354
Chaos diode **CDS** p361
Current-dependent collector resistance of the bipolar transistor in quasi-saturation **CDS** p66
Development of a SMES system as a fluctuating load compensator **GTD** p700
Device characteristics of CuPc/TiO_2 heterojunctions **CDS** p383
In-plane microcavity resonators with two-dimensional photonic bandgap mirrors **OPT** p373
InAsSbP-InAs LEDs for the 3.3-5.5 μm spectral range **OPT** p254
Influence of Auger and LO-phonon scattering on bulk and 'quasi'-quantum wire mid-IR laser diodes **OPT** p281
Interface-induced phenomena in type II antimonide-arsenide heterostructures **OPT** p268
Investigation of wafer-bonded $(Al_xGa_{1-x})_{0.5}In_{0.5}P$/GaP light-emitting diodes **OPT** p248
Liquid-phase epitaxial growth of GaSb-related compounds on sulphide treated (100) GaSb substrates **OPT** p303
Measurements of the temperature dependence of the output voltages of some Zener diode based voltage standards **SMT** p154
Micromachined silicon thermopile and thermal radiators using porous silicon technology **OPT** p307
MOS and bipolar gated thyristor: a thyristor with IGBT switching characteristics **CDS** p105
Novel commutation technique of AC-AC converters **EPA** p295
Novel low-cost, low-power modulator/demodulator using a single GaAs field effect transistor **CDS** p165
Novel PWM line conditioner with fast output voltage control **EPA** p85
Novel velocity-electric field relation for modelling of compound semiconductor field-effect transistors **CDS** p170
Optimisation of empirical model for IC fabrication process using linear programming **SMT** p58
Rapid slider LPE growth of InAs quantum wells **OPT** p297
Room temperature InPSb/InAs and InPSb/InAs/InAsSb mid-infrared emitting diodes grown by MOVPE **OPT** p257
Single-phase diode rectifier with novel passive filter **CDS** p254
Smith chart formulation of performance characterisation for a microwave transistor **CDS** p419
Turn-off analysis of PT and NPT IGBTs in zero-current switching **CDS** p185

SEMICONDUCTOR LASERS

1.3 μm InAsP quantum well lasers grown by solid source MBE **OPT** p3
Analysis of operating characteristics of TOADs using gain saturation and nonlinear gain in SOAs **OPT** p83
Dispersion compensation in a 10 Gbit/s IM/DD semiconductor laser system in an NRZ scheme **OPT** p47
Effect of GaSb growth temperature on p-GaSb/n-GaAs diodes grown by MOVPE **OPT** p287
Effects of carrier heating, nonequilibrium LO phonons and lattice heating on small-signal modulation response of semiconductor lasers **OPT** p13
Fast tuning of 3.3 μm InAsSb-InAsSbP diode lasers using nonlinear optical effects **OPT** p261
Feedforward LF compensation for laser fibre optic transmitter **OPT** p331
Gain/loss characterisation of optical waveguide and semiconductor laser structures **OPT** p93
High sensitivity precision relative intensity noise calibration standard using low noise reference laser source **SMT** p163
Influence of Auger and LO-phonon scattering on bulk and 'quasi'-quantum wire mid-IR laser diodes **OPT** p281
Interface-induced phenomena in type II antimonide-arsenide heterostructures **OPT** p268
Light sources for wavelengths >2 μm grown by MBE on InP using a strain relaxed buffer **OPT** p292
Microwave-optoelectronic modelling approaches for semiconductor lasers **OPT** p141
Mid-infrared InSb and InAlSb diode lasers **OPT** p265
Modelling of self-sustained pulsations in nonuniformly pumped semiconductor lasers **OPT** p217
Modelling of semiconductor laser amplifier for the terahertz optical asymmetric demultiplexer **CDS** p61
Modelling pulse propagation in semiconductor optical amplifiers using wavelets **OPT** p88
Normal-incidence TE intersub-band transitions **OPT** p21
Optimising 1550 nm InGaAsP strain compensated MQW lasers close to the miscibility gap **OPT** p7
Output power saturation characteristics of the CW-operated semiconductor Raman laser **OPT** p243
Passive modelocking in semiconductor lasers with monolithically integrated passive waveguides **OPT** p43
Polarisation modulation dynamics of birefringent vertical cavity surface emitting lasers **OPT** p31
Prism-like folded cavity surface-emitting laser diode: electromagnetic-threshold analysis **OPT** p151
Quasi-three-dimensional simulation of carrier dynamics in quantum well DFB lasers **OPT** p339
Raman amplification in GaP-$Al_xGa_{1-x}P$ waveguides for light frequency discrimination **OPT** p105
Semiconductor laser sources for the generation of millimetre-wave signals **OPT** p159
Spontaneous emission in semiconductor microcavity post lasers **OPT** p37
Tandem of electroabsorption modulators integrated with a DFB laser and an optical amplifier for short optical pulse generation and coding **OPT** p198
Undercut ridge structures: a novel approach to 1.3/1.55 μm vertical-cavity lasers designed for continuous-wave operation **OPT** p125

SIGNAL DETECTION

Analysis of DPSK nonlinear combiner over fading channels with impulse noise **COM** p406
Analysis of weight error loss with a multichannel beamformer processor **RSN** p63
Multiresolution and hybrid Bayesian algorithms for automatic detection of change points **VIS** p280
Robust sequential detectors employing an order statistic prefilter **VIS** p82
Root moments: a digital signal-processing perspective **VIS** p293

SIGNAL GENERATORS

Chaos diode **CDS** p361
Efficient digital sweep oscillator with extremely low sweep rates **CDS** p409
Generation of second-order single-OTA RC oscillators **CDS** p271
Novel MOSFET-C continuous-time oscillator with precision amplitude control and self-start **CDS** p90
State variable synthesis of single resistance controlled grounded capacitor oscillators using only two CFOAs **CDS** p135

SIGNAL PROCESSING

A posteriori real-time recurrent learning schemes for a recurrent neural network based nonlinear predictor **VIS** p365
Adaptive airborne MTI with tapered antenna arrays **RSN** p3
Adaptive attenuation of clutter and jamming for array radar **RSN** p193
Adaptive cancellation of nonstationary interference in HF antenna arrays **RSN** p19
Adaptive Volterra channel equalisation with lattice orthogonalisation **COM** p109
Analysis of the second heart sound for diagnosis of paediatric heart disease **SMT** p285
Analysis of weight error loss with a multichannel beamformer processor **RSN** p63
Basic functional requirements and results for an MSSR on-site evaluator based on RF target injection **RSN** p361
Bayesian approach to object detection in sidescan sonar **VIS** p221
Beamforming for circular and semicircular array antennas for low-cost wireless LAN data communications systems **MAP** p153
Bearings-only target motion analysis based on a multihypothesis Kalman filter and adaptive ownship motion control **RSN** p247
Blind channel identification based on cyclic statistics **RSN** p58
Coding for coherent optical CDMA networks **COM** p117
Comparison of methods for harmonic wavelet analysis of heart rate variability **SMT** p291
Comparison of techniques for time-frequency analysis of the ECG during human ventricular fibrillation **SMT** p301
Data compression, data fusion and Kalman filtering in wavelet packet sub-bands of a multisensor tracking system **RSN** p100
Decentralised detection strategies under communication constraints **RSN** p199
Deconvolution problem to produce ultrasonic short pulses **SMT** p317
Design of causal stable IIR perfect reconstruction filter banks using transformation of variables **VIS** p287
Design of IIR notch filters with different passband gains **VIS** p6
Digit-serial systolic multiplier for finite fields GF(2^m) **CDT** p143
Diversity combining with MLSE equalisation **COM** p105
Doppler sub-optimum estimates of two-tone polarimetric radar signals **RSN** p153
Effects of nonzero bandwidth on direction of arrival estimators in array signal processing **RSN** p317
Efficient numerical method for the discrete-time symmetric matrix polynomial equation **CTA** p443(5)
Experience with bicoherence of electrical power for condition monitoring of wind turbine blades **VIS** p141
Feature extraction of SAR targets consisting of trihedral and dihedral corner reflectors **RSN** p161
FFT-based self-normalising receiver for FFH spread spectrum systems **COM** p99
Full-order estimator for induction motor states and parameters **EPA** p169
Fuzzy logic approach to manoeuvring target tracking **RSN** p337
Generalisation of an array-failure-correction method **MAP** p332
Generalised array manifold model for wireless communication channels with local scattering **RSN** p51
Golay sequences for identification of linear systems with weak nonlinear distortion **SMT** p123
How narrow is narrowband? **RSN** p85
Human ECG: nonlinear deterministic versus stochastic aspects **SMT** p279
Identification of inter-ictal spikes in the EEG using neural network analysis **SMT** p270
Improved multiple targets angle tracking algorithm using the joint probabilistic data association filter **RSN** p331
Improving the capacity of CDMA systems using convolutional coding and interference cancellation **COM** p186
Independent component analysis: source assessment and separation, a Bayesian approach **VIS** p149
Intratropospheric range delay for two refractivity models **RSN** p119
Minimax design of two-channel nonuniform-division FIR filter banks **VIS** p88
Model reduction of 2-D separable-denominator transfer functions via quasi-Kalman decomposition **CDS** p13
Multiresolution and hybrid Bayesian algorithms for automatic detection of change points **VIS** p280
Near-field-far-field transformation from nonredundant plane-polar data: effective modellings of the source **MAP** p33
Noise analysis of digitised FMCW radar waveforms **RSN** p209
Nonlinear nonadaptive space-time processing for airborne early warning radar **RSN** p9
Performance analysis of ETDGE–an efficient and unbiased TDOA estimator **RSN** p325
Performance analysis of the OS family of CFAR schemes with incoherent integration of M-pulses in the presence of interferers **RSN** p181
Power system frequency estimation **GTD** p578
Properties of estimability criteria for target motion analysis **RSN** p92
Properties of risk-sensitive filters/estimators **CTA** p106
Rainfall profile retrieval through spaceborne rain radars utilising a sea surface NRCS model **RSN** p233
Reduction of loudspeaker polar response aberrations through the application of psychoacoustic error concealment **VIS** p11
Robust sequential detectors employing an order statistic prefilter **VIS** p82
Root moments: a digital signal-processing perspective **VIS** p293
Shaping the boundary of a multi-dimensional signal constellation with a non-flat power spectrum **COM** p213
Signal identification by orthogonal transforms **RSN** p145
Space division multiple access (SDMA) field trials. 2. Calibration and linearity issues **RSN** p79
Space division multiple access (SDMA) field trials. I. Tracking and BER performance **RSN** p73
Spatio-temporal radio channel characteristics in urban macrocells **RSN** p42
Synthesis and performance of a new class of implementation for high-order recursive digital filters **VIS** p73
Systolic arrays for the Haar transform **CDT** p403
Taxonomy of space-time processing for wireless networks **RSN** p25
Tracking ill-conditioning for the RLS-lattice algorithms **VIS** p1
Unified channel model for mobile radio systems with smart antennas **RSN** p32
Use of parametric modelling and statistical pattern recognition in detection of awareness during general anaesthesia **SMT** p307

SIMULATION, MODELLING AND IDENTIFICATION

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Application of adaptive dual controllers to a DC-motor **CTA** p299
Application of adaptive matching pursuit to adaptive control of nonlinear dynamic systems **CTA** p575
Application of self-organising neural networks in robot tracking control **CTA** p135
Approach for bus frequency estimating in power system simulations **GTD** p431
Asymptotically stable adaptive load torque observer for precision position control of BLDC motor **EPA** p383
Autogeneration of fuzzy rules and membership functions for fuzzy modelling using rough set theory **CTA** p437(5)
Better M sequence design for parameter identification based on EKF **CTA** p92
Cluster analysis of NARMAX models for signal-dependent systems **CTA** p409(4)
Comparison between evolutionary programming and a genetic algorithm for fault-section estimation **GTD** p616
Design of a hydraulic force control system using a generalised predictive control algorithm **CTA** p428(5)
Design of optimal reduced order filter for unstable discrete time systems **CTA** p397(5)
Design of reduced-order observer-based variable structure power system stabiliser for unmeasurable state variables **GTD** p525
Discrete-time model reduction with optimal zero locations by norm minimisation **CTA** p499
Distributed state observer scheme for large-scale interconnected systems **CTA** p331
Full-order estimator for induction motor states and parameters **EPA** p169
Golay sequences for identification of linear systems with weak nonlinear distortion **SMT** p123
How narrow is narrowband? **RSN** p85
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)
Minimal state-space model realisation of a nonlinear helicopter **CTA** p415(4)
Model reduction of 2-D separable-denominator transfer functions via quasi-Kalman decomposition **CDS** p13
Observer-based speed estimation method for sensorless vector control of induction motors **CTA** p359
Online process estimation by ANNs and Smith controller design **CTA** p231
Parallel self-organising hierarchical neural network-based fast voltage estimation **GTD** p98
Parameter identification of induction motor model using genetic algorithms **CTA** p587
Performance analysis of ETDGE–an efficient and unbiased TDOA estimator **RSN** p325
Properties of estimability criteria for target motion analysis **RSN** p92
Properties of risk-sensitive filters/estimators **CTA** p106
Robust discrete time observer with application to fault diagnosis **CTA** p353
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems **CTA** p41
SMC-based adaptive input-output linearising control of induction motors **CTA** p55
Status monitoring in flexible manipulators **CTA** p537
Towards the formalisation of soft systems models using Petri net theory **CTA** p463(5)
Value sets of polynomial families with coefficients depending nonlinearly on perturbed parameters **CTA** p73

SINGLE ANTENNAS

Application of hybrid radiation modes of a microstrip line in the design of rectangular microstrip antennas **MAP** p421
Characteristics of quad-ridged coaxial waveguides for dual-band horn applications **MAP** p225
Circular microstrip patch antennas on glass for vehicle applications **MAP** p416
Circularly polarised wire antenna with a dual rhombic loop **MAP** p219
Combined EM field/linear and nonlinear circuit simulation using the FDTD method **MAP** p185
Control of microstrip antenna radiation characteristics by ground plane size and shape **MAP** p207
Design of a wideband microstrip bowtie patch antenna **MAP** p137
Design of circular patch antennas on ferrite substrates **MAP** p49
Design of corner reflector antennas using FDTD **MAP** p481
Efficient technique for determining beam scanning characteristics of axisymmetric paraboloid reflectors **MAP** p25
General entire-domain Galerkin method for analysis of wire antennas in the presence of dielectric bodies **MAP** p13
Low-profile inverted-F antenna with parasitic elements on an infinite ground plane **MAP** p321
Microstripline- and stripline-fed aperture-coupled cylindrical rectangular microstrip antennas **MAP** p257
Near-field-far-field transformation from nonredundant plane-polar data: effective modellings of the source **MAP** p33
Nonideal radiation pattern of simple leaky-wave antennas explained in terms of free resonant modes **MAP** p424
Pattern prediction of extended hemispherical-lens/objective-lens antenna system at millimetre wavelengths **MAP** p295
Performance of shaped beam quadrifilar antennas on the METOP spacecraft **MAP** p19
Procedure for analysis of microstrip patch antennas using the method of moments **MAP** p455
Quasistatic capacitance and frequency-dependent effective permittivity of multilayer microstrip patch antennas **MAP** p75
Reflections inside an elliptical dielectric lens antenna **MAP** p243

Simple approach to determine resonant frequencies of microstrip antennas **MAP** p159
Simple circuit model for coax-fed stacked rectangular microstrip patch antenna **MAP** p268
Simple formulas for the gain and far-field of open-ended rectangular waveguides **MAP** p80
Square spiral antenna on dielectric half-space: analysis using an electric field equation formulated by a finite-difference technique **MAP** p70
Time domain calculation of the parameters of thin wire antennas and scatterers in a half-space configuration **MAP** p57
Triangular-patch model of bowtie antennas: validation against Brown and Woodward **MAP** p465

SONAR

Bayesian approach to object detection in sidescan sonar **VIS** p221
Bearings-only target motion analysis based on a multihypothesis Kalman filter and adaptive ownship motion control **RSN** p247
Doppler-sensitive active sonar pulse designs for reverberation processing **RSN** p347

SONICS AND ULTRASONICS

Acoustic fields from PVDF interdigital transducers **SMT** p250
Air-coupled ultrasonic transducers for measurement of green-state ceramics at elevated temperatures **SMT** p237
Deconvolution problem to produce ultrasonic short pulses **SMT** p317
Fibre waveguide transducers for Lamb wave NDE **SMT** p260
Influence of stator geometry upon vibratory behaviour and electromagnetic performances of switched reluctance motors **EPA** p462
Laser generation of ultrasonic Lamb waves using low power optical sources **SMT** p244
Noise quieting with random PWM AC drives **EPA** p1
Pseudo-inverse filtering of IVUS images **SMT** p321
Simulation approach and causality evaluation for an active noise control system **CTA** p423(4)
Ultrasonic transducers for high temperature applications **SMT** p229

SPEECH COMMUNICATION AND PROCESSING

A posteriori real-time recurrent learning schemes for a recurrent neural network based nonlinear predictor **VIS** p365
Cepstral behaviour due to additive noise and a compensation scheme for noisy speech recognition **VIS** p316
Continuous Mandarin speech recognition for Chinese language with large vocabulary based on segmental probability model **VIS** p309
Estimating time-varying noise introduced by CVSD for speech enhancement **VIS** p23
Linear prediction analysis of speech signals in the presence of white Gaussian noise with unknown variance **VIS** p303
Quality enhancement of sinusoidal transform vocoders **VIS** p379
Segmental probability distribution model approach for isolated Mandarin syllable recognition **VIS** p384

STABILITY

Adaptive estimation of rotor time constant for indirect field-oriented induction motor drive **EPA** p111
Adaptive H_∞ neural network tracking controller for electrically driven manipulators **CTA** p594
Algorithm for automatic generation of fuzzy rules applied to power system controllers **GTD** p161
Analysis, design and control of a novel spherical permanent-magnet actuator **EPA** p61
Analysis of sensitivity measures of finite-precision digital controller structures with closed-loop stability bounds **CTA** p472(5)
Application of STATCOMs to wind farms **GTD** p511
Asymptotically stable adaptive load torque observer for precision position control of BLDC motor **EPA** p383
Closed-loop control system robustness improvement by a parameterised state feedback **CTA** p33
Composite adaptive position controller for induction motor using feedback linearisation **CTA** p25
Constrained multivariable cautious stable predictive control **CTA** p385(5)
Delay-dependent robust H_∞ control for uncertain systems with time-varying delays **CTA** p338
Design of a sliding mode controller with fuzzy sliding surfaces **CTA** p411(5)
Design of decentralised output feedback TCSC damping controllers by using simulated annealing **GTD** p553
Design of reduced-order observer-based variable structure power system stabiliser for unmeasurable state variables **GTD** p525
Design of stable actuator saturation compensators in the frequency domain **CTA** p345
Dynamic quadrature booster as an aid to system stability **GTD** p41
Effects of unified power flow controllers on transient stability **GTD** p182
Excitation control system for use with synchronous generators **GTD** p537
Fuzzy logic based unified power flow controllers for transient stability improvement **GTD** p225
Generalised predictive controller with pole restriction **CTA** p219
Global exponential stabilisation for nonlinear singularly perturbed systems **CTA** p377(4)
$\mathcal{H}_\infty$ design of switching surfaces for sliding-mode control with nonmatching disturbances **CTA** p435(4)
Learning approach to control of servomotors under disturbance torque dependent on time and states **CTA** p251
LFT approach to robust $\mathcal{D}$-stability bounds of uncertain linear singular systems **CTA** p127
LMI approach to suboptimal guaranteed cost control for uncertain time-delay systems **CTA** p491
Longitudinal control with time delay in platooning **CTA** p211
Method of constructing Lyapunov functions for linear discrete time systems **CTA** p83
Mini-max control of cross-directional variations on a paper machine **CTA** p189
Minimal state-space model realisation of a nonlinear helicopter **CTA** p415(4)
Modelling and control of an under-actuated closed kinematic chain **CTA** p1
Nonlinear robust controller for a class of nonlinear uncertain systems **CTA** p405(5)
Optimal multiobjective SVC planning for voltage stability enhancement **GTD** p203
Optimal robust control design of static VAr compensators **GTD** p301
PID tuning based on loop-shaping H_∞ control **CTA** p485
PID tuning for unstable processes based on gain and phase-margin specifications **CTA** p392(5)
Position control of a vector controlled induction machine using Slotine's sliding mode control approach **EPA** p231
Real-time contingency evaluation and ranking technique **GTD** p517
Representation and control of high speed phase shifter for an electric power system **GTD** p308
Robust adaptive control of nonlinear output-feedback systems under bounded disturbances **CTA** p323
Robust and H_∞ stabilisation of interconnected systems with delays **CTA** p559
Robust control for uncertain linear systems with sinusoidal disturbance of uncertain frequencies **CTA** p531
Robust control of sampled data systems **CTA** p236
Robust decentralised control design using genetic algorithms in power system damping control **GTD** p1
Robust digital controller design for processes with dead times: new results **CTA** p159
Robust gamma stability of highly perturbed systems **CTA** p165
Robust Lyapunov control with perturbation estimation **CTA** p307
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
Robust position/force control of robot manipulators during constrained tasks **CTA** p427(4)
Robust regional stabilisation of an electropneumatic actuator **CTA** p226
Robust stabilisation of a state delayed system **CTA** p87
Root moments: a digital signal-processing perspective **VIS** p293
Rule regulation of indirect adaptive fuzzy controller design **CTA** p513
Selection of operating conditions for the co-ordinated setting of robust fixed-parameter stabilisers **GTD** p111
Sensitivity analysis for transient stability studies **GTD** p669
Slider-crank mechanism control using adaptive computed torque technique **CTA** p364
Sliding-mode control for current distribution in parallel-connected DC-DC converters **EPA** p333
Stable dynamical controller design for robust polynomial pole assignment **CTA** p259
Value sets of polynomial families with coefficients depending nonlinearly on perturbed parameters **CTA** p73
Voltage stability assessment with inclusion of hard limits **GTD** p505

SUPERCONDUCTING MATERIALS AND DEVICES

Detection of submillimetre wave radiation of a target using a high Tc superconducting detector **MAP** p190
Development of a SMES system as a fluctuating load compensator **GTD** p700
Low noise SIS receiver performance using Pb alloy tunnel junctions **MAP** p375
Toroidal inductively coupled superconducting fault current limiter with interleaved windings **EPA** p593

SWITCHGEAR

Dynamic quadrature booster as an aid to system stability **GTD** p41
Possibilistic-diagnosis theory for fault-section estimation and state identification of unobserved protective relays using tabu-search method **GTD** p722

SWITCHING SYSTEMS

Analysis of operating characteristics of TOADs using gain saturation and nonlinear gain in SOAs **OPT** p83
Complementary half-swing bus architecture and its application for wide band SRAM macros **CDS** p337
Look-ahead reservation-based scheduling for input-output buffered ATM switch **COM** p234
Modelling of a pump-power-loss-controlled gain-locking system for EDFA application in WDM transmission systems **OPT** p205
Modelling of semiconductor laser amplifier for the terahertz optical asymmetric demultiplexer **CDS** p61
Rigorous coupled-wave method applied to fan-out gratings **OPT** p165

SWITCHING THEORY

Adaptive exact optimisation of minimally testable FPRM expansions **CDT** p385
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits **CDT** p364
Algorithm for sequential generation of states in failure-prone communication network **COM** p73
Analysis of dynamic priority cell discarding **COM** p249
Analysis of operating characteristics of TOADs using gain saturation and nonlinear gain in SOAs **OPT** p83
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment **CDT** p155
Bandwidth allocation of virtual paths using neural-network-based genetic algorithms **COM** p33
Blocking analysis of time-division multiplexed multicast switch with intermediate channel grouping **COM** p19
Cell-access control for multiple cell-loss classes in shared ATM output buffer **COM** p8
Creating a highly reliable modified gamma interconnection network using a balance approach **CDT** p27
Delay performance of an input queueing packet switch with two priority classes **COM** p141
Design of knockout concentrators **COM** p145
Embedding incomplete binary trees into incomplete hypercubes **CDT** p377
Embedding meshes and TORUS networks onto degree-four chordal rings **CDT** p73
Evaluation of reservation-arbitrated access schemes for statistical multiplexing of variable-bit-rate video traffic over dual-bus metropolitan area networks **COM** p159
Fast and accurate estimation of ATM quality-of-service parameters with applications to call admission control **COM** p133
Fault diagnosis of a distributed knockout switch **COM** p241
Generalised model for Banyan networks with nonuniform traffic **CDT** p225
Image component labelling on the star graph using divide and conquer **CDT** p9
Impact of apodised linearly chirped fibre gratings on the performance of dispersion-limited subcarrier systems **OPT** p117
Implicit manipulation of equivalence classes for large finite state machines **CDT** p395

Integration of optimal routing and flow control in ATM networks **COM** p1
Logical manipulations and design of tributary networks in the arithmetic spectral domain **CDT** p347
Look-ahead reservation-based scheduling for input-output buffered ATM switch **COM** p234
Mapping finite element grids onto parallel multicomputers using a self-organising map **CDT** p211
Method for minimising the switching activity of two-level logic circuits **CDT** p357
Modelling of a pump-power-loss-controlled gain-locking system for EDFA application in WDM transmission systems **OPT** p205
Mutual conversions between generalised arithmetic expansions and free binary decision diagrams **CDS** p219
Neurocontroller for buffer overload control in a packet switch **COM** p227
New system for the interconnection of ATM networks via wireless links **COM** p259
Performance of fast bandwidth reservation with multipath routing **COM** p80
Priority queue with two-state Markov-modulated arrivals **COM** p152
Shortest paths in regular grids **CDS** p289
Synthesis of MVL functions using input and output assignments **CDS** p207
Throughput analysis of input-buffered ATM switch **COM** p15

SYNCHRONOUS MACHINES

Adaptive fuzzy sliding-mode control for PM synchronous servo motor drives **CTA** p63
Adaptive protection strategies for detecting power system out-of-step conditions using neural networks **GTD** p387
Approach for bus frequency estimating in power system simulations **GTD** p431
Cooling enhancement of electric motors **EPA** p57
Design and field-weakening performance of permanent-magnet/reluctance motor with two-part rotor **EPA** p133
Design considerations for permanent magnet synchronous motors for flux weakening applications **EPA** p435
Electronically-operated, linear, variable-reluctance, integrating, reversible actuator (ELVIRA)–a novel, low-cost, normal-force, tilting friction drive **EPA** p11
Excitation control system for use with synchronous generators **GTD** p537
Flux and torque control of switched reluctance machines **EPA** p519
Hybrid controller using a neural network for a PM synchronous servo-motor drive **EPA** p223
Influence of stator geometry upon vibratory behaviour and electromagnetic performances of switched reluctance motors **EPA** p462
New class of dual voltage converters for switched reluctance drives **EPA** p164
Robust nonlinear speed control of PM synchronous motor using adaptive and sliding mode control techniques **EPA** p369
Rotor design optimisation of a multi-layer interior permanent-magnet synchronous motor **EPA** p119
Sensitivity analysis for transient stability studies **GTD** p669
Simulation of electromagnetic drive systems using graph theory **EPA** p393
Slider-crank mechanism control using adaptive computed torque technique **CTA** p364
State-space d-q axis models of saturated salient pole synchronous machines **EPA** p206
Steady-state model of direct connected generator-HVDC converter units in the harmonic domain **GTD** p559
Synchronous generator internal fault computation and experimental verification **GTD** p604

SYSTEMS THEORY

Adaptive H_∞ neural network tracking controller for electrically driven manipulators **CTA** p594
Genetic algorithm based methodology to generate automatically optimal fuzzy systems **CTA** p583
Hardware implementation of a pulse-stream neural network **CDS** p141
Identification of inter-ictal spikes in the EEG using neural network analysis **SMT** p270
Influence of lot arrival distribution on production dispatching rule scheduling and cost in the final test process of LSI manufacturing system **SMT** p26
Robust training algorithm of multilayered neural networks for identification of nonlinear dynamic systems **CTA** p41
Towards the formalisation of soft systems models using Petri net theory **CTA** p463(5)
Value sets of polynomial families with coefficients depending nonlinearly on perturbed parameters **CTA** p73

TELECOMMUNICATION

Adaptive bandwidth for satellite optical communication **OPT** p109
Analysis of a leaky bucket control scheme in the signalling system no.7 network **COM** p25
Bandwidth allocation of virtual paths using neural-network-based genetic algorithms **COM** p33
Coding for coherent optical CDMA networks **COM** p117
Fast decoder for triple-error-correcting primitive binary BCH codes with odd m **COM** p60
Lower bound for multimedia multicast routing **COM** p87
Multimedia transport in multihop wireless networks **COM** p342
Multiparty videoconferencing on multi-drop VP-based SONET/ATM rings: performance analysis **COM** p389
Novel low-cost, low-power modulator/demodulator using a single GaAs field effect transistor **CDS** p165
Power amplifier module combined with duplexer CDMA-based PCS phone **MAP** p486
Quality enhancement of sinusoidal transform vocoders **VIS** p379
Reservation arbitrated access for efficient service integration over dual-bus metropolitan area networks **COM** p347
Robust LPC parameter estimation in standard CELP 4800 bit/s speech coder **VIS** p19
Smart codec: an adaptive packet data link **COM** p180
Statistical coding method for facial features **VIS** p187
Systolic decoder for burst error-correcting codes **COM** p126

TELEMETRY

New channel access protocol for a wide area DGPS deformation monitoring network **COM** p203

TELEVISION

Edge operator error estimation incorporating measurements of CCD TV camera transfer function **VIS** p229
Efficient algorithm and architecture for scan conversion in HDTV **CDT** p287
Laser-video scanner calibration without the use of a frame store **VIS** p244

THIN FILM GROWTH

Device characteristics of CuPc/TiO_2 heterojunctions **CDS** p383
Effect of GaSb growth temperature on p-GaSb/n-GaAs diodes grown by MOVPE **OPT** p287
Fast tuning of 3.3 μm InAsSb-InAsSbP diode lasers using nonlinear optical effects **OPT** p261
Flammable gas sensors based on sol-gel materials **CDS** p379
InAsSbP-InAs LEDs for the 3.3-5.5 μm spectral range **OPT** p254
Interface-induced phenomena in type II antimonide-arsenide heterostructures **OPT** p268
Lead zirconate titanate thin films for microwave device applications **CDS** p373
Light sources for wavelengths >2 μm grown by MBE on InP using a strain relaxed buffer **OPT** p292
Liquid-phase epitaxial growth of GaSb-related compounds on sulphide treated (100) GaSb substrates **OPT** p303
Micromachined silicon thermopile and thermal radiators using porous silicon technology **OPT** p307
Mid-infrared InSb and InAlSb diode lasers **OPT** p265
Rapid slider LPE growth of InAs quantum wells **OPT** p297
Sol-gel derived organic-inorganic hybrid materials for photonic applications **CDS** p369
Synthesis of luminescent sol-gel materials for active electronic devices **CDS** p364

TIME-VARYING SYSTEMS

Design of a sliding mode controller with fuzzy sliding surfaces **CTA** p411(5)
Indirect adaptive control for a class of linear time-varying plants **CTA** p141
LQG controllers for discrete-time multivariable systems with different transport delays in signal channels **CTA** p449(5)

TRANSFORMERS

Analysis of self-excited electronic ballasts using BJTs/MOSFETs as switching devices **CDS** p95
Chaos in ferroresonant wound voltage transformers: effect of core losses and universal circuit behaviour **SMT** p39
Circulating-current loss in transformer windings **SMT** p136
Competitive hysteresis controllers–a control concept for inverters having oscillating DC- and AC-side state variables **EPA** p569
Loss and current distribution in foil windings of transformers **GTD** p709
Nonlinear oscillations due to spurious energisation of transformers **EPA** p585
Portable optoelectronic instrument for measuring furfuraldehyde in transformer oil **SMT** p45
Resonant converter in high power factor, high voltage DC applications **EPA** p307
Risk of fatal electric shocks at distribution network MV/LV transformer stations **GTD** p463
Short-time Fourier and wavelet transforms for fault detection in power transformers during impulse tests **SMT** p77

TRANSMISSION LINE THEORY

Accelerant method for Green's function of horizontal dipole in parallel plate waveguide **MAP** p430
Branch cut integration method for computing signal propagation through dispersive media **RSN** p142
Characteristics of quad-ridged coaxial waveguides for dual-band horn applications **MAP** p225
Comparison of analytic, numerical and approximate models for shielding effectiveness with measurement **SMT** p61
Cutoff and bandwidth characteristics of a circular coaxial waveguide with four T-septa symmetrically placed in the inner conductor **MAP** p366
Design of circular patch antennas on ferrite substrates **MAP** p49
Dyadic Green's functions for the parallel-plate chirowaveguide **MAP** p273
Efficient propagation algorithm for 3D optical waveguides **OPT** p53
FDTD analysis of EM wave circulated by a magnetised ferrite body of arbitrary shape **MAP** p433
Field theory based design and comparison of two kinds of quasi-planar bandpass filters **MAP** p441
Generalised TLM switch model for power electronics applications **SMT** p101
Hybrid finite element solution of a quadrupole gyromagnetic waveguide **MAP** p128
Improved self-imaging characteristics in 1×N multimode couplers **OPT** p65
Inductance computation for coplanar waveguide discontinuities with finite metallisation thickness **MAP** p496
Microwave-optoelectronic modelling approaches for semiconductor lasers **OPT** p141
Modal analysis at the junction formed by a circular or an elliptic waveguide and a translated and rotated elliptic waveguide **MAP** p501
Mode-matching analysis of a waveguide junction formed by a circular and a larger elliptic waveguide **MAP** p123
Modelling nonlinear and dispersive propagation problems by using the TLM method **MAP** p193
Propagation modes of a cylindrical waveguide loaded by a coaxial chiral cylinder **MAP** p229
Quality factor of an evanescent mode Okada resonator **MAP** p239
Rigorous coupled-wave method applied to fan-out gratings **OPT** p165
Sidewall inclined slot in a rectangular waveguide: theory and experiment **MAP** p233
Simple formulas for the gain and far-field of open-ended rectangular waveguides **MAP** p80
Singularity-corrected spectral index method **OPT** p59
Spectral Green's functions for multilayer media in a convenient computational form **MAP** p85
Spot size expansion for improved OEIC-to-fibre coupling using directional couplers with 2D confinement **OPT** p71
Transfer functions of lumped distributed multibranch networks **MAP** p279
Triple mode dielectric resonator hybrid reflection filters **MAP** p337
Use of transmission-line modelling method in FEM for solution of nonlinear eddy-current problems **SMT** p31

Voltage-current definition of impedance of double ridge waveguide using the finite element method **MAP** p39

USER INTERFACES

Continuous Mandarin speech recognition for Chinese language with large vocabulary based on segmental probability model **VIS** p309
Segmental probability distribution model approach for isolated Mandarin syllable recognition **VIS** p384
TABS: script-based software framework for research in image processing, analysis and understanding **VIS** p194

WAVEGUIDE COMPONENTS

Efficient simulation of microstrip circuits using adapted wavelets **MAP** p354
FDTD analysis of EM wave circulated by a magnetised ferrite body of arbitrary shape **MAP** p433
Field theory based design and comparison of two kinds of quasi-planar bandpass filters **MAP** p441
Modal analysis at the junction formed by a circular or an elliptic waveguide and a translated and rotated elliptic waveguide **MAP** p501
Mode-matching analysis of a waveguide junction formed by a circular and a larger elliptic waveguide **MAP** p123
Quality factor of an evanescent mode Okada resonator **MAP** p239
Triple mode dielectric resonator hybrid reflection filters **MAP** p337

WAVEGUIDES

Characteristics of quad-ridged coaxial waveguides for dual-band horn applications **MAP** p225
Cutoff and bandwidth characteristics of a circular coaxial waveguide with four T-septa symmetrically placed in the inner conductor **MAP** p366
Inductance computation for coplanar waveguide discontinuities with finite metallisation thickness **MAP** p496
Measurements on millimetre wave circuits at 140 GHz **SMT** p171
Propagation modes of a cylindrical waveguide loaded by a coaxial chiral cylinder **MAP** p229
Sidewall inclined slot in a rectangular waveguide: theory and experiment **MAP** p233
Voltage-current definition of impedance of double ridge waveguide using the finite element method **MAP** p39

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $10.00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA (1350–2387/98 $10.00). This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Photocopies of individual papers published in the *IEE Proceedings* can be supplied from the IEE Library at 10p per page plus a handling charge of 50p per paper, which covers the cost of surface mail (airmail extra). The handling charge is waived if reprints are collected from Savoy Place by purchasers.

The IEE is not as a body responsible for the opinions expressed by individual authors.
The IEE is a member of the Association of Learned & Professional Society Publishers.

AUDIO EQUIPMENT

Application of Grobner bases for decoding Reed-Solomon codes used on CDs p369

AUTOMATA THEORY

Implicit manipulation of equivalence classes for large finite state machines p395

AUTOMATIC TEST SYSTEMS

Algebraic test-pattern generation based on the Reed-Muller spectrum p308

CIRCUIT CAD

Static power analysis for power-driven synthesis p89

CIRCUIT THEORY AND DESIGN

Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment p155
Datapath layout optimisation using genetic algorithm and simulated annealing p135
Design space exploration techniques for the codesign of embedded data processing systems p161
Efficient bipartitioning algorithm for size-constrained circuits p37
MPT-based branch-and-bound strategy for scheduling problem in high-level synthesis p425
Static power analysis for power-driven synthesis p89

CMOS INTEGRATED CIRCUITS

1 GHz 64-bit high-speed comparator using ANT dynamic logic with two-phase clocking p433
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits p364
Sensitisable-path-oriented clustered voltage scaling technique for low power p301

CODES AND DECODING

Algebraic test-pattern generation based on the Reed-Muller spectrum p308
Application of Grobner bases for decoding Reed-Solomon codes used on CDs p369
Area-time-efficient VLSI residue-to-binary converters p229
Authenticated encryption scheme with (t, n) shared verification p117
Cryptanalysis and improvement of signcryption schemes p149
Efficient group signature scheme based on the discrete logarithm p15
Generalised inverses in public key cryptosystem design p321
GF(2^m) multiplication over triangular basis for design of Reed-Solomon codes p437
Modular multiplication method p317
Signature schemes based on factoring and discrete logarithms p33
Systolic arrays for the Haar transform p403
Theory and design of SEC-DED-AUED codes p121

COMMUNICATION SYSTEM THEORY

Fault-tolerant scaleable multicast algorithm with piggybacking approach on logical process ring p292

COMPUTATIONAL COMPLEXITY

Adaptive exact optimisation of minimally testable FPRM expansions p385
Creating a highly reliable modified gamma interconnection network using a balance approach p27
DPS: dynamic priority scheduling heuristic for heterogeneous computing systems p411
Hardware-efficient systolic architecture for inversion and division in GF(2^m) p272
Mapping finite element grids onto parallel multicomputers using a self-organising map p211

COMPUTER APPLICATIONS

Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment p155
CodeSign: an embedded system design environment p171
Correspondence on 'Planar constrained terminals over-the-cell router' p319
Datapath layout optimisation using genetic algorithm and simulated annealing p135
Design space exploration techniques for the codesign of embedded data processing systems p161
Efficient bipartitioning algorithm for size-constrained circuits p37
Evolutionary approach to hardware/software partitioning p203
Presynthesis partitioning for hardware/software cosynthesis p197
Stack operations folding in Java processors p333
Transformational partitioning for codesign p181

DATA COMMUNICATION

Fault-tolerant scaleable multicast algorithm with piggybacking approach on logical process ring p292
Two integrated schemes of user authentication and access control in a distributed computer network p419

DATA HANDLING

Empirical study of memory-data: characteristics and compressibility p63

DATA SECURITY

Authenticated encryption scheme with (t, n) shared verification p117
Balanced Boolean functions p52
Cryptanalysis and improvement of signcryption schemes p149
Efficient group signature scheme based on the discrete logarithm p15
Generalised inverses in public key cryptosystem design p321
Modular multiplication method p317
Signature schemes based on factoring and discrete logarithms p33
Two integrated schemes of user authentication and access control in a distributed computer network p419

DIGITAL ARITHMETIC

Area-time-efficient VLSI residue-to-binary converters p229
Fast algorithm for modular reduction p265
GF(2^m) multiplication over triangular basis for design of Reed-Solomon codes p437
Two's complement division without using the set of full precision comparisons p19

DIGITAL ELECTRONICS

Area-time-efficient VLSI residue-to-binary converters p229
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment p155
Datapath layout optimisation using genetic algorithm and simulated annealing p135
Digit-serial systolic multiplier for finite fields GF(2^m) p143
SPARC-based VLIW testbed p215

DIGITAL FILTERS

Cylindrical architectures for 1-D recursive digital filters: A state space approach p327

DIGITAL TECHNIQUES

Stack operations folding in Java processors p333

FORMAL LOGIC

Adaptive exact optimisation of minimally testable FPRM expansions p385
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits p364
Balanced Boolean functions p52
Logical manipulations and design of tributary networks in the arithmetic spectral domain p347
Recursive relations and fast flow diagram for nonlinear quantised transform p97

INFORMATION THEORY

Theory and design of SEC-DED-AUED codes p121

INTEGRATED CIRCUITS

Area-time-efficient VLSI residue-to-binary converters p229
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment p155
Efficient bipartitioning algorithm for size-constrained circuits p37
Hardware-efficient systolic architecture for inversion and division in GF(2^m) p272
Systolic dual basis serial multiplier p237

LOGIC AND SWITCHING CIRCUITS

1 GHz 64-bit high-speed comparator using ANT dynamic logic with two-phase clocking p433
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits p364
Algebraic test-pattern generation based on the Reed-Muller spectrum p308
Balanced Boolean functions p52
Correspondence on 'Planar constrained terminals over-the-cell router' p319
Design and analysis of asynchronous adders p1
Design for the discrete cosine transform in VLSI p127
Design of a basic cell to construct embryonic arrays p242
Designs for self checking flip-flops p81
GF(2^m) multiplication over triangular basis for design of Reed-Solomon codes p437
Hardware-efficient systolic architecture for inversion and division in GF(2^m) p272
Implicit manipulation of equivalence classes for large finite state machines p395
Logic synthesis for a fine-grain FPGA p47
Partial scan design based on levelised combinational structure p249
Recursive relations and fast flow diagram for nonlinear quantised transform p97
Sensitisable-path-oriented clustered voltage scaling technique for low power p301
Static power analysis for power-driven synthesis p89
Systolic dual basis serial multiplier p237
Two's complement division without using the set of full precision comparisons p19

LOGIC DESIGN

1 GHz 64-bit high-speed comparator using ANT dynamic logic with two-phase clocking p433
Adaptive exact optimisation of minimally testable FPRM expansions p385
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits p364
Algebraic test-pattern generation based on the Reed-Muller spectrum p308
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment p155
Balanced Boolean functions p52
CodeSign: an embedded system design environment p171
Correspondence on 'Planar constrained terminals over-the-cell router' p319
Design and analysis of asynchronous adders p1
Design for the discrete cosine transform in VLSI p127
Design space exploration techniques for the codesign of embedded data processing systems p161
Evolutionary approach to hardware/software partitioning p203

Implicit manipulation of equivalence classes for large finite state machines p395
Logic synthesis for a fine-grain FPGA p47
Logical manipulations and design of tributary networks in the arithmetic spectral domain p347
Method for minimising the switching activity of two-level logic circuits p357
MPT-based branch-and-bound strategy for scheduling problem in high-level synthesis p425
Partial scan design based on levelised combinational structure p249
Presynthesis partitioning for hardware/software cosynthesis p197
Recursive relations and fast flow diagram for nonlinear quantised transform p97
Sensitisable-path-oriented clustered voltage scaling technique for low power p301
Static power analysis for power-driven synthesis p89
Transformational partitioning for codesign p181

MATHEMATICAL TECHNIQUES

Analysis of radix searching of exponential bidirectional associative memory p279
Balanced Boolean functions p52
Datapath layout optimisation using genetic algorithm and simulated annealing p135
Design for the discrete cosine transform in VLSI p127
Design of a basic cell to construct embryonic arrays p242
Embedding incomplete binary trees into incomplete hypercubes p377
Embedding meshes and TORUS networks onto degree-four chordal rings p73
Generalised model for Banyan networks with nonuniform traffic p225
Logic synthesis for a fine-grain FPGA p47
Recursive relations and fast flow diagram for nonlinear quantised transform p97
Systolic arrays for the Haar transform p403

MULTIPROCESSOR SYSTEMS

Generalised model for Banyan networks with nonuniform traffic p225
Hardware-supported asynchronous checkpointing scheme p109
Image component labelling on the star graph using divide and conquer p9
Mapping finite element grids onto parallel multicomputers using a self-organising map p211
Parallelism exploitation in superscalar multiprocessing p255
SPARC-based VLIW testbed p215

NEURAL NETS

Analysis of radix searching of exponential bidirectional associative memory p279
Mapping finite element grids onto parallel multicomputers using a self-organising map p211

NUMERICAL ANALYSIS

Design for the discrete cosine transform in VLSI p127
Design of a basic cell to construct embryonic arrays p242
Efficient algorithm and architecture for scan conversion in HDTV p287
Generalised inverses in public key cryptosystem design p321
Mapping finite element grids onto parallel multicomputers using a self-organising map p211
Systolic dual basis serial multiplier p237

OPTICAL IMAGE PROCESSING

Design for the discrete cosine transform in VLSI p127
Image component labelling on the star graph using divide and conquer p9

PARALLEL PROCESSING

Creating a highly reliable modified gamma interconnection network using a balance approach p27
Cylindrical architectures for 1-D recursive digital filters: A state space approach p327
Deadlock detection using (0, 1)-labelling of resource allocation graphs p68
Digit-serial systolic multiplier for finite fields GF(2^m) p143
DPS: dynamic priority scheduling heuristic for heterogeneous computing systems p411
Efficient algorithm and architecture for scan conversion in HDTV p287
Embedding incomplete binary trees into incomplete hypercubes p377
Embedding meshes and TORUS networks onto degree-four chordal rings p73
Generalised model for Banyan networks with nonuniform traffic p225
Hardware-efficient systolic architecture for inversion and division in GF(2^m) p272
Hardware-supported asynchronous checkpointing scheme p109
Image component labelling on the star graph using divide and conquer p9
Mapping finite element grids onto parallel multicomputers using a self-organising map p211
SPARC-based VLIW testbed p215
Systolic dual basis serial multiplier p237
Transformational partitioning for codesign p181

PATTERN RECOGNITION

Image component labelling on the star graph using divide and conquer p9

PERFORMANCE EVALUATION

Algebraic test-pattern generation based on the Reed-Muller spectrum p308
Creating a highly reliable modified gamma interconnection network using a balance approach p27
Design of a basic cell to construct embryonic arrays p242
Digit-serial systolic multiplier for finite fields GF(2^m) p143
Fault-tolerant scaleable multicast algorithm with piggybacking approach on logical process ring p292
Hardware-supported asynchronous checkpointing scheme p109
Memory alignment issues in real-time systems p341
SPARC-based VLIW testbed p215
Stack operations folding in Java processors p333

PROGRAMMING SUPPORT

CodeSign: an embedded system design environment p171

PROGRAMMING THEORY

Adaptive exact optimisation of minimally testable FPRM expansions p385
Creating a highly reliable modified gamma interconnection network using a balance approach p27
DPS: dynamic priority scheduling heuristic for heterogeneous computing systems p411
Hardware-efficient systolic architecture for inversion and division in GF(2^m) p272
Mapping finite element grids onto parallel multicomputers using a self-organising map p211

SIGNAL PROCESSING

Digit-serial systolic multiplier for finite fields GF(2^m) p143
Systolic arrays for the Haar transform p403

SWITCHING THEORY

Adaptive exact optimisation of minimally testable FPRM expansions p385
Algebraic properties of multiple-valued modulo systems and their applications to current-mode CMOS circuits p364
Automatic generation of reprogrammable microcoded controllers within a high-level synthesis environment p155
Creating a highly reliable modified gamma interconnection network using a balance approach p27
Embedding incomplete binary trees into incomplete hypercubes p377
Embedding meshes and TORUS networks onto degree-four chordal rings p73
Generalised model for Banyan networks with nonuniform traffic p225
Image component labelling on the star graph using divide and conquer p9
Implicit manipulation of equivalence classes for large finite state machines p395
Logical manipulations and design of tributary networks in the arithmetic spectral domain p347
Mapping finite element grids onto parallel multicomputers using a self-organising map p211
Method for minimising the switching activity of two-level logic circuits p357

TELEVISION

Efficient algorithm and architecture for scan conversion in HDTV p287
